Mme. de Lamballe's devotion was so true she at once hastened back to Paris to be with the queen. Her friends urged and implored her to think of the danger to herself and pointed out that she could be of no real service at such a critical time. But she knew better than they did what a comfort her presence would be, and her heart was entirely occupied with the sorrows of her sovereign. She was allowed to become a prisoner with the royal family in the temple and for one week she was a cheerfu and helpful companion, full of affectionate arts to make the hours less bitter and giving to Marie Antoinette the loving, devoted care that only a friend so loval could give.

Anne was out of sorts all day. Her painting class did badly, her head ached, and she tore her walking skirt by stepping upon it in her hurry to take a car. Tired and utterly forlorn, she was sitting in her room trying to repair the skirt when Maisie came running upstairs and entered panting with her haste.

"Oh, Anne," she gasped, "there's man in the parlor waiting to see you! I told him you'd be right down." A man in the parlor to see Anne was almost an unheard of thing. Yet she took three stitches deliberately.

"Aren't you going to fix your hair or or anything?" Maisie demanded. "Why should I?" Anne said. "It is only some one to see about lessons probably." The parlor door was open, and she

went in softly. The man was waiting with his expectant face turned toward her. She gave him one glance and turned as white as her linen collar. "Dwight - Dwight Marshall!" she

said. Then she seemed to remember nothing more until she found herself on the sofa, with him close beside her. "You never expected to see me again, did you?" he demanded. "And I didn't expect you would, but ever since my little cousin, Mand Warne, has lived here she and Dave have been teasing me to come and make them a visit, So I made up my mind I'd come. Peculiarities of Crime. One of the strangest peculiarities of human nature is its inclination to imitate the misdeeds of others. Crime is epidemical. A particularly dreadful murder, the details of which are set forth in all the newspapers, often has the effect of inducing similar crimes. One of the reasons and probably the chief reason why public executions were abolished in England was that instead of acting as a deterrent the execution had the contrary effect of inciting to murder.

Some years ago a woman of Geneva. named Lombardi, killed her four children. She admitted that she had been reading of a woman who killed her husband, and the very circumstantial account had made her wish to imitate dead she killed the children. This is which have come to our notice.

Summoned to attend his master's constant fits of depression. Citois would solemnly call for a sheet of paper on which to write a prescription, and almost invariably after his departure the prescription would prove to consist of the words "One dram of Boisrobert." Boisrobert being a poet of small talent, but nos sessed of high spirits and wit. In those days, when the common remedy was bleeding, when it is known that Volture, the poet, was bled to death and the Princess of Conti, suffering from apoplexy, was beaten till she died in the hope of rousing her from

her lethargy, it is no wonder that a

humane and a human physician like

Citois should have been successful. The famous frequenter of the French salons, Fontenelle, is, however, the best example of the power of the spirit in retaining life. At the age of ninetyfive he fell when picking up a lady's handkerchief and made the historic remark, "Ah, que je n'ai pas encore any time you are ready. Dick's all mes quatre-vingits ans." All flower beds should at this season of the year be kept in proper shape and condition. All seed pods and withered and yellow leaves should be carefully cleaned and picked off. Frequent stirring with the hoe is good, but not deep enough to in any way injure the roots. It is a good idea every time you mow the grass to take a sharp spade and cut the edge of all your flower beds. It keeps the grass from encroaching on the beds and also keeps the beds in their proper shape and form and makes them have a fresh and neat appearance.

By August many of the soft growing foliage bedding plants, such as coleus, alternantheras achryanthus, etc., will be growing freely and should be kept cut back and not alpretty, beds having plants of this kind should be uniform. The various colors should not be allowed to intermingle. Golden colored plants should not have red foliage ones sticking their shoots up through the yellow, etc. This is easily prevented by con-stantly pinching. The main point is stantly pinching. to commence pinching early and take the tip out of the young growth. In this way you can scarcely see that the work is going on. If, however, you neglect them until the plants are

these two varieties existed, black and green were made indifferently from all the long straw before using, and if the manure is in large pieces chop ing is very simple. All you want to do is to spread the manure over the bed carefully to the depth of about

one inch.

How often flower beds in the ope air should be watered depends to a great extent upon the character of soil is good stiff loam and you have frequent showers you do not need to water at all. If it is sandy, as near the coast, and the weather dry it is beneficial to water every day. Geraniums seldom need watering when growing in good garden soil. With much water they grow too much to foliage. Cannas and plants of this
