Encouraging Report From the Lake Winan English Scientist.

From the Manitoba Free Pres

Superintedent Borden, of the Lake
Winnipeg mine, returned on Saturday to
the city. He reports very favorably on the
mine. The main working shaft has been
sunk to a considerable depth. The vein at
the surface is about twenty feet wide, but
as the shaft has been sunk on it, and no
drosscuts made as yet, its width below has
not been ascertained. No trouble

Amos Hudgin, Toronto, writes: "I have
been a sufferer from dyspeptia for the past
six years. All the remedies I tried proved
useless, until Northrop & Lyman's Veget
able Discovery and Dyspeptia Cure was
brought under my notice. I have used two
bottless with the best results, and can with
confidence recommend it to those afflicted in
like manner.

An explosion in a mine near Calais,
France, yesterday, resulted in the loss of
127 lives. not been ascertained. No trouble has been experienced with water, although the shaft has been sunk to a depth of thirty-five feet below the lake level. All the timber necessary for the mill and shaft has been got out, and a wharf is now about to be constructed. Another shaft will be added at the end of Another shaft will be added at the end of the month, making three in all. No time will therefore be lost in pushing on the work. Every indication, Mr. Borden says, points to the Lake Winnipeg mine being in the to appropriate to any working on the Lake of the Woods, also that the Lake Winnipeg distipation will be added at the end of the bottler will the propriate and the bottler will be added at the end of the bottler will be added at the end of the bottler will be added at the end of the lost of the bottler will be added at the end of the lost of the bottler will be added at the end of the lost of the bottler will be added at the end of the lost of the bottler will be added at the end of the lost of the bottler will be bottl Upon the opening of navigation, a great number of prospectors will go into the Lake Winnipeg district, and doubtless many in-

their researches. The following interesting letter has been Mr. James Parkinson, F.C.S, of London, England:

England:

"DEAR SIR: Yours of the 12th uit, and specimens of ferruginous gold-bearing quartz and coal duly to hand, with many thanks. It is almost incredible, but the fact remains that are cannot get a sample of the coal from any public institute or museum. I tried to get soms from the high commissioner of Canada, and his chief secretary promised to get me seme as well as reports of same from Canada, but as yet no to hand. The ritish museum, Fouth Kensington, had no Canada specime s, nor the Geological museum of Jermyn street, London, Had anyone told me that the choncers and representatives of the dominion were so indifferent to bring under the notice and observation of intendira immigrants the fuel recourses of the Northwest Locald not have be leved it, but such is the case, and I have therefore the more to thank you for your small speciment to hand. Others will soon follow, and after exemining them will folward you the result.

The sample you sent is a "Bituminous variety, and will be relatively a good coal for all purposes, and if found in good workab'e seams it will be of contiderable vaiue, and compared with best bitunious household coal of Great Britain should be worth 75 per cent of the cost of the latter.

Your ferruginous gold bearing quartz specimen to hand, is very highly characteristic of a valuable vein, and according to the thickness, and cost of working, so will the prospects be favored with suices of working, so will the prospects be favored with suices of working, so will the prospects be favored with suices assay Labratory' and he reports that he found it to yield of gold and silver 2502, 13 dwts. 12 grs. per ton of 2240 pounds. The specimen does not show any visible sign of containing gold, not sufficient to estimate silver and gold separately. It will therefore yield according to assay about \$250 per ton." DEAR SIR : Yours of the 12th ult. and specime

THE WORLD AT LARGE.

# TOTS.

At no time since the Toronto Land Boom, during the years of 1873 and 1874, has such an opportunity as the present been offered to parties to invest small or large amounts to good advantage. Toronto during the past few years of hard times has held its own, and although Real Estate could at times be got at a price below its real value, yet such opportunities seldom arose, and when they did shrewd speculators of means were always ready to purchase, and property if worth having could always find a purchaser at a reasonably fair value; besides the city has continued to increase in population and wealth, very many new buildings have been erected and hundreds are now in course of erection; vacant land has steadily increased in value, and so in the future as in the past must the population of the city increase, its limits extend and its real property increase in value. must the population of the city increase, its limits extend and its real property increase in value. But a few years since Parkdale was a vacant commons and land could be had at less than \$100 per acre, now an acre cannot be purchased at less than from \$2,000 to \$3,000.

The building of the Ontario and Quebec Railway in connection with the Credit Valley and Syndicate Roads with its junction at West Toronto Junction, is giving employment to a large number of men and expending, it is said, about \$2,000,000 within the limit of Toronto and this unction.

### WEST TORONTO JUNCTION

Is a new suburban Town adjoining Parkdale and within two miles west of the present limits of Toronto and so called (like Chicago and Detroit Junction) because all the railways entering and leaving the city by the West do so at this point.

The Ontario and Quebec railway have purchased 40 acres here, part of the Runnymede Estate, for their workshops, which when built, with the other railway facilities will make this a larger and more important point than Parkdale, and accordingly properties which can be now purchased at a low price, must before many years be very many times more valuable.

We have sold by private sale a number of these lots 50 x 160 each to a lane, which are now being

There are churches and a good school besides a number of dwellings here. The location is high, dry and healthy, and has every advantage required to make it a popular and growing town. Commutation tickets can be had from the railways, by which return tickets to the Union Station will cost less than 8c each (4c each way) and the drive into the city by the Davenport Road or Dundas Street is always attractive.

We are instructed to sell the balance of these lots (being part of the block of land purchased by the railway) and known as the Runnymede Estate during the month of April at \$125 each lot.

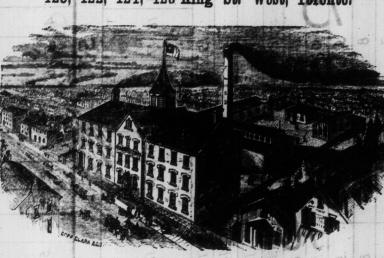

TERMS...One-third Cash; balance in four semi-annual payments; interest 6 per cent. half yearly. Plans and particulars on application to
