Sentener.

The Court sentence the accused

Sentence

Have known McCloy since Feb 41 - He was in Gibraltar - was a cook - only trouble was when he hit the bottle - sense of responsibility but this was marred by alcohol which was easy to get in Gib. Was in hospital in ~~Spring~~ ^{May} of '42 with chronic gastritis - Prevalent diseases in Gib were gastritis & lung trouble. McCloy had anemia as well as gastritis - when he returned to England he cooked at CERU & then came to HQ, RCE where he has been an excellent workman.

Returned 5 mar to report in but unit were away on Spartan so he went back to London. Don't suggest this as an excuse but in mitigation - Request he be treated in view of his conduct sheet & have a medical board - was boarded B2 in Gib on a different ~~board~~ standard than is now used & it was never entered in his records.

Court closed to consider sentence.
