"Building the weather out is fully
as important as maintaining a fire in
the furnace. In the old days when
we scorched our faces and froze our
backs at the open fireplace, we went
shivering to bed and breathed icicles
on the coverlid.

"We have learned to plaster our
houses inside and out, but in frame
construction we have always had dif-
ficulty through expansion and con-
traction of preventing the plaster
from cracking and scaling off.

"But the introduction of triangular
steel reinforcement and the improve-
ment of outside plasters has correct-
ed this evil and a house now could be
tumbled end over end and its plas-
tered walls remain intact," says Mr.
R. S. Rider, president, Canadian Steel
& Wire Co.

"Another feature is that reinforced
stucco never has to be painted, which
is something every home owner will
appreciate."
