

QUALITY AND TECHNIQUE

Your success in the practice of medicine depends largely upon two things:—The quality of the remedial or medicinal agents used, and your ability to properly use them.

Inert agents and faulty technique will make a failure of the best of physicians. A standard article cannot build a reputation for any man unless he has the wisdom to properly use it.

When called upon to treat a Non-Suppurative Synovitis, say of the knee in an adult, prescribe the best possible remedy—

ANTIPHLOGISTINE

a Medium can, and heat by placing the can in hot water. Do not delegate its application the first time to some one who has never seen the thing done, but personally apply the entire contents of the can to the affected joint, spreading it on the skin as thick as this  about the joint and beyond the boundaries of the inflammation. Cover with a liberal amount of absorbent cotton and a suitable compress. At the expiration of 24 hours, or when the dressing can be peeled off nicely, remove it and apply a new one. After a few days the affection will, as a rule, be but a memory.

You can rely upon Antiphlogistine for QUALITY

The TECHNIQUE depends upon you.

Antiphlogistine can be obtained at its best and more economically in original packages,—Small, Medium, Large, Hospital.
