CURRENT TRADE CONDITIONS.

ONTARIO.

As yet there have been no evidences of the usual falling off in the lumber demand incident to the summer season, but on the other hand, inquiries have increased within the past week. The amount of building in progress and about to be commenced is great that considerable buying of lumber so is likely to be done throughout the whole season. There is now a scarcity of dry stock, for which slightly advanced prices are being offered. From the Ottawa valley there is some movement of lumber, chiefly box grades, to the United States. Reports from the Georgian Bay are to the effect that the cut this year will not be heavy, as many logs are being sold to Michigan manufacturers, who are offering very liberal prices. In white pine, common and mill culls are most asked for. Hemlock is selling freely, but complaint is heard of extremely low prices. Local industries are consuming large quantities of hardwoods, and the outlook for this branch of the trade is more promising than for many years. One manufacturer made a sale last week of 100,000 feet of basswood, mill run, at \$11 per thousand, as well as a large amount of hemlock timber for canal work. Soft elm is also much enquired for. Toronto dealers report numerous inquiries, but the difficulty of securing suitable dry stock is restricting business. There is an unusually brisk demand for shingles.

QUEBEC AND NEW BRUNSWICK.

There are a number of vessels loading timber and deals at various Quebec ports for the European market, but shipping is not nearly so active as last year. Apart from the regular yearly contracts, sales have been very light. A greater movement of stock for local consumption is reported, and contracts are about to be awarded for the erection of several large buildings in Montreal, including the new St. Jean Baptiste church and a theatre building for the Western Theatre Company. The feeling among lumbermen in the Maritime provinces is more hopeful. A fair quantity of spruce has been sold for shipment to France and the east coast of England, and in view of the light production of logs last winter, and the apparent decision of shippers to hold stock, it is believed that prices will improve before many weeks. Spruce deals now range from \$8.50 to \$9, but there is no buying of
