THURSDAY, FEBRUARY, 1890.

A CORRESPONDENT writing to the Ottawa Evening Journal on the 22nd ult., reproduced the following paragraph from the morning Government organ "In the Senate yesterday, the Hon. J. J. C. Abbott alluded, in feeling terms, to the death of Senator Trudel. He was followed by Senators Belrose and Ross. Out of respect to the memory of the deceased the Senate adjourned." It would seem from this that the only thing requisite to attain "honor" in this country (the Dominion of Canada) is to be a servile follower of a certain old gentleman away off in Rome. for God and for country. Everyone knows that Senator Trudel was opposed to British rule and British sentiment in Canada, why then should a British parliament do his memory honor ?- That's funny, isn't it? The correspondent gives the only answer possible, and then turns round and asks the question, why?

THE jubilee of the penny postal system brings to mind many interesting recollections. It has accomplished a vast revolution in our social and commercial system, the effects of which can hardly be realized. To show with what suspicion the English people regard sudden changes, and how slow they are to adopt radical reforms, it might be mentioned that THE ANGLO-SAXON.

Read the records made themselves felt-whether Clarendon or Runnymede or in 1688whenever their liberties were in question or their progress was hampered. climatic conditions have beyond question strongly influenced the characteristics of the race. How long they will retain these characteristics under other skies, and to what extent they will change in climates so different in all respects from England's as India's and Australia's cannot even yet be positively determined. It may be that in a few generations Anglo-India may become as languid and effete as the Mexicans. We hope not, and there is a virility in the Anglo-Saxon blood which renders that hope a reasonable one. In North America, at all events, the climate ought not to be, and is not, unfavorable to the development of a hardy people. The French have certainly not deteriorated in Canada, and they had a bad up. start as compared with the English-Canadian. "ecclesiastical oppression" is there in every direction in men's homes, in the schools, in the bulls of legislation, in ands upon thousands of these poor French Canadians silently departland where the year by year for does not sanction LAW, at any rate. The Superior of the these iniquities. Sulpicians declares his order to rank third among the financial institutions of the world. It is certainly the wealthiest of the religious orders in Canada, hat the Jeauits will not be long before they catch up. The latter have begun by extracting \$400,000, but we a flea-bite to what will be extracted from them directly and indirectly by that extremely religious confraternity. The money which in the English speaking provinces circulates in commerce, in the province of Quebec finds it way into the pockets of the black-robes, and is returned to the people under that head. Now, compare the action of the French and English under somewhat similar circumstances. The English agitated until the Clergy Reserves Act was passed; the French are passive under much greater burdens than those occasioned by the Clergy Re-

serves and are much less able to bear the strain. Were we right in our action or are they? There can hardly be a doubt upon the point. Is it not to us a remarkable fact--a fact without precedent even among the Latin racesthat among the whole of the French-Canadians there is not to be found one man to champion the cause of his opressed countrymen.

Meanwhile, although we are decidedly better off than our French-Canadian countrymen, we must not forget that apparent means of egress caused so there is much for us still to do-our own skirts are not too clean. We have allowed the Roman Catholic church to side, and the person who held the key exploit our political systems and purchase our politicians. There are special privileges to be obliterated. Our cumbersome and expensive systems of legisgreater economy in civil government is absolutely necessary. These are the urgent needs of the hour, and we sincerely trust that every Englishman in Canada is convinced in regard to them. If they are, there is hope for speedy reform, for with Englishmen action follows closely upon conviction.

> If traveler you'd rightly spell, The accent bids you use one l, It comes from tráv-el not tra-vél. With double l it rhymes with dweller And tráv-eler becomes tra-véller, Witness repél which gives repéller."

> > DR. LITTLEDALE DEAD.

Dr. Littledale's name has been a signal for contoversy for a whole generation. He always loved a fight. One of the most eloquent defenders in the Press of the Ritualistic movement, a Radical High Churchman of very pronounced views, he was always courting a fray. His learning was wide though his conclusions were sometimes rash, and he was always a doughty champion of the cause which he undertook. One of the best of his books was that which examined the claims of Rome. It mightily pleased the extreme Protestant party, and nobody will forget the effect upon Dr. Littledale of a letter which If you want a newspaper that advised him to read his own work in order to be secure against the wiles of the Jesuits. The writer of this invitation could not imagine that Dr. Little dale wrote his own book. There will be particular interest in Dr. Littledale's name for Ottawa readers on account of his having made some contribution to the controversey over the Jesuits at once and get a monthly Estates Act.

AT Forest Gate Industrial School, London, the other day a terrible fire occurred, when a dormitory was burnt out and 26 poor little lads lost their lives. The fire was due to the overheating of a stove pipe standing in the dormitory, but the absence of any many deaths. The door opening to the main building was locked from the outwas away on leave. The other door leading to the external dormitory stair case was also on the inside.

The errors into which the English papers often fall when telling of Canada or Canadian subjects are most laughable. The Daily Telegraph for instance refers to the adventures of a lad named, Alfred Gesling, who came with his parents to this country some months ago. Although only fourteen Alfred was sentimental enough to reflect the cynical philosopher's doctrine that "a man's fatherland is not where he is born, but where he is fed." Leaving the parental homestead, says the Daily Telegraph, "he tramped alone to Ontario, secured for himself a passage in the hold of a trading ship as a stowaway and was put ashore at Bristol, with little on his back, and nothing in his pockets." It would be interest ing to know how Alfred accomplished this process of "tramping to Ontario" and how he succeeded in boarding a ship when he got there. Ontario is spoken of as some little town indeed of a huge Province which could swallow up a great many England's in its depths.
