ENORMOUS EXPORT OF PULP AND PAPER

Canadian Figures for Past Twelve Months Make a Remarkable Comparison.

Ottawa, Aug. 28.—(Special)—Trade figures clearly indicate the important part Canada's forest has in its exports. The wool, wood-pulp and paper production has grown to such an enormous extent as to almost overshadow any of our other industries. During the twelve months ending July 31 the total value of our exports of printing paper, other paper, unmanufactured wood, wood pulp and manufactured wood was \$256,689,448, as compared with \$132,028,878 for the twelve months ending July 31, 1918. FRENCH PEOPLE WORKING HARD

Remarkable Rehabilitation Carried Out in Former Devastated Regions.

CRUEL LIES TOLD

New York Man Shows How Rebuilding is Making Progress.

Mr. Houston writes: "The tale of rebuilding now to be added to Frenchmen's annals, will always be a chapter of achievement, almost as important and vital as the one which tells of the German invasion." By 1922, Mr. Houston asserts, France hopes to have her mines producing again, with about 8,000 miners working where 17,000 labored before the war. Within five or six years after that she expects to be working up to three-quarters of before-the-war production.

"The lie that France is not at work should be scoured on the lips of everyone who utters it," writes Mr. Houston. "If she is not at work, how can she be reclaiming her lands, rebuilding her roads and houses and factories and towns, and re-establishing the shattered life over one-fifth of her territory?" That she is doing that, anyone can see who visits France, or who takes the small trouble to look up the facts. And she is doing it before she has reclaimed her indemnity pledged to her by the peace treaty and repaid again and again by every one of her allies.
