

AIR TRAFFIC MANAGEMENT. SAFETY FOR THOSE WHO FLY.

Over 30 years of advanced technologies, provided by Alenia Difesa to worldwide airspace users, give birth to a new range of Air Traffic Management Systems. Leading the evolutionary trends of Air Traffic Control requirements, the Radar Division of Alenia Difesa offers Primary Radars equipped with Planar Array antenna, Mode-s Monopulse SSR and Fault Tolerant Processors for real time applications. Specifically developed application software and work stations combine to optimize a controller's workload and productivity, and provide communications for the exchange and integration of operational data. Air Traffic controllers at control centers in more than 60 countries share with the Company advanced technologies, and the commitment to safety for those who fly.
