

try and Mineralogy, Each candidate must on or before the 1st of March, 1892, send to the Registrar a thesis which must either furnish some evidence of originality, or show the nature of the original research which he proposes to undertake, with a complete historical sketch of the results which have been obtained by previous investigators, giving full references to the original papers. Upon the evidence of such thesis, a nomination will be made to the Commissioners for award of scholarship.

The Scholarship when awarded is tenable for two years, and may by special resolution of the Commissioners be extended to three years. The continuation, each year after the first, depends upon the work done in the previous year being satisfactory to the scientific committee appointed by the Commissioners. The scholarship when awarded is tenable in any University at home or abroad, or in some other institution to be approved of by the Commissioners. The holder must give an undertaking that he will wholly devote himself to the object of the scholarship (viz., the study of those branches of science, the extension of which is important for our national industries), and that he will not hold any position of emolument during its continuance.

The Years and honor departments to which the above-named Scholarships have been assigned are as follows :—
