

The New York Medical Journal.

JAMES B. HUNTER, M.D., EDITOR.

Published Monthly. Volumes begin in January and July.

"Among the numerous records of medicine and the collateral sciences published in America, the above Journal occupies a high position, and deservedly so."—*The Lancet (London)*.

"One of the best journals, by-the-by, published on the American continent."—*London Medical Times and Gazette*.

"A very high-class journal."—*London Medical Mirror*.

"The editor and the contributors rank among our most distinguished medical men, and each number contains matter that does honour to American medical literature."—*Boston Journal of Chemistry*.

"Full of valuable original papers abounding in scientific ability."—*Chicago Medical Times*.

"Taking it all through, its beauty of paper and print, its large-sized type, the high character of its contributors, its general usefulness, we know no other periodical that we would rather present as a specimen of American skill and intelligence than the New York Medical Journal."—*Franklin Repository*.

"The New York Medical Journal, edited by Dr. James B. Hunter, is one of the sterling periodicals of this country. The present editor has greatly improved the work, and evinces a marked aptitude for the responsible duties so well discharged. The contents of this journal are always interesting and instructive; its original matter is often classic in value, and the selected articles are excellent exponents of the progress and truth of medical science."—*Richmond and Louisville Medical Journal*.

MRS. PEARSON'S ABDOMINAL SUPPORTER.

PATENTED OCTOBER, 1870.

THE attention of the Medical profession is called to the great benefit that has been derived by those who have found it necessary to use the ABDOMINAL SUPPORTER. Its great use has been to those who are suffering from partial Procidentia Uteri, Ante, or Retroversion of the Uterus, and in Leucorrhœa, depending on those defects: by removing the cause, it quickly cures the discharges. It is also of marked service to persons suffering from a lax, or pendulous state of the abdominal walls, and during pregnancy, it furnishes the much needed support to the Abdomen. A perineal pad can also be attached to the Supporter when required.

The following gentlemen, having tested its value in their practice, kindly allow reference to them as to its excellence and efficiency:—
