

**INTERNATIONAL CONVENTION OF THE KNIGHTS OF COLUMBUS**

Twenty-five thousand Members Present at Dedication Ceremonies Held at New Haven, Conn., this Week

In staid, conservative, old New-Haven, Conn., the City of Elms, the city which a quarter of a century ago witnessed the organization of Columbianism, the Knights of Columbus assembled in national convention and general reunion this week.

**A Great Gathering**

Not alone will the national convention be held, but the new national headquarters of the Knights of Columbus, will be dedicated. The dedicatory ceremonies will take place in the presence of the assembled delegates and visitors.

There were knights from every State and Territory in the union, excepting Alaska, and the insular possessions. The Provinces of Quebec, British Columbia, Ontario, Prince Edward Island, Nova Scotia, New Brunswick and Manitoba, Newfoundland and Mexico were also represented.

**Distinguished Guests**

His Eminence Cardinal Gibbons was present at the dedication and participated in the ceremonies. The prominent members of the order who were present and made addresses included Hon. Thomas H. Carter, United States Senator from Montana; Hon. John M. Gearin, United States Senator from Oregon; Hon. Morgan J. O'Brien, president of the Appellate Division of the Supreme Court, and Hon. Victor J. Dowling, Justice of the Supreme Court, New York.

Yale University has entered with enthusiasm into the plans for the reception of the visitors to the classic city.

The University will open its doors to the great army of visitors during convention week, and one or more of the big features of the convention took place within the walls of this great seminary of learning. Its baseball team were to meet Dartmouth on Yale field during the week.

**The Programme**

The programme in detail was arranged as follows: On Monday June 4 at 8 p.m. there was a reception at Woolsey Hall, Yale University, with addresses by Hon. John P. Studley, Mayor of New Haven; Hon. Henry Roberts, governor of Connecticut; Arthur T. Hadley, President of Yale University; Congressman N. D. Sperry, Right Rev. Michael Tierney, D.D., Bishop of the Hartford diocese, and Supreme Knight Edward L. Hearn.

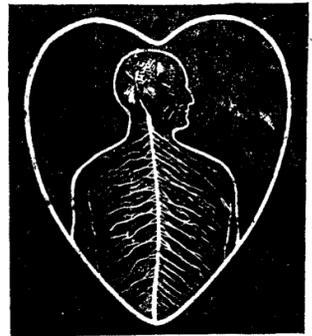

Tuesday, June 5, the convention assembled and adjourned for Pontifical Mass to St. John's church, at which Bishop Conaty, of Los Angeles preached. Cardinal Gibbons was also present.

Wednesday afternoon, June 6, the national headquarters were dedicated, and in the evening there was a banquet to dignitaries and delegates. The speakers at the dedication were Judges Morgan O'Brien and Victor Dowling of New York, and Hon. William R. Breen, of Indiana. At the banquet, speeches were made by Senators Carter of Montana, and Gearin of Oregon. Joseph Mercier, Montreal, Canada; B. F. Frisby, Mexico City, Mexico, and Hon. George Monaghan, of Detroit, all members of the order.

On Friday the closing day, there was to be a grand exemplification of the fourth degree at 4 p.m., and a parade of the fourth degree members, including delegations from Massachusetts, New York, Philadelphia and Providence, at 7.30 p.m.

Provision had been made for numer-

**MILBURN'S Heart and Nerve Pills.**

Are a specific for all diseases and disorders arising from a run-down condition of the heart or nerve system, such as Palpitation of the Heart, Nervous Prostration, Nervousness, Sleeplessness, Faint and Dizzy Spells, Brain Fog, etc. They are especially beneficial to women troubled with irregular menstruation.  
Price 50 cents per box, or 3 for \$1.25. All dealers, or THE T. MILBURN CO., LIMITED, Toronto, Ont.

ous diversions, including excursions on Long Island Sound, musicales, base ball games, etc.

**The New Headquarters**

The new building, to be dedicated as the National headquarters of the Knights of Columbus is situated on Chapel street between Temple and College streets and directly opposite New Haven Green.

It commands a view of nearly the entire eastern front of Yale College campus, and is perhaps the most desirable site for a building for that purpose in the city of New Haven. The building is a four-storey block.

The ground dimensions are 61 feet frontage, extending back 100 feet.

It has been under construction for almost two years. It is built entirely of steel and stone and is regarded as thoroughly fire proof; the approximate cost of the building is close to \$200,000. The street floor of the handsome new structure will be occupied as two large stores.

On the second floor there will be twenty fine offices, a large council chamber and four convenient ante-rooms. These offices are so constructed and are so large that some of them may be leased to local councils for permanent club quarters.

The home office of the order will occupy the entire top floor of the building, and if the growth of the order continues for the next five years as it has during the past, it will be necessary to take possession of the third floor also.

**HOW TO GET CONSUMPTION**

Ninety per cent. of the "lungers" contract consumption by allowing power of resistance to fall so low that a favorable condition for the development of the bacilli is provided. In a healthy system consumption can't take root. But where there is weakness and debility, there you find tuberculosis. For developing strength and building up the weak, nothing equals Ferrozone. It makes the blood nutritious and the nerves enduring. The way it converts food into nutriment, the appetite it gives is surprising. Just what the man verging on consumption needs,—that's Ferrozone. If tired and weak don't put off. Fifty cents buys a box of fifty tablets—get all dealers.

**IN THE SURF AT TIME OF QUAKE**

San Francisco Chronicle, May 24th.

Clarence E. Judson, a mechanic with the United Railroads, living at Forty-seventh avenue and J street, is probably the only man who was swimming in the ocean at the moment of the earthquake. His novel experience, given in his own words, is as follows:

Tuesday night, April 17th, I lay abed and tossed the whole night through. I got up to take my usual 5 A.M. dip in the surf—my daily custom for two years past. The breakers were not so very large, but they came in crosswise and in broken lines, with a vicious, snappy sort of rip-and-tear fashion. However, I got in up to my armpits almost, and a breaker, larger than usual, came in and shot away up the beach, probably seventy-feet—not a very unusual thing, however. It almost took me off my feet, and I started to go out and instantly there came such a shock I was thrown to my knees. I got up and was down again. I was dazed and stunned, and being tossed about by the breakers, my ears full of salt water and about a gallon in my stomach. I was thrown down three times, and only by

desperate fighting did I get out at all. It was a close call.

I tried to run to where my shoes, hat and bath robe lay, but I guess I must have described all kinds of figures in the sand. I thought I was paralyzed. Then I thought of lightning, as the beach was full of phosphorus. Every step I took left a brilliant incandescent streak. I jumped on my bath robe to save me. I began to think the world was coming to an end. I reached for my shoes and landed with both feet on to my hat twice. I finally got dressed after being thrown to the ground a few more times. I reeled and staggered like a drunken man. I thought of wife and babies; I had left them asleep. I realized that we had just had a terrible earthquake. When I got to the new road up on the sand dunes. I saw the road was badly cracked, houses were out of plumb, men, women and children were coming out in the streets, dogs were barking and chickens cackling. I ran and ran at top speed, and finally arrived at home, to find the wife frantic with fright, trying to manage the babies—a boy of two and twin baby girls.

It seemed everything was flat on the floor. After getting all hands dressed and outdoors, I got the house straightened up, and then I constructed a makeshift tent in a vacant space, where we slept for two nights.

Some one started a tidal wave scare, and the result was that the night of the 18th and 19th, nearly all the population of the district, and hundreds of refugees, gathered up blankets and wended their way back to the sand hills, a half dozen blocks from the beach, where they camped in safety. The earthquake severed all communication with the city, and when the cars stopped we were without service of any kind. We could see the vast columns of smoke, and we knew there were bad times in the town. As soon as the men folks quieted their families, several started by team, bicycle and on foot to get the news. I often think of my experience in the ocean. Forty-seven seconds doesn't seem long, but if you take your watch in your hand and count off the seconds, and live through the shaking again, it seems an hour. The damage to beach property was less than \$50,000.

The motion of the quake was like the waves of the ocean—about twenty feet between crests—but they came swift and choppy, with a kind of grinding noise—enough for anyone.

**Not to be Caught**

A certain London corn chandler had just engaged an assistant, who hailed from a small village near Leeds. He was not remarkable for his intelligence. His friends, realizing this deficiency, had evidently warned him against being caught by the sharp London people who would be certain to try to take a rise out of him.

Full of this resolve not to be caught, he began his duties. A customer entered the shop.

"I want some bird seed, please," he said.

The assistant grinned. The customer repeated his request, and the knowing villager spluttered with suppressed merriment. The customer, not quite knowing what to make of this extraordinary display, asked him in somewhat forcible language what was the matter.

"It's no use," answered the verdant

**His 1905 Open Letter**

MR. W. J. GAGE TELLS OF THE GROWTH OF THE CONSUMPTIVE HOSPITALS IN MUSKOKA

Accommodation at Free Hospital Increased by Twenty-five Beds

URGENT CALL FOR FUNDS TO MEET INCREASED BURDEN FOR MAINTENANCE

Dear Friend:—

Contributions from rich and poor, young and old, received by the Free Hospital for Consumptives, tell of the love and charity toward the great work carried on in Muskoka.

Thousands from all parts of Canada not only sent their "God bless the work" but their money also to help to answer their prayers.

The poor widow out of her hard-earned savings, telling how her own heart was made lonely through the dread scourge, as well as the rich insurance companies, have sent their gifts.

2,000 patients have been cared for since the opening of our Homes in Muskoka. 560 of these were treated in the Free Hospital. 150 patients in these two Homes to-day, show how this life-saving work has grown.

Premier Whitney, replying to a large deputation in the interests of the National Sanitarium Association, stated that "personally he thought \$100,000 would not be too much for the Government to set apart for this work."

Seventy-five patients to be cared for in the Muskoka Free Hospital for

Consumptives means a large weekly outlay. The Trustees accept this obligation, believing the needed money will be forthcoming.

The world is full of good and generous people ready to give. But they want to be sure that their money is wisely spent. In no other place can your money do so much good.

The growing knowledge of the contagious character of the disease has made the lot of the consumptive poor a hard one.

The Muskoka Free Hospital is to-day the only place where a sufferer in the early stages of consumption is admitted free.

Will you not help to save the life of a sick one to whom all other doors are closed?

What greater blessing could crown your giving, than the knowledge that it helps to snatch a fellow-being from the very jaws of death?

\$50,000 is wanted for the coming year. Will you join in this greatest of all charities?

Faithfully yours,  
W. J. GAGE

Toronto, Can.

**What about that Vacation?**

The Canadian Northern Railway are offering some very attractive TOURIST RATES in connection with their Fast "Steamship Express" between Winnipeg and Port Arthur.

LEAVES EDMONTON DAILY	At 19.15k
