McClary's
 Famous
 Hot
 Blast
 Heaters
 For
 Coal

This stove has been constructed specially for the trade of Manitoba, the North-West Territories and British Columbia

By the arrangement of the damper at the top of stove and the position of smoke pipe collar, the smoke is made to pass through the fire, and thus be consumed. A ventilator in front of stove keeps gas from accumulating.

Supplied with nickel-plated fancy swing top, air-tight screw dampers, direct and indirect drafts. A POWERFUL HEATER AND A GREAT SAVER OF FUEL.

It will burn successfully HARD COAL, SOFT COAL or SQUIB COAL.

It practically consumes its own smoke.

The air passing in at the top, being first heated, brings about the most perfect combustion possible, as it supplies a fresh discharge of oxygen at the very point of combustion, enabling the fire to burn up all the smoke. The amount permitted to go through the fire can be accurately regulated by the air-inlet.

The down draft in this heater warms the floor, where heat is most needed.
