THE WEATHER.

Probabilities:—Lower Lakes and Georgian Bay: Moderate south-west and west
winds; fine and continued very warm;
thunderstorms at many places by night,
turning a little cooler on Tuesday.

The Temperatures:—The highest and
lowest readings of the thermometer at the
Toronto Observatory on Sunday, July 4,
1897, were:—Highest, 94.5 above; lowest, 71
above.

HOT WEATHER.

Some of our oldest inhabitants inform us
that the heat yesterday exceeded anything
in their recollection for years. At all events
it was hot enough to suit even a Hottentot.
The thermometer in the shade reached nearly
100. At St. Paul's church, the thermometer
registered 80 at 7 o'clock p. m. The ex-
cessive heat continues to-day, but Old Probe
promises us cooler weather to-morrow. No
prostrations are reported.

A young woman named Maggie Degroat,
20 years of age, attempted to commit suicide
in Victoria Park, Brantford, by swallowing
morphine. She will probably recover.

wood for the summer.

Intending visitors to Muskoka need not
bother about supplies, as three supply boats
call daily at all principal points on the lake.

Mrs. Thos. Wood is improving in health
and there is no doubt but what she will
soon be fully restored.

Port Keyway post office was opened on
July 1st, and letters reach here in good
time if plainly addressed, Port Keyway,
Muskoka Lake, Ont.

LOCAL SPORTING MATTERS.

BASE BALL.

The baseball game at Norwich on Tues-
day is a disputed question, both sides claim-
ing the victory. The game proved to be a
long one, lasting till after dark. At the
end of the 8th inning Ingersoll was ahead
by 47 runs to 23, and as they could no longer
see, claimed the game. Norwich also
claimed the victory as Ingersoll would not
go on. The difficulty will have to be settled
by a game here.

A man named Sears was fined \$25.00 and
costs for picking some roses in the Horti-
cultural Gardens, Toronto, last week. If all
flower thieves were similarly treated the
practice would probably be discontinued.

new leader, will have the affair in hand and
that fact is assurance enough that the music

DOG DAY ADVICE.

With the advent of warm weather—late
in arriving though it has been—comes
promptly on time the usual gratuitous in-
formation how to keep cool and enjoy life
with the mercury a near neighbor to the
ninety mark, says the Guelph Herald. A
great deal of this well meaning advice is in
itself a needless waste of mental and phy-
sical energy. What is the use of telling the
250 or 300 lb. man how to keep cool—unless
he takes up his quarters in a refrigerator?
What is the use of pointing the imaginary
or genuine way to comfort the nervous, ex-
citable, fretty, always-on-the-move little
fellow? He works himself into a good
perspiration the coldest day in winter.
Why not let him sweat a bit now?

The truth of the matter is our dispositions,
physical constitutions and callings largely
decide what our temperature shall be these
warm days. It is needless to tell the fat
man to avoid foot racing. He doesn't feel
like it. It is likewise unnecessary to advise
the busy, perturbed, energetic, lean man
to take things easy. He is not built on
that plan. Do what we will, try as we
may, some of us, yes, most of us, will have
to mop up the perspiration and remark to
our neighbor that it is exceedingly hot.

All of us, however, can do this—and, by
the way, it is no doctor or scientist who
advises it. We can be careful in our diet;
eat the food that will best agree with us
this hot weather; avoid drinking much ice
water or stimulants; clothe ourselves as
lightly as possible, and keep on the shady
side of the street whenever we can.

Why roast over a wood stove when you
can get a good coal-oil or gasoline stove at
Robertson & McKay.
