LOCAL MARKET.

Saturday, June 1. The attendance at the market today was not quite as large as last Saturday. The square was pretty well filled up with veichles loaded with the small Baled straw, \$6.75 to \$7 per ton, in car produce of the farm and garden. The appearance of the weather in the early part of the market made the farmers anxious to sell, and as a result trade was livelier than usual, and a lot of stuff was sold in a short space of time. Two Special Larder Lake Offerings-BONANZA

We have been fortunate in securing the Agency what we consider one of the best Larder Lake Companies on the market.

The Company has nine claims of 40 acres each, total of 360 acres and

We Have Seen the Gold From there in quantities such as we never saw before

in our lives. The Company is capitalized at a million onlyone of the smallest capitalized concerns in the field and the president states that he has secured what he believes to be the very best claim in all the Larder Lake district. We have ourselves seen the gold so thick that it is almost like assaying gold dollars to assay the ore.

This man is a mining operator of many years' experience, and we verily believe money put into this Company will yield very handsome returns They are offering the FIRST SMALL ISSUE of

hares at 15 cents each. This is only like paying three cents per share a capitalization of \$5,000,000, which is what some Larder Lake Companies are capitalized at, and it simply means that you get in on the ground floor.

We would be glad to send you a prospectus of the LARDER LAKE BONANZA GOLD MINES. As on three of the claims have been discovered what are considered to be the richest and largest veins in the Larder Lake District.

This offer is limited very strictly and we strongly urge immediate action. Shall be glad to give you further information if desired. Act quickly on this, remembering theold adage-"He who hesitates is lost."

Up to June 10 next we can supply GOLD MINT

stock at 25 cents per share. On June 10 it advances to fifty (50) cents We have private advices that an English Syndi-

cate has an option on these shares at \$1 25. If they take it up your 25 cent shares are immediately worth \$1 25, and if they don't you simply double your money.

That is pretty good on a two week's investment The property (560 acres) is right in the heart of the known Gold region at Larder Lake and men are now at work on the property and

LONDON SILVER-COBALT SHARES

We are still pushing the sales of these shares and the developments in the district lead us to feel more and more sanguine, as the days go by, of the value of these shares. A strike has been made just northeast of the Company's property, and we feel that this strike has demonstrated the very high probability of the London vein actually being the same as that on which the two strikes (to the northeast and to the southveest), have been made, as the London property lies directly between these two strikes.

We confidently and strongly urge the purchase of these London Silver-Cobalt shares, not tion, but as an investment.
