MAS SARGENT,

## ROSSLAND WEEKLY MINER.

ROSSLAND, B. C., THURSDAY, MARCH 16, 1899.

Fourth Year, Number 3

Two Dollars a Year.

certain to be among the largest producers of ore. The McMillan Brothers are to be

Knob Hill and many other properties. \$30,000. "What struck me most," said Mr. Mac-What struck me most," said Mr. Mackintosh, "was the magnitude and richness of the mines. There are a large number that are already producing ore and when the railroad is finished there will be a large tonnage available immediately. I think the Boundary Creek country has the makings of a great mining country. There is certainly a great boom in the towns, but business is overdone. Lots are advancing rapidly in price in Greenwood. Lots on the main street in Greenwood are jumping sometimes \$100 to \$200 per, and \$12 in gold to the ton. One beauty of the formation in the vicinity of the Umatilla property is that it is not broken. Even at a depth of only a few feet it is solid. This is encoraging to miners, as when, they strike an ore body it is in place, and is not broken and fragmentary. to a normal condition the same as they have here, and they will then have plenty of producing mines, plenty of work for miners and others, and in short, it will be just like Rosland is at present.'

The Sailor Group Floated, The Sailor group of Camp McKinney has been floated on the Toronto market. There are five claims in the group. The properties aujoin the Cariboo and the Minnehaha. They have been developed by surface cuts and it is known to a certainty that they have extensions of the ore bodies of the Minnehaha and Cariboo. There are two shafts, one down 50 feet, and the other 40 feet. These shafts are suns on the ore bodies and assays of ore taken from the shafts give returns of varying richness, running from \$10 \$600 per ton. The syndicate which loating the property is a strong one and the treasury shares have been placed on the market at 15 cents. Fox & Ross are the Toronto brokers for the new comhandle its affairs in this city.

Rich Rambler-Cariboo Ore. the city from the Slocan. Mr. Adams re- equipped with cabins, blacksmith led soon. This will be the case, he expects, as soon as connections have been made between the different levels. This Hunter, directors; W. Archer, treasurer, will improve the facilities for getting out ore as well as give free circulation of air throughout the workings.

The Mines of Ymir.

John Dean, the real estate agent, returned yesterday from a visit to Ymir, which he reports to oe in a very lively condition. The output of precious and useful metals will be large this year. What is troubling that section at present is the lack of water. Take the Ymir mill as an example. At present only 20 of the 40 stamps are in operation. The other 20 stamps being hung up owing to a lack of water. The stamps of the Porto Rico mill are hung up for the same cause. A carload of ore is being shipped from the Black Cock mine each week. The ore is of a satisfactory character. The Dundee concentrating mill is in active operation. Work is making excellent progress on the Rio Grande property, which is controlled by Rossland people. Two shifts are employed on the Union Jack group and it is a promising property. There are a number of caim owners in Ymir who are waiting till the vicinity of Ymir is recognized as an important mining section and it is anticipated that the development this year will add several shippers to the list.

\*\*Mining Notes.\*\*

The Norway Mining company has sold all its stock that it placed on the market. This puts the company in good shape financially. The company expects to begin

This puts the company in good shape financially. The company expects to begin work on its properties as soon as the snow will permit. It is anticipated that there will be considerable of a showing from the Norway mountain section dur-

S. F. Griswold, accompanied by W. F. Griswold, arrived in the city on Sunday evening from Norway mountain, where he has been superintending work on the Crisolite group, which adjoins the prop-erties of the Norway Mountain Gold Mining company's properties. Mr. Griswold reports very encouraging development on the claims of the Crisolite group and feels that there is more than one mine among them. Mr. Griswold will leave for Norway mountain today. while here he had some of the Crisolite ore assayed and it goes over \$30 to the ton.

A. H. Word of Montreal, is at the

This is One of the Rich Properties of the Boundary.

THE PRICE IS \$80,000

There is Considerable Activity in the Vicinity of Ymir—The Output of the Rambler-Cariboo to be Doubled Soon. The Boundary is Booming.

It is understood that the noted Snow shoe property in the Greenwood camp, was bonded yesterday to Messrs. McMillan Brothers of this city. Considerable development work has already been done on the property, and although the terms are withheld it is believed the bond is for \$80,000. The Snowshoe is one of the best properties in the Greenwood camp and is certain to be among the largest producers of ore. The McMillan Brothers are to be congratulated on securing so promising a special property of the ore from No. 2 is a special property of the ore from No. 2 is about a third of the ore from No. 2 is a special property in the Greenwood camp and is certain to be among the largest producers of ore. The McMillan Brothers are to be congratulated on securing so promising a property.

Rich Boundary Country.

Harry Mackintosh of the Hoffman house, has returned from a visit to the Boundary Creek country. He visited the Winnipeg mine, and while he did not enter the workings he saw lots of rich-looking ore on the dump. He also visited the Mother Lode, the Old Ironsides, the Knob Hill and many other properties.

A Strike on the Umatilla.

SUBSCRIBED

Waneta & Trail Creek Mining Co. Sells 50,000 Shares.

Application Made For More-It Is Said That a Montreal Syndicate Has Purchased the Republic

The directors of the Waneta & Traff Creek Gold Mining company, of which D. D. Birks is secretary, recently issued a circular to the shareholders offering 50,000 treasury shares to enable the company to resume work on their properties on the south slope of Lookout mountain. The response was more than satisfactory inasmuch as 63,000 shares were applied for. At the meeting of directors held yesterday it was decided to make arrangements for the immediate resumption of work. The company owns three W. H. Adams, secretary of the kam-crown granted properties about six miles ler and Cariboo Mining company, is in southeast of Rossland. They are fully ports that the properties of the company tools, etc., and have now the funds in are looking well and that they are now hand necessary for some time to come. yielding from six to seven carloads per There is about 70 feet of work done on month of ore. Lie net returns from each the claims and a good quality of copper carloads are about from \$1,500 to \$1,800. and galena ore has been encountered in Mr. Adams said it is expected that the output will be doubled and perhaps trebofficers are: C. O. Lalonde, president;

and D. D. Birks, secretary.

The Camp Promises to Make a Second Republic.

PLEASANT TRIP PLANNED. Sanators and Congressmen Invited to Inspect Central American Canals.
Washington, D. C., March 15.—About 60 senators and representatives have een invited for a trip which has been planned to inspect the routes of the proposed Nicaraguan and Panama cano's coming home by way of Santiago and other points of interest in the West Indies. They will go as the guests of the

sau from New York about March 23 and from Mobile April 1. W. H. Bell returned yesterday from a visit to the Boundary Creek country, and is understood to have made some importment investments in Greenwood.

Olaf Jeldness returned yesterday from a visit to Spokane.

H. G. Wilson of Victoria, is at the Allan.

Panama Canal company. The party will have an ocean steamer to itself and will

pated by everyone in this section. The great results already obtained in mineral development has attracted wide attention, not only in Eastern Canada and the United States, but in the Old Country as well. The work of the past two or three years is beginning to be understood and appreciated, and with increased transportation facilities, business is everywhere increase facilities, business is everywhere increasing by leaps and bounds. The Boundary section is receiving a large share of attention, and this coming summer promises to realize for this district the recognition it has so long looked for. Below will be found items of interest from the several camps mentioned:

A representative of the Cascade Record has been going through the district recently, and he reports that the Boundary country is now experiencing one of the greatest booms that ever visited British Columbia. Properties that were considered mere prospects a few months ago, are now being turned over at handsome figures. In many ways it is Rossland all over again. The certainty of railway transportation in the near future is one of the chief cause of the present move.

In Grand Forks the merchants were busy, and the many interested in a mineral way up the North Fork or elsewhere, had the same confidence of years ago in the possibilities of the contiguous territory, which, by the way, are rapidly being proved up. More attention than ever before is being paid to mines at the Forks, and its people are investing judiciously.

At Columbia a great deal of activity was noticeable, and while the bright little town is still young, yet its enthusiastic promoters are wise enough to see that it is the surrounding mining area on which its permanences must be built. Consequently, they are devoting attention to this, and are showing their faith by their works, by putting money into promising properties. But at the present time it is BOUNDARY COUNTRY. quently, they are devoting attention to this, and are showing their faith by their works, by putting money into promising properties. But at the present time it is probable that no other place in Southern British Columbia is attracting the same attention that Greenwood enjoys today. The town is growing fast, and one meets all sorts and conditions of people there, from the ordinary fakir and gambler that infests every booming mining camp, to the investor who has a plethoric pocket book. Of course everybody was full of business, all having been attracted thither by the stries of the richness and immensity of the ore bodies of such properties as the Old Ironsides, Knob Hill, Mother Lode, Winnipeg, Golden Crown, Brooklyn, Stemwinder, and dozens of others too numerous to mention here—all of which are now working, and which will undoubtedly be dividend-payers in the immediate future. It was a poor day when one or more mining deals, ranging from a few hundred to several hundred thousand dollars was not consummated. Of course everyone was full of business and the great majority were making money.

While the interest now is in the city

consumpated. Of course examplority were making money.

While the interest now is in the city of Greenwood itself, it must be rememented that these pot into any different camps, some of which are situated some miles away, but which for the present, largely look to Greenwood as headquarters, Largely look to Greenwood the Camps, Central camp, and others, Largely look to Greenwood the Camps, Central camps, and others, Largely look to Greenwood the Camps, and the Camps of the Camps, and the Camps of the Camps of the Camps of the Camps, and the Camps of the Cam

Four carloads of ore from the St. Eugene

Four carloads of ore from the St. Eugene mine, near Moyie, were brought to Nelson recently, and shipped to the Trail smelter. On the Jennie mine, near Fort Steele, a strike of two feet of clean copper ore, giving high values, was made last week. This should be good news for the Hall Mines smelter, but Fort Steele is on the line of the Crow's Nest Pass railway, and all ore shipments over that road must go to the Canadian Pacific smelter at Trail.

It is reported that the British America eorporation will shortly commence development work on the Watson group, near Elko, in East Kootenay. Considerable work was done on the property last summer under a working bond by the British America corporation, who have recently rebonded it.

Harry Cummins, provincial land surveyor, has just returned from the Windermere district, where he has been surveying some claims. He speaks very favorably of that district, and says that he looks for a good movement there this year. The Dolphine, owned by Rempton & Stock, looks well. Haupt & Mathers have bonded their claim to Collett & Starboard. The Swansea has been bonded for \$125,000. It has a big showing of copper glance. The Canal claim, of which Contractor Cass is one of the owners, is in good condition.

Ore shipments from Moyie for the month of February amounted to 3/0 tons, says the Moyie Leader. The St. Eugene contributed 240 tons of this amount, and the Lake Shore came up with the balance of 130 tons. The aggregate value of the 370 tons of ore is in the neighborhood of \$27,010, taking as a basis the returns from the five carloads of Lake Shore ore which run \$73 to the ton. This means that nearly \$1,000 in ore values left Moyie each day during the month of February. The sleighing now is excellent, and three teams are hauling on an average 25 tons of ore a day from the St. Eugene mine, and if the sleighing holds out, the shipments from Moyie for the month of March will be more than double those of February. Nine carloads, or 192 tons, from the St. Eugene left for the smelter last

SNOWSHOE BONDED

It Will Shut Down Temporarily for Water.

WANT TO JOIN THE U. S. Inhabitants of the Leeward Islands

Wants the Star and Stripes. New York, March 15.—In a letter to the Herald today, Andrew Munro, a small specks. The percentage of copper member of the legislative council of the Leeward islands states that a memorial are at work, and this force will be increased as the exigencies of the case de-Christopher-Nerise, in the West Indies, has been forwarded to the Right Hon.

Joseph Chamberlain, the secretary of Mrs. White, Mrs. J. O'Connell, Miss. White, Mrs. J. O'Connell, Miss. Carpeter, Alsigned by the leading inhabitants of Fort state for the British colonies, asking the mother country to transfer the islands to the United States. The memorial complains bitterly of the indifference of the crown to the interests of the island. All of the colonists, without exception, join in a petition for negotiations between the two countries for the annexing of the Leeward islands to the united States.

Tired of Paying Seven Per Cent. The directors of the White House Trading company have become tired of paying seven per cent to insure their stock against fire and propose reducing it greatly, as will be seen by their advertisement which appears on the last page of this of which A. B. Mackenzie of this city is

pose of acquiring and developing the

the ore bodies of such properties as the Old Ironsides, Knob Hill, Mother Lode, Winnipeg, Golden Crown, Brooklyn, Stemwinder, and dozens of others too numerous to mention here—all of which are now working, and which will undoubtedly be dividend-payers in the immediate future. The dip of the lode is very slight; it

might almost be called vertical.'

The company is capitalized for \$1,500,-000, with \$450,000 in the treasury.

The promoter stock is held by the three original owners and is not for sale. Officers of the company are W. L. Lowry of Rossland, president and manager; W. A. Potter, Peoria, Ill., vice-president; Alfred McMillan, Rossland, secretary-treasury; J. B. McArthur and P. C. Me-Arthur, directors. might almost be called vertical

Arthur, directors.
Mr. Lowry, the president and manager, has had a good deal of experience in mining in the Rossland and Slocan mining in the Rossland and Slocan camps. He is enthusiastic about the property and is convinced that the large ledge traversing the entire length of the company's property is the main ledge on the famous Red mountain, and that it can be plainly traced from the south side directly over the summit of the mountain across the property and for mountain across the property and for several miles farther to the north. Mr. Lowry also believes in deep mining, and the shaft now being sunk under his direction is going down on the ledge, following the wall all the way. The assays obtained from the workings from time to time run all the way from \$1 to \$36, all in gold values. One sample obtained by the late Mr. Langham-

mer, taken at a considerable depth, showed \$14.90 in gold. Copper is now coming in at a depth of 140 feet, some of the ere recently brought up having traces of native copper. Lately considerable native copper is coming in to the ore in the shape of

The Dundee Shaft House Fire. Additional particulars concerning the burning of the Dundee shaft house were received yesterday. The cause of the fire is unknown. The men came of shift at 5 o'clock in the morning and
