

Take A Scoopful Of Each— Side By Side

Take "St. Lawrence"
Granulated in one
scoop—and any other
sugar in the other.

Look at "St. Lawrence"
Sugar—its
perfect crystals—its
pure, white sparkle—
its even grain. Test it point by point, and you will see that

**Absolutely
Best**

St. Lawrence
Sugar

**Absolutely
Pure**

is one of the choicest sugars ever refined—with a standard of purity
that few sugars can boast. Try it in your home.

Analysis shows, "St. Lawrence Granulated" to be "99.99/100 to 100%
Pure Cane Sugar with no impurities whatever"

"Most every dealer sells St. Lawrence Sugar."

ST. LAWRENCE SUGAR REFINERIES LIMITED, - MONTREAL.

A Close Skimmer and Built to Last

THERE are two features that make a separator a good investment:
close skimming and durability. Easy cleaning and easy turning are
important, but not as important as the power to get all the butter fat
and keep on doing it for many years.

I H C Cream Separators will make good under the most severe skimming
test. If you will compare their construction with that of any other separa-
tor you will see why. Extra strong shafts and spindles, spiral cut gears,
phosphor bronze bushings, thorough protection against dirt or grit getting
into the working parts, and perfect oiling facilities, are the features that
make these separators good for long service.

I H C Cream Separators Dairymaid and Bluebell

are close skimmers and built to last, and at the same time are easy to clean
and turn. The reasons are these:

The interior of the bowl is entirely free from intricate
forms of construction. Every part has a plain,
smooth surface, to which dirt and milk do not adhere.
The dirt arrester chamber removes the undissolved
impurities from the milk before separation begins.

Accurate designing and fitting of all moving parts,
spiral cut gears, convenient crank, and thorough lubri-
cation, make these separators easy to turn.

There are many other features worth your considera-
tion. Ask the I H C agent handling these ma-
chines or write the nearest branch house for
catalogue.

I H C Service Bureau

The purpose of this Bureau is to furnish, free of
charge to all, the best information obtainable on
better farming. If you have any worthy question
concerning soils, crops, land drainage, irrigation,
fertilizers, etc., make your inquiries specific
and send them to I H C Service Bureau,
Harvester Building, Chicago, U.S.A.

Fruit Prices and Markets

The prices for small fruits already mar-
keted have been exceedingly high in east-
ern Canada. Strawberries have been re-
sulting the growers two dollars and two dol-
lars fifty cents a crate of twenty-four boxes
as a regular thing. Want of proper or-
ganization among the growers glutted the
Toronto market for one day, resulting in a
very serious loss to the growers without a
corresponding benefit to the consumer.
The same day that berries were selling for
five and six cents a box in Toronto, the
Ottawa markets were bare at twelve and
fifteen cents a box. There could be no bet-
ter illustration of the absolute necessity
for organization among the growers.

Cherries have been selling at from seven-
ty-five cents to one dollar ten cents per
eleven-quart basket, sweet cherries taking
the higher price.

It is yet too early to offer any forecast
to the actual price of apples, but not too
early to note the conditions of the market.
The European markets, without exception,
may be considered ready to receive the
usual quantities exported from America.
The industrial disputes have been settled
and there is no immediate appearance of
any disturbance that would lessen consump-
tion.

The prospects in the United States are
not quite so reassuring. The crop for
home consumption is above the average and
evenly distributed, so that there will be
no large demand from any particular sec-
tion of the country. This is president's
year with somewhat more than the usual
tendency towards stagnation in business,
which will undoubtedly lessen consumption.
It is possible that, if fair prices should be
offered in the European markets, there will
be a large surplus available for export from
the United States.

Our own northwest is usually counted on
to take a large quantity of fruit, and
conditions are such that more than the
usual quantity will be taken this year.
There will be strong competition, however,
in selling. British Columbia will have a
surplus for sale in the northwest terri-
tories. The northwest Pacific Coast grow-
ers are well organized to invade the Cana-
dian markets. Indeed, authentic reports
show that they have perhaps taken special
pains to organize for sales in the Canadian
northwest. Ontario will have a large sur-
plus in the hands of those who habitually
trade in the northwest and who are un-
likely to desert that market this year.
Though Nova Scotia will not have so large
a crop as last year, there will still be a sur-
plus of early fruit that will find its way
to the northwest. The success of Nova
Scotia early fruit in the northwest last year
was encouraging to the Nova Scotian grow-
ers, and it is not at all improbable that
several hundred carloads of Nova Scotia
fruit will be distributed in these markets
this season.

There is this to be said, though, in
reference to the marketing of the apple
crop, that the largest shippers this year
will be the cooperative associations. Con-
sequently, the danger of overloading the mar-
kets is greatly minimized. The prospect
therefore, in a general way look favorable
for a fair year for fruit growers, al-
though the high prices obtained for small
fruits will not compensate for the small
crop, conditions are likely to be much bet-
ter for all varieties of tree fruits.—Domestic
Fruit Crop Bulletin.
