STREET RAILWAY AND CITY EMPLOYEES CLASH

Undertook to Widen Channel at Point Where Winnipeg Bridge Is to Be Constructed.

WINNIPEG, Nov. 26.—(Special).—A serious clash between the employees of the street railway and the city has occurred on the Pinnawa Channel, at which the city power tramway bridge is to be placed over the channel of the Winnipeg river.

The Street Railway Company some time ago signified its intention of widening the channel at the point where the city's bridge is to be constructed. City officials, however, state that the company said it would not proceed with the work until spring.

For some time the city workmen have been working on the erection of a temporary trestle up to the edge of the channel. A few days ago the street railwaymen appeared on the scene and started operations directly in the path of the trestle for the purpose of widening the channel.

The city workmen threw a derick placed by the company out of the way and then the street railwaymen placed it in position again. The city claims that no rights to widen the channel have been granted to the street railway at Ottawa and have wired to the Federal authorities as to their rights.

STORM SWEEPS PACIFIC COAST

Wires Down and Many Cities Almost Isolated.

VANCOUVER, B.C., Nov. 26.—(Special).—The big rainstorm which descended on Vancouver late yesterday afternoon did not play any favorites along the Pacific coast. Practically every mile of coast from Alaska to California was swept by the storm, which in some places carried with it rain, and in others snow.

There is no communication between Vancouver and outside points to-day save by telephone, and Seattle is also shut out by the storm. The C.P. telegraph lines were carried down in the vicinity of North Bend, where seven inches of snow fell in a few hours.

STRIKERS OBSTINATE.

Canadian Pacific Railroad Bring Hundreds of Men to St. John.

ST. JOHN, N.B., Nov. 26.—(Special).—Notwithstanding the fact that the C.P.R. is bringing hundreds of men here to work on the winter port ships, the Longshoremen's Association late tonight refused absolutely to accept the offered rate of 30 cents on hour and to go to work.

"We'll never give in," said one of their officials after the meeting, and word to that effect just now has been sent to the steamship companies. "We've been getting 40 cents all summer and won't do a tap of work this winter for less." So far there has been no sign of a strike at Sand Point, altho 500 strikers are loafing around there. Just what will happen when the C.P.R. men arrive is difficult to say.

Indian Stayed Too Long.

QUELPH, Nov. 26.—On the evidence of Inspector Oakes at the police court this morning it was proven that on Saturday week an "Indian" named Kehler loitered for some time in the bar of the Queen's Hotel, and in consequence a fine of \$10 and costs was imposed on the proprietor.

The defendant tried to show that Kehler had made an appointment to meet his employer at the hotel, but evidently after doing his business he had remained about the premises. The inspector's evidence was that he had been in the bar at twenty minutes to twelve, and also at twelve o'clock.

BROCKVILLE'S BANQUET TO THE NEW MINISTER

Hon. G. P. Graham is Given a Pleasant Evening by His Constituents.

BROCKVILLE, Nov. 25.—(Special).—Hon. George P. Graham, minister of railways and canals, was in the home of his friends and fellow-citizens this evening, on the occasion of a complimentary banquet tendered him in recognition of being called to Sir Wilfrid Laurier's cabinet.

The affair came at an opportune time to kill two birds with the one stone, for Hon. Dan Doherty, another distinguished member of the cabinet, appointed to the senate a few days ago, was conspicuous in the gathering and shared with Mr. Graham in having congratulations showered upon him from all sides.

The big ex-M.P. was in a particularly happy mood, showing his appreciation of the honor by making new sit, and made one of his characteristic addresses during the evening.

The banquet room, a large dining-room of the Hotel Strathcona, with artistic appointments, the seating capacity was fully occupied with Brockville's leading citizens, representative of party lines or creed. Among the number was Rev. Dean Murray, pastor of "Our Church" Protestant Episcopal Church, Hon. C. J. O'Brien, Catholic Church, other clergymen present were Rev. D. Strachan of St. John's Presbyterian Church, Rev. Norman MacLeod of First Church on Bay, F. C. Reynolds of the George-street Methodist.

James H. Gilmore, president of the board of trade, acted as chairman and toastmaster, and ex-Mayor Stewart, a strong political opponent of the minister of railways, acted as vice-chairman. At the table of honor sat the chairman, to his right Hon. G. P. Graham, and to his left, Hon. D. Doherty. Surrounding them were the speakers of the evening, who, apart from Mr. Graham, were: Rev. Norman MacLeod, Senator Doherty, Hon. J. Bueh, ex-Mayor Stewart, Lieut.-Col. Fisher, Ald. W. A. Lewis, Mayor Fulford, W. C. MacLaren, John M. Gill, T. J. Storey, Wm. Shearer and A. T. Wilgress.

Ovation for Mr. Graham. Mr. Graham, on rising to reply to the toast of "Our Guests" received a tremendous ovation. When the applause had subsided he proceeded with evident emotion, being deeply touched by a sense of the honor conferred upon him by his constituents.

Mr. Graham exchanged greeting with his friends and neighbors. "There are things in which we are all Canadians," he said. "We have a form of government that acknowledges no superior in this world. We enjoy a freedom in thought, word and action that tends to bring out the best that is creditable to Canada, and we are rapidly developing, being demanded by the very nature of our institutions, to bring even greater strength to this one of his majesty's greater dominions beyond the sea, in so doing will add to the already powerful influence of the British empire."

Transportation Question. Mr. Graham dealt with the transportation question, showing the expenditure that had been made in this young country in the construction of railways and canals, and the improvement of our waterways. He said he was not prepared to make any announcement as to policy, but was endeavoring to fully inform himself along certain lines and when once he was fully convinced of what ought to be done, if it were possible, he believed his colleagues would listen to his suggestions with a sympathetic ear.

Try Watson's Cough Drops. 647 WESTON. "Indignation" Meeting to Protest Against Council's Decision.

WESTON, Nov. 25.—The action of the town council in granting a three-year lease for municipal power and light to the Stark, T. L. and P. system of Toronto Junction, has caused resentment among some of the citizens, which has developed so much that it has been decided to hold an indignation meeting on Wednesday evening, to publicly disapprove of the council's action.

Rev. J. Hughes Jones to-night expressed the opinion that the Weston council acted altogether in a too arbitrary fashion in regard to the matter, and to go to work. "Before the overboard," said he, "they should at least have called a meeting of the ratepayers to get the general trend of public opinion on the matter. The council have gone and delivered the plant for three years over to an insolvent company, who are to pay only \$500 per annum for the use of the outside construction, while the town will have to pay the company \$50 per annum for each of the 22 street lights. Then the unpleasantness of the whole thing is that we are practically helpless in the matter. We may call half a dozen indignation meetings, but in the end we will have to abide by the council's decision."

Dr. Irwin, the reeve, says in explanation of the council's action: "The council is in favor of the hydro-electric power last January, and have been in touch with the commission all summer. The councilmen are as much in favor of hydro-electric power as any citizen or number of citizens in Weston. The hydro-power commission will not be supplying power for about two years yet, and the plant is even at present overloaded. There are applications for 200 additional lamps and two new arc lights, so that the present plant would not be adequate for the load."

"In view of the fact that Niagara power will be here in about two years, it would be folly to install new machinery and thus increase the capital account. This, in addition to the fact that the people are demanding a 24-hour service, and the manufacturers' additional power, seemed to be sufficient justification for the action of the council."

The franchise still remains intact and the Stark Company will, according to the terms of the by-law, renounce all rights in the town at the end of three years."

Beware the Bought Press

Continued From Page 1.

The change is not in all respects for the better, the unselfish interest which anyone can take in the affairs of others is a fixed quantity, or at least, is not capable of indefinite expansion, and when you spread it out broad, you also spread it out thin.

But for this loss there is more than compensation in the development of our sense of proportion and therefore their likeness to ourselves and, as a consequence, the universal application of underlying moral laws amidst all diversities of national or local custom or prejudice.

It is the existence of this common moral standard which qualifies the press for its highest and most useful function. A free press is a perpetual petition, it is, or it should be, always telling the government what the people wish and hope for and think right.

It must be noted, however, that the power of the press in this regard arises from the fact that it speaks, or is believed to speak, what everybody is saying at the time. As soon as a paper is recognized as "Somebody's organ," as expressing the views and wishes and opinions of any particular man or set of men, its helpful influence as a newspaper is gone. It may, indeed, have another kind of influence, for those who control or conduct it may be powerful men, but its editorial utterances are simply their "open letters."

In my judgment this is a matter of very serious and urgent concern to the American people to-day. Certain of our newspapers, including some whose influence within my memory, indeed, within but a comparatively few years, was a power, and a power for good, in the community are now firmly and widely believed to be virtually or even literally owned by well-known "interests," in other words, by wealthy men engaged in far-reaching enterprises. This widespread and very confident belief as to such ownership makes them virtually "trade organs" with but little more influence than the papers published avowedly as such, and what is even more unfortunate, it leads to a very general suspicion that other papers may be secretly in the same situation. The legitimate and salutary power of a newspaper lies-in its showing and being thought to show "the first thought" of the ordinary citizen on all matters of current public interest.

In showing this it does the community a double service, it gives shape and direction to public opinion and enormously increases the latter's force. The greater mass of mankind do not know what they really think until somebody tells them, they recognize their own opinions when these are expressed for them by another; then and only then are they ready to act.

It must be remembered in this connection that an editor is necessarily a politician, or, at all events, he ought to be one. Unless he has definite opinions on all questions of general public interest, and is ready to express them, he has no business to be an editor. Indeed, he is not an editor, but is only trying to pass himself off as one. In fact, an editor is a politician whether he wishes to be or no; if he will not speak on subjects connected with politics, his very silence is a way of dealing with them.

And if the editor wishes or pretends to wish for what we may call "purity" in politics, he is bound in consistency to show himself a pure politician. If his action or inaction, his speech or his silence be determined by the purpose to advance, not the public good, but his own private interest, then he is himself a "part" and a very disgusting and dangerous part, "of the thing to be reformed."

Reputable newspapers are careful lest what they publish as advertisements be confused with what they publish as news or comments. But it is just as much a fraud on the public to write something yourself which you are, directly or indirectly, paid to write and publish, and then publish this as a spontaneous expression of your sentiments, as it would be to publish in the like guise what somebody else has written.

This is one thing which the newspapers must do if they would be, in this field or in an other, an agency for good, and that is to think and feel the truth. The first duty of the press is to hold up before the people a faithful mirror; if it displays distorted pictures it falsely betrays its trust.

No worthy end was ever accomplished thru deception, whether of ourselves or others. If we are threatened by over-shadowing dangers, to escape them we must first see them and see them as they are. Americans can say with confidence, "We will know the truth and the truth shall make us free."

JAILED BANKER ENDS HIS LIFE

Disgrace More Than Ex-President of Brooklyn Bank Could Stand.

NEW YORK, Nov. 26.—Howard Maxwell, deposed president of the Borough Bank of Brooklyn, who was under indictment for grand larceny and forgery, and was last night released from jail on \$30,000 bail, committed suicide to-day. He cut his throat and left wrist with a razor and penknife in the bathroom at his home in Brooklyn, and died to-night at the Long Island College Hospital.

Maxwell, who was flogged up last Thursday had felt his humiliation keenly, and during his incarceration had appeared hopelessly despondent. He had, however, given his family no intimation, so far as known, that he contemplated making away with himself. His wife was prostrated by the tragedy, and was under the care of physicians to-night.

Maxwell was released late last night from Raymond-street jail, where he had been held a prisoner since the three indictments charging him with misdoings in connection with the management of the suspended Borough Bank were returned. There was some difficulty in obtaining bail and officers of the jail reported that Maxwell was gravely depressed. All yesterday and the day before he lay on his bed and appeared to be oblivious as to his surroundings. He declined to receive any visitors, except his wife and counsel.

Last night Justice Eurr signed an order for Maxwell's release, when bail to the amount of \$30,000 was furnished by Maxwell's four unmarried sisters, who offered their home as security for a \$10,000 bond; two friends who qualified in \$10,000; and a security company which gave a bond for \$10,000. Maxwell, in company with his counsel, O. Eland, was driven after his release to his residence at 132 Congress-street, where he was greeted by his wife and seven-year-old niece, Dorothy Doolittle. Maxwell spent this forenoon quietly at his home.

This afternoon he announced his intention of taking a bath and going for a walk. Shortly before 2 o'clock Maxwell, who was dressed in a bathrobe, heard a sound as if someone had fallen on the second floor. Hurrying upstairs she discovered the banker lying on the bathroom floor, half dressed, with gaping wounds in his throat and left wrist. On a washstand near by lay a razor, half open, and a penknife with blades open at each end and both covered with blood. As she turned to summon help, the maid stepped upon a second razor, which lay half open in the hallway leading to the bathroom. Maxwell was conscious and tried to articulate, but failed to make himself understood.

BEER BENEFITS THE WHOLE BODY

(NO OTHER FOOD-BEVERAGE DOES THAT MUCH)

NOT six people in a thousand (and those six have either diabetes or gouty tendencies) can get anything but real good from the use of good beer with their meals. Because that kind of beer (and no other kind is brewed in Ontario) benefits the whole body of the normal adult,—enriches the blood, vitalizes the stomach, makes kidneys and liver active, builds flesh and betters nerves.

Beer Is Not A Mere Tonic

Good Beer, drank with meals and at bedtime, is not merely a tonic—for a tonic simply gets one part of the system to work better for a while, by stimulating its activity, while beer, rightly used, does the whole system permanent good.

Beer Builds Up Thin Folks

That is why good beer is such a notable flesh-builder, and why it is so effective in changing the too-white blood of anemic people into the red, strong, healthy blood of the vigorous. It has qualities that are very valuable to women, especially. It is distinctly NOT an intoxicant, nor a hurtful stimulant. Ask your doctor if beer wouldn't be good for you as an item of daily diet.

* BEER is a term which covers lager, ale, porter and stout; and, in the practice of Ontario brewers, implies beverages made under most hygienic conditions from Ontario barley (the best in the world) malt, hops, and pure water.

It Is Presumption to Say You Haven't a Mind of Your Own,

yet that is what is practically said to you when you ask for an advertised article and are offered a substitute by a dealer. He would give you what you made up your mind you wanted, but for the fact that a substitute pays him a larger percentage of profit. Such a dealer's interest lies only in making as much money out of you as possible. The first-class dealer would have given you what you asked for, by that course admitting that you had a mind of your own and were capable of exercising it. Show the substitutor that you have a mind of your own by getting what you ask for.

CANADIAN BANKING SYSTEM

Is Eminently Satisfactory, Says The London Times.

LONDON, Nov. 26.—(C.A.P. Cable).—The Times editorially emphasizes the satisfactory condition of the finances of Canada compared with those of United States, and says our Canadian brothers are not much behind their neighbors in adventurous action in the sphere of industry and commerce. They have, however, been under the wholesome restraint of a sound banking system. The working of the Canadian banking system in time of difficulty is eminently satisfactory.
