Neighbors Force Door and Find House Filled With Coal Gas-Suburban Doings.

BRACONDALE, Jan. 26.-(Special:)-William Sanson, employed as a laborer at the Toronto Carpet Works, and living on Rovina, just off Lakeview avenue in Bracondale, was found by his neighbors dead in bed this after-noon, and his wife is now lying in an inconscious condition ,the result of inhaling coal gas.

Sanson and his wife lived in a little single-roomed house in which is contained the stove, an ordinary cook, together with the scanty stock of furniture owned by the couple. For a week or two Sansom has been out of work and the neighbors have assisted in tiding over the hard time, in little acts of charity. When they saw that the window blinds had not been raised also championed by Mr. Simmers. The first banquet of the Lambton Forestthis afternoon they decided to investiopen, and receiving no response forced open the door. The room was filled with coal gas from the stove, the degree of which had a stove dampers of which had not been turned back. It was with difficulty that the men could withstand the fumes which were almost overpowering.

Sanson was lying on the bed dead and his wife, wolly unconscious, was lying beside him. They were borne out into the open and Dr. Warreb hastily summoned. He found that the man had been dead for some time. Mrs. Sanson is still unconscious, but Dr. Warren holds out hope for her recovery. Undertaker William Speers of Toronto was later notified of the tragic affair and he at once made arrangements for the removal of Sanson's body to his undertaking parlors, where it now lies. No arrangements will be made regarding the funeral until it is known definitely as to the

unfortunate woman's condition. Dr. Coroner Golmour of West To-ronto, was notified, but after inquir-ing into all the circumstances decided

that an inquest was unnecessary.

Sanson and his wife came out from England in May, since which time they have lived in this neighborhood. He was 37 years of age and his wife about the same. There were no other oc-cupants of the house, which is a small frame one
