

springs were secured from the drainings of the land, cleaned out, and encased. A large hotel has been built for the reception of visitors, capable of accommodating 150 persons, and a bath house; and a circular railroad has been laid down round the grounds for the amusement of invalids. There are also in the village two churches, stores, saw-mill, post-office, a resident physician, three taverns, and other boarding houses, and a small paper called "Life at the Springs," is published weekly. The principal tavern, the "Canada House," is kept by the proprietor of the springs. There are four springs in the place, called the Saline, Sulphur, Gas, and one more lately discovered, called the Intermittent. The Caledonia water is bottled and exported.
