BOOTS AND SHOES. Trade has been of a sorting-up character during the past week, the demand being chiefly for heavy winter goods, such as overshoes, rubbers, etc. A good many orders for spring delivery are being received, and from present indications wholesalers say they may expect a good spring trade. There are few complaints regarding payments, which are said to be quite up to those for the corresponding time a year ago.

Sharp Advance in Tallow, The price of tallow has advanced from 1c to lac per lb. since Monday. A leading local dealer in this commodity to-day said he would not let a pound go out of his warehouse under Sc. On Monday the rul-ing price was 6 1-2c. The reasons for this advance are the scarcity of the article, higher English and American markets and the high prices ruling now for hog products.

Why Eggs Are Scarce?

The scarcity and dearness of limed or pickled eggs on the local market has caused much conjecture lately amongst those who are not "in trade." Careful heads of famiare not "in trade." Careful needs of lamilies will tally another grudge against the hoggish American when they learn this latest speculative manageure affecting the local market. A leading egg dealer said to The World to-day:
"The market is almost bare of limed

eggs, and our agents in the country report it difficult to get together even a decent HOCKEY

it difficult to get together even a decent sized shipment.""
"Is it true that the Americans have swept the market lately?"
"Yes, they swooped down and took everything in the shape of an egg they could get hold of a week or so ago, and have since been steadily shipping to New York. Most of their purchases were made when eggs were selling at 140 and 150, and as the price of limed eggs in New York jumped up to 30c shortly afterwards you can see they realized a handsome profit."

TRADE AND FINANCIAL GOSSIP.

The financial situation in Canada, as shown by the last Government bank re-turns, is most satisfactory. The available turns, is most satisfactory. The available cash held by the banks is probably larger now than at any other time in the history of the country. The public deposits alone at the close of last year amounted to \$170,000,000, being an increase as compared with the total at the end of 1891 of \$17,500,000. The public deposits in the Dominion chartered banks, together with those in the postoffice and Government savings banks, are larger now than ever before, amounting at the close of last year to the immense sum of \$210,000,000.

Deposits Reported.

Money markets all over the Dominion are easy. Call loans at the principal centres are quoted at 5 per cent. on prime collateral. The easy state of the local money explains to some extent the increased demand for some of the choice securities offered on the local Stock Exchange, and during the past week speculators have made some very profitable deals.
