

IMPORTATION OF HORSES TO BE INCREASED

Department of Agriculture will Likely Bring Shipment of Percheron Mares from Scotland.

SHETLAND PONIES ARE BEING INQUIRED FOR

A Consignment May Be Arranged—Pure Bred Clydesdale Coming—Breed in Great Demand.

The foresight of the Commissioner of Agriculture in arranging last winter with a leading Canadian importer to bring a select shipment of young pure-bred Clydesdale mares to the Province is well shown by the exceeding scarcity of such animals throughout Canada.

"There never has been a time in the Province when it was so hard to buy a pure-bred mare of any kind, and this being true, it stands to reason that the breeders will for a year or two be compelled to put up with reduced incomes. Selling horses of one's own farm is a good deal like eating one's cake. One cannot sell them and keep them too. Once they are sold they produce foals and work for some one else, in some other locality, and new owners reap the benefit. History teaches that it is invariably poor policy to deplete the seed stock too greatly.

From inquiries made, there would seem to be some demand for Shetland ponies, and if parties wishing to purchase these ponies would communicate with the Department of Agriculture at Fredericton, it is probable arrangements could be made for a consignment of these useful, hardy little animals.

The Department would be glad to hear from agricultural societies or individuals needing mares or stallions so as to try and provide that a sufficient number to reasonably meet the demand of the Province might be brought.

FUNERAL OF MRS. HANNAY AT CAPITAL

Fredericton, Aug. 12.—The funeral of the late Mrs. Hannay, wife of Dr. James Hannay, took place from her late residence on Regent street, this afternoon, and was largely attended by sorrowing friends and relatives from this city and elsewhere, who gathered to pay their last respects.

At the house funeral services were conducted by Rev. Dr. Smith, and hymns were sung by a quartette from the Methodist church choir, there also being prayers and a hymn at the grave.

At the request of the deceased, friends in Fredericton were asked not to send flowers, but Col. H. H. McLean, M. P., and Mrs. McLean and Chief Kerr, with the exception of Mrs. Kerr, sent beautiful floral pieces from St. John as evidence of sympathy and affection.

The mourners included the following: Dr. James Hannay, Robert Ross, of Hampstead; W. A. Seelye, Oak Point; C. H. Climo, Halifax; John A. Bowes and Samuel Girvan, St. John; J. Howe Dickson, Judge Wilson, P. D. McKenale, Langford Good and others, of this city.

Interment was made at the Rural cemetery.

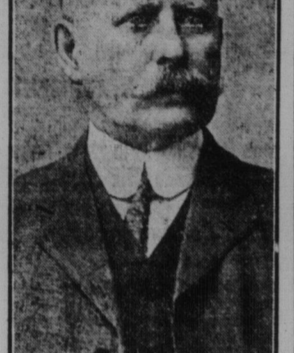

Funeral of Mrs. A. Lewis at Annapolis. Annapolis Royal, Aug. 12.—The funeral took place here this afternoon of one of the oldest and most respected citizens of Annapolis, in the person of Mrs. Adelbert Lewis, widow of the late Adelbert Lewis, who predeceased her many years. She is survived by seven sons and three daughters and several grand children.

MEETING OF ODDFELLOWS' GRAND LODGE

Nova Scotia Town Selected at Final Session Last Evening—Mr. S. Hooper, of Fredericton, New Grand Master—Question of Separate Jurisdictions for Provinces Deferred—New Constitution Adopted—Appropriation for Hall Held Over.

After three days of strenuous work, the Grand Lodge of the I. O. O. F. in the Maritime Provinces finished its labors shortly before 12 o'clock last night. The attendance at the lodge meetings taxed the capacity of the large room at Keith's theatre to the utmost. In some meetings as many as 300 ballots were cast. The grand officers showed the effects of the strain which they had undergone and were pretty well exhausted last evening. Great interest was taken in all the matters under discussion, and more than once the presiding officer was obliged to show his authority to keep things running smoothly.

The election of the officers yesterday morning resulted in few surprises. Mr. W. S. Hooper was elected Grand Master and Dr. A. D. Smith was promoted to the deputy's chair. Grand

Grand Master, Mr. W. S. Hooper, Fredericton.

Secretary McKinnon was given a contest but emerged with flying colors, as did Mr. J. A. Craig of Amherst, in the race for the grand warden's position. Yesterday's sessions were devoted to business of a private nature.

The afternoon session was a lively one, many important subjects being under consideration. The motion to give the provinces authority to apply for a dissolution of the Grand Lodge of the Maritime Provinces and the establishment of separate jurisdictions was warmly discussed. Finally the motion to allow the matter to remain pending for another year was carried without a division being called.

The appropriation for an Oddfellows hall was also held up for another year. The Grand Master was authorized to appoint a special committee of three to report on the matter at the next Grand Lodge.

The evening session was largely taken up by the adoption of the new constitution. The amendments were adopted as printed with few changes. The committees appointed to consider the reports of the officers submitted their report.

Truro Next Meeting Place. A number of towns had been proposed as the next meeting place of the Grand Lodge and at the evening session Truro finally carried the day, and the next session of the Grand Lodge will be held in the Nova Scotia town.

Before dispersion votes of thanks were moved by the visiting delegates to the St. John Oddfellows, and the mayor and citizens generally for the hospitable extension of their shoulders.

The elected and appointed officers were installed in office by the retiring Grand Master, and at 12 o'clock one of the most strenuous sessions of the Grand Lodge came to an end. At the close of the meeting, enthusiastic admirers of the Grand Secretary, John McKinnon, of Charlottetown, showed their appreciation by carrying him on their shoulders to his hotel. Hearty cheers were given for all the grand officers and to the delegates who dispersed to their homes. Very few left the city last evening. Some of the visitors will remain over for another day to enjoy the sights of the city.

Deputy District Grand Masters. The appointment of the Deputy Grand Masters of each district was reported as follows: Charlottetown—Charles Drew. St. John—Dr. A. D. Smith, D. G. M. Halifax—J. M. Donovan. Fredericton—Chas. A. Sampson, G. R.

Parrsboro—Rev. F. M. Young. Grandville Ferry—Rev. G. W. Whitman, G. Chap. Lunenburg—H. C. Dunlop. Moncton—W. H. Edgett. Amherst—Harry Davis. Chatham—Howard W. Pilger. Campbellton—Duncan Noble. Yarmouth—J. A. Craig, G. W. North Sydney—A. J. Copping, G. H. Kentville—Jas. H. Yould. Westport—Hubert Bowers. St. Stephen—L. M. Robinson. Lunenburg—J. E. Eisenhauser. Port La Tour—Sanford Slade. Alberton—Ramsay Hardy. Canoe—F. F. Ramsay. Old Bridgeport—Angus Phillipott. Wood's Harbor—Jeremiah V. Smith. Sherbrooke—John D. McDonald. Fort Hood—E. O. Leadbetter. Liverpool—J. S. Gardner. Marble Mountain—Lauchlin McLean. Sussex—W. H. Culbert.

Morning Session. The Grand Lodge resumed business at 10 o'clock yesterday morning. Outside of the passing of a few reports B. O'Neill, is at present at Lynn.

The whole session was taken up in the election of officers. For Grand Warden seven candidates entered the field, and the fight was a lively one. Two hundred and eighty representatives voted. It took three votes to decide the contest. Mr. J. A. Craig, of Yarmouth, N. S., won by 15 of a majority. For Grand Secretary, representatives Mr. Mersey, Halifax, Mr. Jas. A. Bayne, of Moncton, and Mr. J. J. McKinnon, who held the office last year, were the candidates. Mr. McKinnon won on the first ballot. For Grand Representative there was also a contest. The following were elected: Grand Master—W. S. Hooper, Fredericton.

Deputy Grand Master—Dr. A. D. Smith, St. John. Grand Warden—J. A. Craig, Yarmouth. Grand Secretary—J. J. McKinnon, Charlottetown, (re-elected).

Grand Treasurer—J. H. Balcom, Halifax, (re-elected). Grand Representative—L. R. Robinson, St. Stephen. Grand Chaplain—Rev. G. W. Whitman, Grandville Ferry, N. S. Grand Marshal—J. E. Wyatt, Summerside, P. E. I. Grand Conductor—J. I. Eisenhauser, Lunenburg, N. S. Grand Herald—A. J. Coppen, North Sydney. Grand Guardian—John D. McDonald, Sherbrooke, N. S.

There was no reconsideration of the resolution adopted Wednesday evening in the matter of representatives to grand lodge.

A pleasing feature of the proceedings in the morning was the parade in which the grand lodge officers were escorted from the Dufferin hotel to the convention hall by a detachment of the Patriarchs Militant, in which both the local canton and the visitors from Worcester were represented. The bright showy uniforms of the members brought forth many favorable comments.

Rebekah Assembly. The final meeting in connection with the Rebekah Assembly, was also held in the morning, when the Rebekah District Deputy Presidents' Association held their annual meeting. The meeting was held in honor of the president of the Rebekah Assembly, Mrs. Margaret S. Peters.

Encouraging reports were received and papers read as follows: Our Watchwords, Mary Matheson. Our Rebekah, Mary Matheson. Our Rebekah, Mary Matheson.

Encouraging reports were received and papers read as follows: Our Watchwords, Mary Matheson. Our Rebekah, Mary Matheson.

OPENINGS IN ARGENTINE REPUBLIC

Mr. Pedro Rene, of Buenos Ayres, Speaks of Trade Conditions and Gives some Figures.

MANUFACTURED PRODUCTS WANTED.

Is Visiting City to Get in Touch With Shippers and Gather Information—People Highly Civilized.

To secure closer trade connections between Canada and Argentina is the object of the visit here of Mr. Pedro Rene, one of the leading lumber importers in Buenos Ayres, who is staying at the Royal for a few days.

Mr. Rene is connected with the firm of R. A. & J. J. Williams Co., who take immense quantities of rough lumber into South America. Mr. Maurice J. Dukes of Philadelphia, vice president of the company, accompanies Mr. Rene.

"Few people," said Mr. Rene to a Standard reporter last evening, "have any idea of the importance of the Argentine Republic as a commercial country. Like Canada, it is a great wheat-growing country, and I am interested in Canada for that reason.

Some Large Figures. "Last year we exported 20,000,000 tons of wheat, principally to Europe, and 4,000,000 tons of oats to the United States alone. When you consider that the country is still in its infancy, you can form some idea of the future there is before us. We have a population of 7,000,000, the same as Canada. We had when it comes to large cities, we have 100,000 in Buenos Ayres alone.

"You, perhaps," Mr. Rene continued, "are more interested here in the exportation of lumber to Argentina. We import practically all the lumber used in a rough state. In one year the imports of spruce amounted to 150,000,000 feet. White pine is also exported to the amount of about 60,000,000 feet. We have done business with the United States, but we are looking more now to Canada.

"I came here to get in touch with the shippers, and to gather as much information as possible. There is a great opening in the Argentine Republic for manufactured products, as we have not many factories.

Highly Civilized. Mr. Rene also spoke of the enlightened condition of the people of the Argentine Republic. "As you exist," he said, "that we are savages, but I can assure you that we do not consider ourselves as such. On the contrary, the masses display a high degree of culture. We have compulsory education, advanced schools, and perfect religious freedom. Literature and art are cultivated, and the fame of our past presidents, Robison, Peters, Hebb and Boyer were also present.

The following officers were elected: Olive E. Lindow, St. Stephen, president. Mary A. Matheson, Springhill, vice-president. Mary A. Baker, Woodstock, secretary. Jessie Henry, St. Stephen, treasurer.

Work of Rafting is Now Completed. Log Driving Company Finish Up Season's Work—Work Done Will Contain 2,000,000 Feet—Totals to Date.

Fredericton, Aug. 12.—Rafting operations for the season at the St. John River Log Driving Company's boom have been completed and the only men the company now has working are at the Mitchell boom.

It is estimated that the next drive brought in by the corporation drive contractor, John S. Scott, will contain about two million feet and will be built in the time available it will take about three weeks to raft that amount.

The total amount estimated for this season's rafting was about 135 million feet. Mass., and is said to be endeavoring to secure shoemakers. One report is that shoes for the local factory are being cut at Haverhill, Mass. Supt. Russ left on the western train again last evening, presumably for Haverhill.

The strike has now been in progress for over two weeks and during that time the company have secured only two shoemakers to come here who have remained on the job. Somebody has complained to the officials of the C. B. E. asking that the strikers' pickets be not allowed to remain on the C. B. E. station platform during the day. The strikers have been notified of this effect.

PRESENCE OF GRAND FALLS POWER COMPANY

Further Technical Evidence Given at Hearing Before Commission Yesterday—Sir William Van Horn's Estimate Reduced by Other Witnesses—Mr. J. B. McRae, for New Company, Values Water Power at \$25,000 and Property at \$12,500.

The hearing in the matter of the expropriation proceedings at Grand Falls was continued yesterday before J. Norman Winslow, the commissioner appointed by the Provincial Government, with two new witnesses were examined, Mr. D. W. Jamieson and Mr. John B. McRae, mechanical and hydraulic engineers. The evidence was chiefly of a technical character, dealing with various phases of the power development at the falls.

A great difference of opinion as to the value of the property at the falls has been adduced from the evidence. Sir William Van Horn stated that the value of the rights at the falls in their present state is \$1,000,000, and the land and water privileges that were sought to be expropriated at from \$600,000 to \$700,000. Mr. A. C. Rice, at yesterday morning's session, valued the right mill property at \$200,000. Mr. McRae, a witness for the new company, in the afternoon placed a value of \$25,000 on the waterpower from the bridge to above the falls, and valued the property sought to be expropriated at \$12,500.

Mr. H. A. Powell, K. C., represented the Grand Falls Power Company and had associated with him Messrs. Barnhill, Ewing & Sanford. A. L. Shearer, of New York; J. B. McRae, chief engineer, and R. E. Lee and D. W. Jamieson, engineers, were also in attendance on behalf of the company. Col. H. H. McLean, K. C., and Mr. F. R. Taylor, K. C., represented the land owners in the case.

Mr. Taylor continued his cross-examination of Mr. McRae in the afternoon. "The gauge readings of last year were taken up. The witness said the water was lower in the St. John last year than in former years. Commencing April 1 last the gauge readings went under 220 a number of times. On April 1 the reading was 217; on Aug. 21, 218; on Aug. 21, 219; on Aug. 9 it was again below 220. At about 218 with a 54 ft. drop it could develop 20,000 horsepower. With a head of 130 feet and a gauge of 220 they would get 70,000 H. P. The lowest gauge reading for about 5 1/2 months was 216.

They were planning to have an effective maximum head of 136 feet. At that head the power would be slightly less. Last year 24,000 H. P. could have been developed under the conditions. A holding dam would have to be put in to get greater power. It is estimated that this dam would be 80,000 H. P. To do this it would be necessary to have a storage giving 8000 cubic feet per second. This storage would be obtained by building a dam on the Allegash River, Fish Lake and Temiscouata Lake.

Cost of the Dams. The dam at Lake Temiscouata would be built at the lower end. It would cost about \$20,000. He did not know what the damages would be from the flood. On Fish Lake the dam would be built at a cost of over \$20,000. The cost of the dam on the Allegash had not been determined. He knew of no dam, shown on the plan. He found rock where he sounded below that depth. He continued soundings down river to the government wing dam, shown on the plan. He found rock where he sounded below that depth. Soundings were made through the ice with iron pipe driven down. In soundings he cross-sectioned the river and sounded the centre of the river. He did not strike rock at that depth.
