CHAPTER	PAGE
X.—NERVE INJURIES	159
The effects of nerve section.—Epicritic, protopathic, and deep sensibility.—Causation of trophic lesions.—Diagnosis of partial nerve section.—How degenerated nerve is regenerated.—The results of primary and secondary nerve-suture.—Methods of dealing with wide gaps.	
XI.—THE SURGICAL PHYSIOLOGY OF THE SPINAL CORD	174
The effects of division of the posterior nerve roots.—The diagnosis and localization of tumours of the spinal cord.—The exact diagnosis of injuries of the spinal cord.	
XII.—CEREBRAL LOCALIZATION	186
The causation and significance of optic neuritis.—Localization in the cerebellum.—Tumours in the cerebello-pontine angle.—Localization of sensation in the cerebral cortex.—Functions of the frontal cortex; spasticity.—Apraxia.—Aphasia.—Misleading localizing signs of cerebral tumour.—The cerebrospinal fluid.	
XIII.—THE ACTION OF CUTANEOUS ANÆSTHETICS	212
Local anæsthetics given hypodermically; cocaine, novocain, eucain, stovain.—Drugs applied to the unbroken skin; opium, belladonna.—Counter-irritants; the theory of their action.	
APPENDIX.—URINE ANALYSIS IN CASES FED BY NUTRIENT ENEMATA	225
