GOVT. CONSIDERING PARCEL POST

take some months, perhaps a year, to demonstrate whether or not the plan provided by the Bourne bill was a success.

System of Rates.
The department was inclined to believe that the principle of a minimum and maximum rate was correct, and, indeed, essential to any considerable expansion of the parcels post. Under the present system of a flat rate per ounce the express companies were able to cream the business and leave a certain amount of unprofitable business to the government.

As to the international parcel post rate, which is lower than the domestic rate in Canada, Dr. Coulter pointed out the cheapness of water transportation. He said that unquestionably the extension of the parcels post would be facilitated to any country by government ownership of the railways.

Hon. Mr. Pelletier is considered by many the progressive of the present government, and his sympathies are unquestionably with the popular demand for a parcels post.

The house of commons at the last session unanimously adopted a resolution proposed by W. P. Mackenzie, M. P. for South York, declaring "that the expansion and extension of the parcels post system would be in the public interests." It may be taken for granted, although no official announcement is authorized, that some forward step implementing this resolution will be taken by the government upon the recommendation of Mr. Pelletier before the close of the coming session of parliament.

Street Car Delays.

Monday, Nov. 18, 1912.
7.15 a.m.—Horse dropped dead on track, East King street, 10 minutes delay to eastbound King street.
7.35 a.m.—Fire on Yonge street, near Wilton avenue; 2 hours and 14 minutes delay to cars on Yonge st.

DEATHS

DETWEILER—On Monday, Nov. 18, at the residence of his daughter, Mrs. Hume, 104 St. George street, Kingston, beloved wife of Isaac Detweiler of Port Eglis, Ont.

Funeral notice later.

McKEE—On Monday night, Nov. 18th, 1912, suddenly, at the family residence, 33 Walmer road, John A. McKee.

Funeral notice later.

SLOANE—At Toronto on Monday morning, Nov. 18, 1912, Margaret O'Reilly, widow of the late William Sloane of Quebec.

Funeral will leave her late residence, 323 Brunswick avenue, on Tuesday morning at 2 o'clock for St. Basil's Church, thence to St. Michael's Cemetery.

TAMBLYN—William Ware Tamblin, M.A., formerly of Bowmanville, at Toronto, Nov. 18, in his 60th year.

Funeral notice later.

THOMPSON—On Monday, Nov. 18, 1912, at 104 St. Vincent street, Toronto, Mary Callender, beloved wife of J. Enoch Thompson and daughter of the late Edwin Callender, M.R.C.S., South Shields, England.

Funeral notice later.

WILSON—At the residence of her father, 35 McKee street, on Sunday, Nov. 17, 1912, Beale, eldest daughter of P. A. and the late Elizabeth Wilson.

Funeral on Tuesday, Nov. 19, at 2 p.m. to Mt. Pleasant Cemetery.

MONASTIR FALLS INTO HANDS OF SERBS

Continued From Page 1.

seems incredible that Bulgaria for the mere glory of a triumph entry into a city she does not desire possession of should wish to take her army into a disease infected zone.

The Turkish reports, even the official despatches of the results of the operations, have been so unreliable that little attention can be paid to the reports of the Tchausha battalions issued at Constantinople on Sunday and Monday. The operation probably was little more than an artillery preparation which in all important battles lasts several days, for the purpose of drawing the enemy's fire and locating the enemy's batteries.

Tension Grows Greater

As the effect of the victory at Monastir will be to stiffen the Serbian Government in resistance of Austrian pretensions, the consular troubles at Pilsen and Mitrovica are breeding a dangerous spirit of ill-feeling between Austria and Serbia, which is little calculated to favor diplomatic negotiations. The newspapers of both capitals reflect this feeling.

No news has yet reached Vienna of the Austrian consul Prechaska at Pilsen. The Serbian Government has declined to comply with Austria's request to allow an Austrian representative to go to Pilsen to make enquiries and practically ignore Austria's protests on the subject.

Except for an unconfirmed report of the fall of Scutari, no military news of importance has been received.

Proof that the cholera has affected the Bulgarian army comes in a report that the noted German doctor, Roth, has been summoned to the Bulgarian headquarters to assist in stamping out the disease.

Choose Wisely

BY
Choosing Early

Careful Gift selection can be made now with a facility impossible a little later on.

Our stock in every department is now at its fullest—in fact, during the holiday rush there will be many lines depleted, which we cannot duplicate before Christmas.

Any gifts chosen will be put away for safe keeping until such time as they are desired.

West to Demand Redistribution.

OTTAWA, Nov. 18.—(Special.)—The Ottawa correspondence of The Grain Growers' Gazette intimates that western members will insist on a redistribution bill at the coming session; otherwise business will not be allowed to proceed. Friends say Sir Wilfrid Laurier will insist on redistribution.

ALBANIA MUST BE AUTONOMOUS

Austria and Italy Agreed on Point—Serbia Puts the Muzzle on Austrian Consuls.

BUDAPEST, Nov. 18.—(Can. Press.)—The Austro-Hungarian minister of foreign affairs, Count von Berchtold, in the course of the debate this afternoon on the budget of his ministry, reiterated Austria's policy with reference to the Balkan situation. He said that the changes wrought by the war obliged the government to concern itself with the effect these changes would have on the interests of the monarchy.

The cabinets at Vienna and Rome, he declared, were agreed on the future autonomous position of Albania, adding: "Our policy, like that of Italy, is based on that principle."

He hoped that the pourparlers now proceeding would result in the conclusion of hostilities and the speedy cessation of hostilities and the conclusion of peace.

"We have reasons," he said, "in presuming that the states at war will not overlook the legitimate interests of the other powers."

Trouble Over Consul.
Regarding the trouble which has arisen thru the alleged detention of the consul at Mitrovica, he said that the government had recently officially complained to the Austrian consul at Pilsen when Priessner was captured and asked that he be releasing him. To this reply was sent, expressing readiness to acquiesce in the complaint and asking that an opportunity be afforded for direct communication with him.

The Serbian Government replied that the military authorities objected to the consul at Mitrovica, who was deprived of liberty of action by the Serbian military authorities and refused to make a verbal report.

"It is probable," said the minister, "that Serbia will speedily comply with our demands, which from the standpoint of international law are fully justified, but we shall continue to press energetically for the restoration of normal communication with our representatives."

ELECTRIC FURNACES.
In the working of metals we now have the electric vacuum furnace, which carries us several hundred degrees higher than before. Beyond this, for many purposes, there is the furnace or crucible which, operating in hydrogen or in nitrogen and heated by a coil of tungsten or molybdenum wire, lets us melt practically anything.

At present this type of furnace is limited only by the material of which the crucibles are made, and can easily be carried up to a temperature at which all the well-known refractories melt so easily melt. When one reaches this our industries have always depended on what could be done by low a temperature of about 1600 deg. C.

Our new metallurgical processes and all our applications of heat have been influenced by this upper limit. We look forward to the next few years. Fundamentally new results ought to be anticipated.

VICTORIA L.O.L. 688

Members of the above Lodge are requested to assemble at the residence of our late Brother Jacob Squires, 121 South avenue, on Wednesday afternoon, Nov. 20, at 8 o'clock. Interment at Norway Cemetery.

J. W. McFARLANE, Recording Secretary.

Ontario's Vast Resources Greatest in the Dominion

Hon. W. H. Hearst Told Canadian Club of Wonderful Possibilities of the North Country, Where Gold and Silver Abound, Timber Can Be Had by the Billion Feet and Best Agricultural Land in Canada Is Found.

"The Dominion of Canada is blessed with wonderful assets. From the Atlantic to the Pacific, Nova Scotia has her splendid resources, Quebec her mighty St. Lawrence, the Columbia her splendid scenery and minerals, Saskatchewan her herds, Manitoba her splendid wheat, but to me the banner province of the Dominion is our province of Ontario, for we are blessed with a little of everything to be found elsewhere, with the exception of coal, the lack of which is made up by our wonderful hydro-electric power, which in time will, in addition to lighting, be utilized for heating purposes also."

Thus concluded Hon. W. H. Hearst, minister of lands, forest and mines, in a splendid address before the Canadian Club at their weekly luncheon yesterday. The speaker, taking for his text the land of the north country, continued himself mainly to that great wealth, undeveloped portion of it to the north, called New Ontario, in which there are yet 94,000,000 acres of land to be explored.

Mineral Wealth.
"One ounce in every seven of silver produced from the crumb of Ontario," declared the speaker, speaking of the mineral wealth of the province. There is abundant evidence that in New Ontario gold is to be found from Quebec on the east to Manitoba on the west. Forty

million acres of the province of Ontario are now being explored. "Nearly one-half of the timber cut in the Dominion is cut in Ontario and New Ontario there are billions of feet of valuable timber, the value of which can hardly be estimated from our present knowledge of the new country."

Speaking of the efforts of the government to establish pulp mills at various places in New Ontario, the speaker declared that nowhere in the world were there such favorable timber transportation facilities. "I am in-terested in the fact that at least a hundred navigable rivers between the mouth of the Moose and the mouth of the St. Lawrence, and that the whole can be floated to various mills. The speaker stated that he had been informed that the waters of the north country there was over 2,000,000 horse-

power within a short distance of the transcontinental railway.

Hydro-Electric Power.
"It is not a vast stretch of imagination to see in the near future our timber mills in operation by means of hydro-electric power. Not only our streets will be lighted by these means, but the water power will be harnessed and their grain will be threshed, and their farms plowed by the utilization of the same power," declared the speaker.

"This country is destined in the near future to become one of the greatest manufacturing centres in the whole of America. The purchasing power of the assets of the north country is today considerably over \$45,000,000."

Excellent Soil.
"A great many people, especially those in the cities of Ontario, have the idea that the land of the north country is not suitable for agricultural purposes. Let me tell you gentlemen that there is land there which will yield equal any soil in the world for excellent crops in production of grains of all kinds. One of my assistants has told me that in travelling thru this country he could pick out county after county in which there would not be one acre of waste land. But first, we must solve the problem of the best means of removing the timber, so as not to destroy the timber resources. We have to study just how we can cut the timber without hurting that which is not ripe. Certainly some of the land has to be cleared to make room for the settler, and some of the land will be mined. We are now doing our best to solve these problems."

Pioneers' Asset.
"Look at our vast waterways, from which we may secure unlimited electrical energy to turn the wheels of commerce. We have a splendid atmosphere in our splendid scenery, and we have the recreation grounds of the world. We have a splendid climate and a greater Canada, and develop our resources. It is our duty to work together for the benefit of the settler, and some of the land will be mined. We are now doing our best to solve these problems."

Imperial Labor Policy.
LONDON, Nov. 18.—(G.A.P.)—At a conference of the Labour party, which will be held in London in January, a proposal will be made that all labor parties of the British Empire should hold a convention "to consider a labor policy of imperial federation."

The conference will be held in London in January, a proposal will be made that all labor parties of the British Empire should hold a convention "to consider a labor policy of imperial federation."

New Time Record to Be Made Between Toronto and Montreal

Canadian Pacific is Rushing the Work of Double-Tracking the Line, and With Its Completion Freight Delays Also Will Be Eliminated.

The recent cutting of the time between Toronto and Montreal by the Grand Trunk Railway and the activity of the Canadian Northern in Eastern Ontario is responsible for a great deal being made by the Canadian Pacific Railway with its new lake shore line between Toronto and Glenora, Ont., four miles west of Perth.

A big effort is to be put forth to get this new C.P.R. line in Ontario completed before the close of the coming year.

A cut of half an hour or more in the time between here and Montreal will be given the C.P.R. by this new line's completion. Not only is the grade vastly superior to that on the line at present used between here and Glenora, but the distance is nine miles shorter, being 188 miles, as compared with 194 miles by the present route. This will cut the distance by C.P.R. between Toronto and Montreal from 333 to 323 miles.

Double Track Line.
What the construction officials of the C.P.R. consider of even more importance, however, is the fact that it will allow that road to double track the present line from Glenora into into a large number of separate gangs are working on the construction at short distances apart over the entire length of the new line. In this way it is hoped to get the completed double tracking the present old line between Glenora and Toronto. This opportunity will be brought about by the

diverging as much of the traffic as possible from the old line to the new, and quicker one on its completion. It is expected that with the way thus cleared for the work the double tracking of the last remaining portion of the line between Toronto and Montreal will be undertaken without delay.

New Time Record.
C.P.R. officials state that with the line double tracked to Montreal it will be possible for this railway to establish a new time record between the two Canadian cities. It will also do a great deal to remedy freight delays. The C.P.R. are reported to be anxious to get the double tracking of the line completed as soon as they can as with that accomplished nothing will be in the way of double-tracking the C.P.R. system thru Western Ontario to Windsor.

A proof of the C.P.R.'s anxiety to complete the lake shore line as quickly as possible is shown in the fact that instead of merely working from one end of the line or even from both ends as is sometimes done when railway construction is being pushed forward under rush orders, they have divided their construction force on this line into a large number of separate gangs and are working on the construction at short distances apart over the entire length of the new line. In this way it is hoped to get the completed double tracking the present old line between Glenora and Toronto. This opportunity will be brought about by the
