

FROM DAY TO DAY

(Saturday's Daily)

THE TURKEY SUPPLY. Ten fat turkeys standing in a line. Along comes Thanksgiving—Then there were but nine.

Nine fat turkeys weeping over their fate.

Along comes Christmas—Then there were but eight.

One fat turkey—then laying eggs galore. Along comes an incubator—Then there's plenty more.

—W. J. Lampton.

A CONGENIAL COLONY.

Upton Sinclair Undertakes Solution of the Knetty Domestic Labor Problem.

Upton Sinclair, author of "The Jungle," whose last book stirred North America in a marvellous way, has turned his mind to the solution of the domestic labor problem.

Edmonton housekeepers, keenly alive to the presence of the problem in their midst, may be interested to learn of the plans of a man who has been credited with both genius and practical effort.

ity of those who are not thus engaged work as paid employees of the colony.

Life in the colony is delightful in its simplicity and naturalness. The members are all of one mind along certain lines, or they would not be there, and a spirit of good-comradship pervades the place which makes it seem the home of one great, happy family and life a perpetual holiday.

Through the day everybody is busy, either inside the colony or out of it; in the evening the fire is lighted in the hall and the groups gather around, and the click of the billiard balls is heard from the adjoining room and there is laughter and music and merry making.

One of the things that all the members are agreed in aiming at is the utmost simplicity in all material things that is consistent with comfort; and so table cloths are dispensed with and paper napkins are substituted for linen ones, and there is economy in the use of dishes. Hence one has to be a Bohemian to enter thoroughly into the spirit of the place, a quality that most of the "colonists" have, as the great majority of them are literary men and women, and have served their turn at living lean years in the garrets of New York.

For the present winter the colony is necessarily small, as the house accommodates only about fifty people. But in the spring additional land will be purchased and cottages will spring up all about the central building—cottages that have no kitchen or dining room in them. A separate building will be put up especially for the children; the main building will be added to and a farm will be annexed, so that the colony will be in position to raise its own food supply.

Dossens of people are impatiently awaiting the spring, to join the "pioneers," and there promises to be here at Englewood a community that may be the model for thousands of like nature, the success of which will demonstrate even to the most conservative of us the urgent necessity for introducing co-operative, labor saving scientific methods into that firmest stronghold of traditions, the home.

BITS OF HUMOR. —In a village in New Jersey the school mess saw one of the little boys crying. She called him to her and inquired the reason. "Some of the big boys made me kiss a little girl out in the school yard," was the reply.

"Why, that is outrageous. Why did you not come right to me?" "It didn't occur to me that you would let me kiss you," he said.

—Being unable to find a seat in the crowded car, the portly man had gone into the smoking car and sat down next the door.

The man sitting next to her, absorbed in his newspaper, kept on smoking.

"It was foolish enough to suppose," she said, glowering at him, "that some of the men in here, at least, were gentlemen."

"Pardon me, madam," he answered, politely offering her his cigar case.

SOCIAL. Mrs. Manson entertained this week at another of her pleasantly informal small teas.

Miss Kathleen Graydon leaves next week for Calgary on an extended visit to her aunt, Mrs. J. J. Young.

"I am a mother; know my worth! To fear my power to mold the man as only she who bears him can! To number each departing soul; And count the mornings one by one. Impatient for my Christmas morn; When, soon my womb a babe will bring (What harm, if when he breaks the mold,

He leaves my lady still and cold? Shall I not live within his breath? Can I not move apart from death? To witness at his dainty love,

Which could almost, like that above, Make or unmake a universe; And prove a blessing or a curse; To trouble all my power for good And evil—this is motherhood." —Century Magazine.

A MODISH REVIVAL. Mrs. Murray Crane, the only bride in the ceremony set at Washington, has gone back a score of years in the style of her furs.

She attended a semi-annual one cold day, wearing a long sable coat, but in the circular style, but fitting closely in the back, and making in aot effects in front. That sort of a garment was the rage in the early '90s, but Washington dames knew nothing of its rejuvenation until the modish Mrs. Crane, formerly yesterday, and the Boardman, proclaimed the fact.

Women who are hastening to have their sable and seal capes remade say it is a sensible style, and they hope it will be popular. Capes ever have been the fashion, and when they were modish, everybody complained that they did not deserve to be called wraps because they permitted the cold air to creep up one's back and for bare arms they gave no shelter.

It is believed that the time is not far off when they will be a part of the winter wardrobe, and that they will be a part of the winter wardrobe, and that they will be a part of the winter wardrobe.

KNIGHTS OF COLUMBIA. A new council of Knights of Columbus is to be formed in Edmonton tomorrow.

About one hundred knights and their wives of several other fraternal societies in the city tonight or early tomorrow morning. A party of about one hundred left for the city of Ottawa, where they will be joined at Calgary by several others from Montana and Vancouver.

Elaborate preparations have been made by the Catholic Church of Edmonton for the celebration of the centenary of the birth of Christopher Columbus.

The members of the society who will be received tomorrow morning and the business in connection with the establishment of the new council will be held in the evening there will be an elaborate banquet served at the Prince Arthur Hotel.

Major S. Hama, Medicine Hat; Col. S. E. Beale, Montreal; and Mrs. J. J. Simpson Hayes, (Mary Maxwell) Winnipeg, were among the Canadian visitors to the Dominion Government offices in London, England, during the week ending December 11.

was best man and Miss Morlon, of Winnipeg, was bridemaid. After the ceremony the wedding party went east for a short honeymoon trip. They will reside in Edmonton.

SOCIAL. The Misses Barreto of Wetaskiwin are visiting the Misses Perini of the city.

Mr. and Mrs. T. F. S. Jackson have returned from Winnipeg, where they spent the holidays.

Master Cyril and Master Austin Beck are entertaining a number of boys and girls this afternoon at a skating party in Horner's rink.

Deep sympathy will be felt throughout the city with Mrs. J. H. Morris on the death of her brother, Mr. Arthur Jardine, as announced by telegram last night.

At a meeting of the young people and a pleasing evening passed at the home of Mrs. Nightingale.

Mr. P. H. Belcher spent some days in Lethbridge, as the guest of his brother, Major Belcher.

Mrs. D. A. Sharp, of Wetaskiwin, will be visiting in the east for some time.

Major S. Hama, Medicine Hat; Col. S. E. Beale, Montreal; and Mrs. J. J. Simpson Hayes, (Mary Maxwell) Winnipeg, were among the Canadian visitors to the Dominion Government offices in London, England, during the week ending December 11.

(Ontario) The Rolla L. Crain Co., Ltd., Kathering Hughes is the author of the late widely-loved and revered prelate, and her work is ardent, strong, brimful of sympathy, love and understanding.

"The Children's Arohahop," as the great H.M. class was called, had one of those faces that one sees—even in a picture—can never be forgotten.

Strength and sweetness form there a happy union. Deep, earnest eyes, a mouth exceedingly tender, with firm and strong, a noble brow, the whole countenance expressive of real goodness, you are at once interested in the life and works of such a man.

Any Catholic readers in this Kingdom who may happen upon this most assured that this is a work which should find a place in their libraries. It is a book which should be found on every library shelf, for it is the life of a good and great man—one simple as a little child—and it is beautifully told.

Need to Increase Milk Production of Canadian Herds—Creamery Patrons Should be Interested

The Dairy Commissioner of the Dominion department of agriculture, Mr. J. A. Rudick, has sent out the following circular on the proposition of a cow testing association for the benefit of those who desire to avail themselves of the help of the department in this matter.

A good start was made in 1926 with the organization of Cow Testing Associations, and we hope to see a great extension of the movement during the coming year.

The plans for the improvement of a dairy herd need not be elaborate or expensive, and should take cognizance of the fact that there are good cows and poor cows, judged by their milk production, in all breeds, and that it does not follow because a cow may have a lengthy pedigree that her performance at the milk pail is up to the mark.

Any scheme which has for its object the improvement of our dairy stock must provide for a study, and record of the performance of the individual cow, as well as of the herd, with the management of the herd, including its care and feeding, and the breeding of animals to replace those which are discarded in the "weeding" process.

Owners or managers of cheese factories and creameries naturally take an interest in this question, and there is no reason why testing of individual cows should be done by the factory management.

It is not necessary to have a large herd to test, and the cost of testing is not high, as each member of an association has information relating to the matter.

Any scheme which has for its object the improvement of our dairy stock must provide for a study, and record of the performance of the individual cow, as well as of the herd, with the management of the herd, including its care and feeding, and the breeding of animals to replace those which are discarded in the "weeding" process.

SUGAR BEETS AND LABOR PHOTO

Raymond, Jan. 1.—The Raymond Beet Sugar Co. has finished the season's run. The company this fall bought and grew 1,800 tons of beets, although only 17,415 tons were put through the mill, the difference being made up of beets adhering to the roots which were bought, but cleaned off before being used.

46,708 bags of fine white sugar and 800 tons of lime have been manufactured. The factory has been running over two months, during which time one hundred and thirty men have been employed, 4,000 tons of coal consumed and 1500 tons of lime rock used.

WANTED—TWO HUNDRED HEAD of horses or cattle to winter; also tender for 25, 50, 70 or 100 tons of green feed, 100 tons of hay, to be delivered in Edmonton before April 1st. Apply S. L. Daggard, two

BERESFORD'S DOMESTIC AFFAIRS. Bulletin Special. Dec. 29.—The relations of De Lal Beresford, a brother of Lord Charles Beresford on the British navy who was killed in the last Sunday week at Enderby, N.D. last Sunday has been revealed.

Wanted—TWO HUNDRED HEAD of horses or cattle to winter; also tender for 25, 50, 70 or 100 tons of green feed, 100 tons of hay, to be delivered in Edmonton before April 1st. Apply S. L. Daggard, two

IMPACTED by the brave pioneer... The Grand Trunk Pacific will be described by those familiar with the country as the richest region of the west. The soil is not quite so rich as it used to be, but it is still a rich soil, and the climate is more equable than it was in the past.
