
Postdoctorate Fellowships Office, National Research Council of Canada, Ottawa K1A 0R6, Canada.

- (b) Research associateships for research in science and engineering, 1975, tenable in the following laboratories of the National Research Council of Canada:

Atlantic Regional Laboratory
Division of Biological Sciences
Division of Building Research
Division of Chemistry
Division of Mechanical Engineering
National Aeronautical Establishment
Division of Physics
Prairie Regional Laboratory
Radio and Electrical Engineering Division

Starting April 1, 1975, the National Research Council of Canada will offer research associateships tenable in its laboratories. These associateships are intended to give promising young scientists and engineers an opportunity to work on challenging research problems in fields of interest to NRC as a stage in the development of their research careers.

Applicants should possess at least a Ph.D. in natural science or a master's degree in an engineering field or expect to obtain the degree before taking up the award. Demonstrated ability to perform original research of high quality in the chosen field will be the main criterion in selecting candidates and in considering extensions of their terms.

While preference will be given to Canadians, the associateships are open to nationals of other countries. Successful candidates must meet the requirements for entry to Canada.

Research associates will be offered salaries and staff benefits comparable to those currently available to members of the regular staff of the National Research Council.

The initial award will be for a period of one year and may be renewed at intervals for a total period of up to five years.

An allowance will be provided towards the cost of travel between the place of residence at the time the appointment is made and the laboratory at which the associateship is held. A similar allowance may be made for return travel on termination of the appointment.
