GELATINE, a perfect and economical substitute for Isinglass.

CHLORODYNE

Has now obtained such universal celebrity as a remedial agent, it can scarcely be considered a speciality, its composition being known to most European practitioners.

The combination of Chloroform quickly relieves the pain and spasms of Cholera, Diarrhoea, Dysentery, and in fact all acute and nervous pains, and chronic coughs, frequently very small doses will produce this beneficial result. It may be administered in almost any fluid or on sugar.

Many of the chlorodynes of commerce are not of uniform strength, and vary in their effect, which has induced Morson & Son to compound this preparation to remedy these defects.

The dose for an adult is from 10 to 20 drops (and 1 minim is equal to 2 drops), the dose may, however, be increased in especial cases to 25 or even 30 minims, but is best to commence with the lesser dose.

Sold in 1, 2, 4 and 8 oz. Bottles.

MORSON'S PREPARATIONS are sold by all Chemists and Druggists throughout the world.
