

region, while N. P. is stationed on the spine, at the first or second dorsal vertebra.

On the *intervening* days, treat only with the uterine electrode, as above prescribed.

LEUCORRHOEA. (*Whites.*)

Take A D current, *very mild* force. Introduce the vaginal electrode, N. P., until it meets the uterus, and manipulate with P. P. over the dorsal vertebrae five to eight minutes, three times a week. Once or twice a week, on the *intervening* days, give *general tonic treatment*. Omit treatment altogether, for one or two weeks, once in two to three months. Considerable time is often required for the cure of old cases.

SPERMATORRHOEA.

The points to be gained are, to reduce the action of the amatorial organs of the brain and the secretion of the *testes*, and to contract and strengthen the tissue of the seminal vesicles and the prostrate gland.

Take the B D current. First, treat the lowest part of the cerebellum, on both sides of the spinal cord, with a *mild* force; using P. P. upon these organs of amativeness, and N. P. on the dorsal

vertebrae. increase the a handled c mostly filled *testicles* into and move N tebrae. Tre Then place the penis, a over the sm Treat about
