FROM A THANKFUL MOTHER

Dear Sirs,—
Having given Dr. Bovel's Iron Tonic Pills a fair trial, of two boxes, I can truthfully say that they are all you claim them to be. I have been greatly benefited by them, having suffered several years with Neuralgia of the Heart, Liver Trouble, Stomach Disorders, and a complication of diseases. Why, the pains have left me entirely and I feel now as if life was worth living for. I always used your Bovel's Herb Tablets at the same time. Must say that your Herb and Gum Salve is wonderful for Skin diseases of all kinds. And your Menthol Inhaler is really a blessing to the house. I have used it for colds in the head. When I could not sleep at nights, sore throat was cured like magic. I have cured my sister's two little children with very bad colds in the head, and herself. We could not be without it, especially during winter months, when colds are so frequent. You may publish this testimonial if you wish, as it may help some other poor sufferers as it surely helped me.
Yours truly, MRS. CHAS. H. MARTIN,
John Island, Ont.

A RHEUMATIC SUBJECT

Dear Sirs,—
Have used three boxes of Dr. Bovel's Herb Tablets. They have done more to relieve my rheumatism than anything I have ever used. I have been a martyr to this disease for years.
Gratefully yours, D. M. FELLOW.

BURNT BY BOILING GREASE

Dear Sirs,—
Having received your medicine, I take great pleasure in recommending same to all concerned. Your Gum Salve is worth its weight in gold. Recently I burnt myself badly with grease catching fire which caused most excruciating pain. Only one application of your Gum Salve was necessary to render immediate relief.
Trusting that someone may read this and give your Gum Salve a test, the way I did, and wishing you every success.
Respectfully yours, F. F. TAYLOR,
Station Operator, Macoun, Sask.

NERVOUS TROUBLE CURED

Dear Sirs,—
Some time ago I was persuaded to purchase four boxes of Dr. Bovel's Iron Tonic Pills. At the time I had little faith in them, as I had been a sufferer from nervous trouble for several years. At the same time I was very much run down and out of sorts. I am now pleased to say that after using eight boxes of your pills and tablets I am entirely built up, and have to thank your company for my good health.
Yours truly, S. M. FLYNN.

Story of the "Grace."

Terrible Time on Record Long Voyage From St. John's to Halifax.

Thirty-two days out on a passage that is usually done in four or five, the little Newfoundland brigantine Grace arrived in port yesterday after hope for her safety had been practically abandoned. Hardships that will be indelibly seared in their memory were endured by the eight men who manned the little craft. Tossed about like a chip by gales from all points of the compass, three times leapt up so badly that part of the cargo had to be thrown overboard to lighten her, and finally when making shore to strike a reef and be compelled to man the pumps continuously to keep the water down, the crew of the Grace had an experience that none of them ever want to repeat, and when they finally got to port yesterday they were all completely worn out by exertion, exposure and anxiety.

Battle With the Elements.

For nearly a month, baffling winds were encountered and the vessel was driven helplessly in whatever direction the wind happened to be from then. At times so coated with ice as to be almost unmanageable, then driven to southern latitudes in which the "glitters" melted away, then frozen up again, the weary unceasing battle with the elements went on and there were many times the men despaired of ever reaching land.

Cargo of Codfish.

The Grace left St. John's on February 2nd with a cargo of dried fish from Alan Goodridge & Sons, consigned to F. W. Bissett & Co. A heavy southeast gale was met that

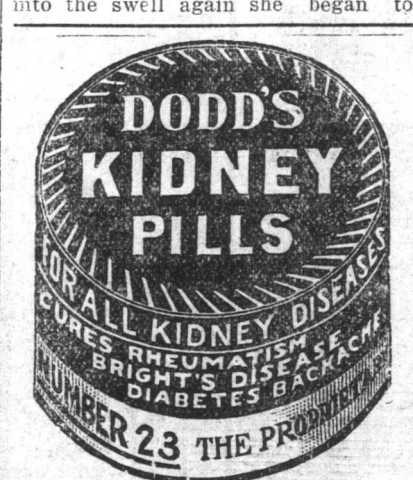

sometimes as far east as the longitude of Cape Race, some times to the 49 N. Favorable slants of wind would be caught sometimes in which as much sail as possible would be set, then the wind would shift and under a foretopmast staysail and under a foretopmast staysail, the little craft would lay to. Twice more she was leapt up and only freed from her frosty coverings by being driven into the Gulf Stream. Again and again she shipped seas over her bows and poop that left a veneer of ice behind them, and she rode over many combers that would have overwhelmed her had they broken on her deck.

Early last week the vessel got the first good weather she has encountered on the voyage, and gradually she began to creep nearer to her destination. On Wednesday night Capt. Jackson made out what he thought was the entrance to Halifax harbor. It had been thick for several days with no opportunity to shoot the sun, but from his dead reckoning it seemed as if the land ahead was Chebucto Head. The brig was coming along under easy sail when suddenly she struck with a jar that shook her from

truck to keelson. She had grounded on a reef.

Manned the Pumps.

Preparations were made to take to the boats, which were fortunately all right, having been covered over by a staysail which was cut down from aloft and lashed over them when the weather first got bad. However, the Grace slid off into deep water after a while when some more cargo was jettisoned, but as soon as she got out into the swell again she began to

leak badly and the crew had to take half hour spells at the pumps to keep the water down.

When morning broke it was seen that the land she had been making for was Ironbound Island, Chester. The weather began to get dirty again, and fearing that he would be driven off shore again Capt. Jackson had some more of the cargo thrown overboard. However their fears were not realized in this regard, and finally the vessel got off the mouth of the harbor on Saturday night and was towed in yesterday.

Although the decks at times were like a skating rink, so coated were they with ice and the rigging was frozen up so, no one was injured until Mate Tom White slipped on the deck on Saturday night and hurt his knee cap. The vessel will dock this morning, and after discharging her cargo will likely go on the marine slip—Halifax Chronicle, March 7.

Bay of Islands Notes.

(Western Star.)

Several robins were seen this week. Sure harbingers of spring.

Mr. N. Chown, representing the Nfld. Clothing Factory, was in town for a few days.

Great indignation is expressed by the residents of Humbermouth, who are forbidden to cut wood on ground held by speculators.

Fishing in Humber Arm has been practically at a standstill the past week and the mild weather has still further retarded operations.

The change in the schedule of the Glenoe has given great satisfaction to the people of the West and South Coasts.

Mrs. L. March is said to be improving gradually. As soon as she is able to do so she intends going to St. John's for the balance of the winter.

The weather in Bay of Islands the past few days has been all that could be desired. The air was balmy and the sun shone with rare brilliancy. An early spring is evidently in sight.

The skating rink was well patronized the past few nights. Those who enjoy a pleasant and healthful exercise should not fail to spend an hour at this popular resort. The ice is in splendid condition.

It is reported that a large New York concern is endeavoring to secure favorable terms preparatory to erecting a large smoke house at Bay of Islands. Judge March may shortly leave for New York to complete arrangements.

First Drill in the New Armoury.

A. and B. Companies of the C. L. B. had their first drill in the new armoury, Harvey Road, last night. Lt.-Col. Rendell and the other officers of the brigade were present and the lads were put through physical drill, marching, manual exercises, &c., and showed their usual proficiency. The band also practised in their room and officers and lads alike are delighted with the new building, which looked fine when fully lit up.

Minard's Liniment Cures Distemper.

Fell From Roof.

At 5.20 p.m. yesterday as Messrs. S. Knight and A. J. Barnes, carpenters, were engaged shingling the roof of Mr. John Keefe's house, Walgrave Street, they narrowly escaped death by falling from it to the street, a distance of 16 feet. The scaffold they had erected they believed to be safe, but when Mr. Barnes removed to one side of it, the whole thing gave way and came with the men to the ground. They pitched out from a deep drain recently cut, and at first it was thought both were killed. They lay unconscious, but Mr. Keefe was fortunately home, and with his son, Philip, bore the men into his house, and using restoratives they revived, but were dazed for a long while. Knight's neck was badly hurt; Barnes had his wrist sprained, and both received several bruises. Dr. Tait was quickly on the scene and attended the men after which they were driven home.

Billiard Matches.

Three contests took place in the B. I. S. Billiard Handicap Tournament last night, being the opening games. J. Callahan played S. Cullen and beat him by 40; J. Walsh played P. F. Moore and won by 15; while Geo. Knight defeated J. Brennan by the large score of 104. Two games were in B Division and the other in C Division.
