SCIENTISTS AT WINNIPEG.

Distinguished Men From Britain and the U.S.

Sir J. J. Thomson Delivers President's Address.

Discovery of Radium Has Opened Up a New World.

Winnipeg, Aug. 25 .- A hearty wel come was extended to members of the British Association for the Advance ment of Science, who began their seventy-seventh annual meeting here to The attendance of members Great Britain was large, considering the distance, and includes present day in the world of science. Canada and the United States are also well represented.

The opening session was held to-night in the Walker Theatre, and that building never contained an assemblage of men and women more representative of the higher life of the community. THE PRESIDENT'S ADDRESS.

Some of the wonderful advances made in physical science during recent years were revealed by the president of the association, Prof. Sir J. J. Thomson, in his opening address. Prof. Thomson dealt chiefly with recent discoveries in regard to radio activity, and the revo-lutions in methods and results which

ittions in methods and results which they are likely to cause.

"Twenty-five years ago," he said in opening, "a great change was made in the practice of the British Association. This year for the third time in a cuertar of a contraction.

opening, "a great change was made in the practice of the British Association. This year for the third time in a quarter of a century we were meeting in Canada. The period which has elapsed since the association last met in Canada has been one of almost unparalleled activity in many branches of physics, and many new and unsuspected properties of matter and electricity have been discovered. The history of this period affords a remarkable illustration of the effect which may be produced by a single discovery; for.-it is, I think, to the discovery of the Rontgen rays that we owe the rapidity of the progress which has recently been made in physics.

It was by the Rontgen rays that rudio activity was brought to light, the discovery and investigation of which Prof. Thompson regarded as one of the most important and interesting advances ever made in Canada, and in which Canada had taken a conspicuous part. It had been found that certain substances, chief of which was radium, radiated large amounts of energy, one gramme of radium developing nearly as much energy as would be produced by the burning of a ton of coal.

"The properties of radium," he said, "nave consequences of enormous importance to the geologist as well as the physicist or chemist: in fact, the discovery of these properties has entirely altered the aspect of one of the most interesting geological problems, that of the age of the earth. Before the discovery of radium it was supposed that the supplies of heat furnished by chemical changes going on in the earth were quite insignificant, and that there was nothing to replace the heat which flows from the hot interior of the earth first solidified it only possessed a certain sount of capital in the form of heat, and if it is continually spending this capital and not gaining any fresh heat it is evident that the process could not have been going on for more than a certain number of years, otherwise the earth would have been colder than it is.

more than a certain number of years, otherwise the earth would have been colder than it is.

"The physiological and medical properties of the rays emitted by radium is a field of research in which conough has already been done to justify the lope that it may lead to considerable sileviation of human suffering. Its eems quite definitely established that for some diseases, notably rodent ulcer, treatment with these rays has produced remarkable cures; it is imperative, lest we should be passing over a means of saving life and health, that the subject should be investigated in a much more systematic and extensive manner than there has yet been either time or material for. Redium is, however, so costly that few hospitals could afford to undertake pioneering work of 12.5 kind fortunately, however, through the generosity of Sir Ernest Cassel and Lord livesgh, a radium institute, under the patronage of His Majesty the King, has been founded for the study of the medical properties of radium, and for the treatment of patients suffering from diseases for which radium is beneficia.

"The new discoveries made in physics in the last few years, and the ideas and potentialities suggested by them, have had an effect upon the workers in that subject akin to that produced in literature by the Renaissance. Enthusiassus has been quickened, and there is a hopeful, youthful, perhaps exuberant, spirit abroad which leads men to make with confidence experiments which would have been thought fantastic twenty years ago. It has quite dispelled the pessimistic feeling, not uncommon at that time, that all the interesting things had been discoveed. The sum of knowledge is at present, at any rate, a diverging, not a converging, series, and beauty, but we do not see our goal, we do not see the horizon. In the distance tower still higher peaks, which will wider prospects, and deepen the feeling, whose truth is emphasized by every and the feeling and antiseptic qualities, superior to the talluration of the supplied to the condition of the supplie

vance in science, that 'Great are the

works of the Lord."

Mayor Evans expressed appreciation of the honor done to Winnipeg in acceptance of the invitation by the association, saying that the people of this city were sens ble of the supreme importance of the vork for which the association stood. On their behalf, he bade the visitors welcome.

The Mayor was followed by Lord Stratheona, whose brief address was received with loud chers. His Lordship recalled the meeting in Montreal, and said he was sure there were not there at that time ten, or five, or perhaps even one member who for a moment supposed that it was possible a meeting would be held here in Winnipeg of the British Association. But for the efforts of science and engineering, he asked what would this country be? The object lesson of the progress made in Winnipeg and the west generally would go out through the association to the knowledge of the outside world as it could in no other way. Lord Stratheona closed by assuring the President and members of a cordial welcome to Winnipeg and western Canada.

Sir J. J. Thomson replied in a neat little speech, and the proceedings then terminated.

DIS DE BAR.

That Notorious Weman Appears in New York.

New York, Aug. 25 .- About a month ago a tall, good-looking young woman named Mrs. Lillian Hobart French, who had been living at the Waldorf, took the old fashioned brown stone house at the old fashioned brown stone house at 32 East Thirty-third street, and fastened two gilt tinsel stars to the plate glass of the street doors, and added a copper sign, which said that herein was the Mahatma Institute of New York. Then Mrs. French fitted up the house, and decorated the top of the piano with the photograph of one of her friends. and decorated the top of the piano with the photograph of one of her friends, Mr. F. Augustus Heinze, the copper magnate. She engaged as part of her teaching staff a Persian philosopher called Professor Yojana; an elderly woman servant, of the occult who said she was Mme. A-Diva, and a friend of this savant, who was known to the youthful Mrs. French (who is president of the institute) merely as "David."

But to-day it was learned, unfortunately, that the bright-spoken Mme. A-Diva, who already had begun to give, according to the institute's litearture, "financial, social, domestic and spiritual advice," is no other than the notorious Mme. Dis de Bar, who years ago fleeced the late Luther R. Marsh, some time the legal associate of Daniel Webster, out of a fortune by selling him alleged spook pictures, who served a term of amost eleven rease; in England for all.

out of a fortune by selling him alleged spook pictures, who served a term of amost eleven years in England for obtaining money under false pretences; and who was last heard of in April, 1907, when she and Dr. David Livingston Mackay, the son of a Scotch minister, fled from Windsor for reasons of their own.

their own.

As a result of this, reporters went to Mrs. French early to-day, and told the tall president of the school of the occult just about to open at 32 East Thirty-third street, who the A-Diva was. Mrs. French was surprised, and she and Mrs. French was surprised, and she and her sister vehemently asserted that they did not know he was the notorious Dis de Bar. When Mrs. French found out who the madame and David were, they were asked to leave, and immediately disappeared.

POSTAL SAVINGS BANKS

Taft Will Urge Establishment in Next Message to Congress.

Beverley, Mass., Aug. 25.—President Taft indicated in talks with callers to-day that in his message to Con-gress next December he will strongly gress next December he will strongly urge the early establishment of a postal savings bank system. The President realizes that there is strong opposition to such legislation at this time, and while he does not propose to rush Congress on too many matters at once, he will ask that the platform declaration of the Republican party in favor of postal banks be fulfilled as speedily as possible.

President Taft believes that several hundreds of millions would be placed.

TWO OLD TIMERS.

LORD STRATHCONA MEETS MR. HILL AT WINNIPEG.

Two Former Associates in Providing Transportation Facilities for the West-Speeches at the Canadian

Winnipeg, Aug. 25.-Winnipeg was privileged to-day to witness what may be properly regarded as an event o historical interest, when two famous men, overpowering figures in the world of finance, commerce and transportation, who have been closely iden-

world of finance, commerce and transportation, who have been closely identified with the beginning of development and prosperity in northwestern America on both sides of the boundary, and who have been associated with this development and with each other for over forty years, met here. These were Lord Strathcona and his friend and business associate, James J. Hill, forner President and creator of the Great Northern Railway System.

Mr. Hill came north on a special train upon the invitation of the Canadian Club to attend the luncheon tendered to Lord Strathcona to-day, and the meeting of these two remarkable men, after years of separation, on the steps of the City Hall, where each grasped the other's hand with the warmth and enthusiasm of youth, was impressive and indicative of a life-long friendship. Lord Strathcona had gone there to receive an address of welcome, prepared on behalf of the city, and as soon as the special train arrived Mr. Hill was driven over, so that they met in full view of the thousands gathered for the ceremony.

Afterwards he and Mr. Hill held a

the thousands gaussies and the commony.

Afterwards he and Mr. Hill held a short informal reception in the City Hall, where their friends of many years ago met them to renew acquaintanceship. They then proceeded to the luncheon, where a thousand members of the Canadian Club had assembled to receive them. After the luncheon Lord Strathcona spoke at considerable length upon his connections are considerable length upon his connections. luncheon Lord Strathcona spoke at considerable length upon his connections with the upbuilding of the west and his delight that his unfaltering confidence in this country, dating for half a century, is being amply justified. His Lordship was also delightfully reminiscent at times, and recounted his associations with Mr. Hill and others in the early transportation projects, which since lawe developed into such powerful corporations. His speech was a historical review

SUNBURN. BLISTERS. SORE FEET Zam-Buk best for these. Let it give YOU ease and comfort. am-Buk

of the settlement of the west during the past fifty years.

Mr. Hill also spoke at considerable length, culogizing Lord Stratheona as the man who had done more for the development of Canada than any other man who had been connected with it publicly, or who is likely to be for many years to come. He commended the enterprise and activity of Canadians, and advised that they should confine their efforts to securing desirable settlers rather than quantity and numbers. Population must come here, because there is no longer any other place where it can go. Mr. Hill concluded by moving a vote of thanks to Lord Strathcona, on behalf of himself and western America, for the efforts he had put forth to further its interests and to make development possible.

RIOTERS SENTENCED.

Four Fort William Men Sent to Central Prison.

Port Arthur, Aug. 25 .- Convicted of iotous and disorderly conduct in con riotous and disorderly conduct in connection with the recent strike trouble
at Fort William, four men were this
afternoon sentenced to the Central
Prison by Judge McKay, as follows;
Toni Panagroles, seven months; John
Delarbs, seven months; Charles Arank,
nine months, and Thos. Timber, seven
months. All were convicted on evidence of the police, who identified
them as in the crowd of rioters on
the day the shooting was done. Crown
Attorney Langworthy prosecuted;
Messrs. Cole and Swinburne defended.

Many who address God as the all wise evidently think he would know nothing but for the information conveyed in their

Home Despoiler Locks Lips When Husband Seeks Wife and Baby.

one seen the woman or the baby who are shown in this nicture? Robert T. Perdue would give all the money he has

Perdue would give all the money he has in the world to know.

The woman is now a little past 40, the baby is a grown woman of 25. For the pictures were taken 22 years ago.

It's a 22-year-old tragedy in the life of Robert Perdue—a tragedy which time has never softened for him. It's a parallel in real life of the pathetic theme of the "Music Master."

In the common jail at Upper Sandusky is the man who, Perdue says, stole his girl-wife and his baby 22 years ago. But Wilbert Stillwell, the prisoner, was alone when he was arrested. And he won't tell what has become of the woman nor the little girl.

In the hearing in court here, Perdue had to sit and listen to witnesses testifying how Stillwell had boasted of his conquest.

"Sure L took them away" the witness.

conquest.

"Sure I took them away," the witnesses said Stillwell proclaimed, "I took Mrs. Perdue away from her husband because I was a better man than he was, because I was slicker. And I'd do it again."

WHERE IS THE WIFE? WHERE IS THE WIFE?
But when the court asked Stillwell
what he had done with the wife and
child, he refused to answer. While Perdue across the witness table gripped the
arms of his chair, his veins standing out

arms of his chair, his veins standing out like cords.

Stillwell was bound over to the grand jury. Perdue hopes the upper courts can force an answer from him to the question, "Where are they now?"

It happened in 1887. Perdue, a prosperous young farmer, had married his boyhood sweetheart, Leefa Wilmeth. He had fallen in love with her when she was 12, and married her at 16.

The next four years was a continuous honeymon for the young couple. They were well-to-do, they took in all the country dances together, and came and went as they pleased. Two children-Cora and Tillie—came to them. They had a hired man, Wilbert Stillwell, who took the burden ou the outside work off Perdue's hands.

WILD LEAVES HER HOME.

Perdue's hands.
WIFE LEAVES HER HOME.

WIFE LEAVES HER HOME.

The young husband became interested in Mississippi farm lands. It ended in low the father and the child Mrs. Perhis making a ten-day trip to look them due left behind.

GOOD SHORT STORIES

WHERE THE PUNISHMENT CAME

(Life.)

"What's doing in the way of amuse-ments?" asks the newcomer of the old nhabitant of Hades.

inhabitant of Hades.

"Baseball game every afternoon," answers the old inhabitant.

"Baseball? You don't mean it! That's great. I was a fan from wayback on earth. On the square, do you have baseball every day?"

"Sure thing."

"By kinker! This place suits me. Baseball! Say, this can't be h—l, then."

"Yes, it is. The home team always loses."

A big able-bodied man of about mid-

A big able-bodied man of about middle age shuffled into the poor law guardian's office and curtly bade the clerk good morning.

"Wot d'yer mean," he began, "by knockin' off poor Widder Snugg's parish pay? She's a 'onest 'ard-workin' woman, whose nose is in the washtub all day, an' it's a wicked shame to rob'er of 'er lorful rights."

The clerk looked down a big ledger and silently consulted it.

"Mrs. Snuggs has married again," he said, "and the guardians have decided that she is no longer entitled to outdoor relief; and in any event, my man," he added, sharply, "I should like to know if the matter is any concern of yours?"

"Concern of mine!" the man repeated, "Weil, I should rather think so, "Weil, I should rather think so,

"Concern of mine!" the man repeated,
"Well, I should rather think so,
guvnor. If you stops the ole lady's
pay you stops my daily ounce o' shag
an' quart of beer, too! I'm 'er noo
'usband!"—Answers.

An Irishman was sitting in a depot smoking when a woman came, and, sitting down beside him, remarked:
"Sir, if you were a gentleman, you would not smoke here."
"Mum," he said, "if you wuz a lady ye'd sit farther away."
Pretty soon the woman burst out again.

again:
"If you were my husband I'd give you poison."
"Well, mum," replied the Irishman, as he puffed away at his pipe, "if you wuz me wife I'd take it."—Kansas City Independent.

Independent.

Mrs. Grant was undoubtedly the disciplinarian in the family, and Mr. Grant, who was a very busy lawyer, was regarded by the two children as one of themselves, subject to the laws of "mother." But one day Mrs. Grant became very ill, and at luncheon Mr. Grant, who felt that the children were already showing signs of "running wild," felt obliged to reprimand them. "Gladys," he said, "stop that immediately or I shall have to take you from the table and spank you."

Instead of making the impression he had fondly hoped to do, he saw the two little imps glance in a surprised manner at each other and them simultaneously a grin broke over the faces of both culprits, and Gladys said in a voice of derisive glee:

"Oh. George, hear father trying to talk like mother!"—Lippincott's Magazine.

WANT TO REMIT DUTY

Pulp and Paper Men Wait on Quebec Premier.

Montreal, Aug. 25 .- A delegation o pulp and paper men waited on Sir Lomer Gowin and Hon. J. Allard to Louier Gouin and Hon. J. Allard to-day. The object of the delegation was to ask the Government to suspend the new tax of 25 cents per cord on pulp-wood exported from this Province before being manufactured, in order to give time to the Canadian manufacturers to comply with the new American tariff, which imposed a heavier duty on paper and pulp.

compy with the new American tarilf, which imposed a heavier duty on paper and pulp.

The delegates represented to the Ministers that if the new duty of 25 cents per cord on the exportation of pulpwood cut in the Crown forests of Quebee was remitted it would enable them to meet their obligations on account of the new minimum tariff of the United States. As this 25 cents duty is the only one imposed by the Province of Quebee, its withdrawal would put an end to all difficulties with the American Government.

The Premier promised to submit the demands to the Ministers at the next meeting of the Cabinet, to be held in Quebee in a few days. All the leading julp and paper men of the Province were represented.

Have You a Sneezing Cold?

over personally. When he came back his wife and younger baby, and \$1,600 in money were gone.
What happened during those ten days to make the wife forget her allegiance to her husband, what threats, arts, inducements, the despoiler used to make her leave him, can only be speculated.
From that day Perdue was a changed man. He sold his farm—he couldn't Have You a Sneezing Cold?

Is your head stuffed up? Are you smiffling—gag in the turoat—fulness in the noatrii—eyes watery and weak? You have all the symptoms of Catarrh, the kind that hangs on, unless stamped out now. For quick relief and sure cure, inhale the soothing vapor of Catarrhozone. It passes over the raw irritated membranes leaves antiseptic soothing balms on the spots that need medication. You feel better in an instant—every breath of Catarrhozone means cure—in half an hour you're well. Nothing so magical so safe so pleasant as Catarrhozone. It's good for Catarrh Fonoshitis and Asthma—eures them so thoroughly, as it does a simple cold.

The dollar outfit of Catarrhozone contains a beautifully polished hard rubber inhaler and sufficient liquid to last two months; small trial size 50c, all dealers or The Catarrhozone Co, Kingston, Ont. ducements, the despoiler used to make her leave him, can only be speculated.

From that day Perdue was a changed man. He sold his farm—he couldn't bear to stay in the house where everything recalled his lost happiness. He became a wanderer, working for the government secret service and the Pinkertons—travelling through every State in the Union, always looking for his wife and baby. Finally he ran across Stillwell in Ohio and caused his arrest. Perdue told the story in court.

"Why, little as Tillie was, she petted me like a big girl. If she wasn't put by me at the table she'd pout up her little lips and the big tears would come. And when she'd be brought over she'd clapher little spoon on the table in giee.

"And how she'd watch for me at the window. When Pf come to the house there'd be the two curly heads—the little one just showing above the sill, bobbing up and down to see 'papa.' She even seemed to know my step when she was asleep. She'd wake right up to put her soft little arms around my neck and kiss me.

"And to think that man, that man

YOUNG TORONTO WIDOW.

Married in England to Mr. Alfred Day Pardee.

Philadelphia, Aug. 24.—Announcement was made here that Mrs. Helen Amor Campbell Robson, a young widow, of Toronto, Ont., had been married today in London, England, to Alfred Pay Pardee, of this city, son of Calvin Pardee, head of the firm of coal operators which bears his name.

Mrs. Robson Pardee is a daughter of the late Rev. Archibald Campbell, of Toronto.

Killed in Fall From Hoist.

Killed in Fall From Hoist.
Ottawa, Aug. 25.—Nikolaus Ikenchuk, an employee of the Toronto General Contracting Company, was killed this morning as the result of a fall from a hoist on the new grand stand at the exhibition grounds. Deceased was on the hoist and was eaught when about 40 feet from the ground by a brace which pulled him off. He was 50 years of age.
