Constitutional Democrats Will Present Resolution Calling for Resignation of Cabinet.

Both the Constitutional Democrats and the labor groups, in anticipation of its unsatisfactory tenor, drafted resolutions expressing lack of confidence in the government, which they are prepared to move as soon as the reading is finished.

The resolution of the Constitutional Democrats, which was adopted at a caucus this morning, is as follows:

"Inasmuch as the answer of the minister and representatives of the government contradicts the demand expressed in the address of the lower house of parliament, the party of the people's liberty (Constitutional Democrats) expresses complete distrust in the cabinet, desires its immediate resignation and proceeds with the order of the day."

The labor party's resolution is of similar purport, but is couched in stronger terms, demanding, instead of desiring, the dismissal of the cabinet and the formation of a responsible ministry from the parliamentary majority.

There could be no question, it was pointed out, of the abolition of the council of the Empire, or upper house, as that is an institution covered by the fundamental law and is beyond the competence of parliament.

Most important of all, the Premier declared that the basis for a solution of the agrarian problem proposed by the lower house was completely impossible. There could be no forced expropriation of land. He promised, however, the distribution of some of the appanges of state domains, and outlined a broad programme before popular education, the revision of the tax laws and the institution of political liberty.
