A Catalog that will benefit every farm home into which it goes

The U.G.G. Catalog for 1919 is not just "another catalog." It represents in a very concrete way the progress made by the Company that was organized and is owned and operated by, and for farmers in the three prairie provinces.

You will find that it pays to do business to whatever extent you can with the farmers' company. Doubtless you know already its grain service. Perhaps you have begun to take advantage of its

co-operative method of shipping livestock. Do not be content with selling through this company. Make use of it also to buy your machinery and supplies. The catalog shows you exactly how this company can be of service to you, and just what benefits you can derive from its organization.

As a farmer, you should not allow this opportunity to secure one of these catalogs to pass.
