BRONCHITIC SUFFERERS Act foolishly. If they improve ever so little when the fine weather comes, they relax effort and drift back into the old condition which if possible, become more chronic. Hit Bronchitis hard in the summer and you'll get rid of it and drive it right out of the system. In winter it is almost impossible to do this. Inhale Catarrhose regularly, it's a dead sure thing on Bronchitis. It goes into the most minute air cells of the lungs, bathes all parts of the bronchial tubes with its healing, germ destroying vapor, and cures every time. Highly endorsed by all competent druggists and doctors, 25c. and \$1.00.

Troopers Chesley and Venning returned to the city from South Africa last Wednesday and were welcomed by Ex mayor bears and a large body of citizens and Knights Templar with a good deal of enthusiasm.

The city for several days has worn a holiday look on account of the presence of the Knights Templar, as courtly and affable an assembly of gentlemen as one could wish to see. Their brethren in the city spared no effort to make their sojourn and the sojourn of their ladies enjoyable, and will long remember the occasion as one of the pleasantest in their lives.

An Oxford professor was giving his pupils a lecture on Scotland and the Scots. These hardy men, he said, think nothing about swimming across the Tay three times every morning before breakfast.

Suddenly a loud burst of laughter came from the centre of the hall, and the professor, amazed at the idea of any one daring to interrupt him in the middle of his lecture, angrily asked the offender what he meant by such conduct. I was thinking, sir, replied the individual, that the poor Scotch chaps would find themselves on the wrong side for their clothes when they landed.
