Sale of "B. C." Mine.

The sale of the well-known "B. C." mine in Summit Camp, Boundary Country, B.C., seems to liave been consummated. Clarence McCuaig and R. G. E. Leckie engineered the purchase on behalf of the Montreal Gold Fields Co., which corporation takes over the property for \$300,000, paying \$50,000 cash down. The B.C. was discovered in the summer of 1807, and was purchased by Messrs. Harrison and Barchard on behalf of themselves and some English friends. On the surface there was an excellent showing of chalcopyrite, running high in copper, which, when stripped in an open cut, was found to be fully 20 feet wide. In fact, this high-grade copper ore, carrying good values in gold and silver, continued from the grass roots, and the values at the bottom of the 160-foot vertical shaft show practically the same high-grade ore. Dritting has been done on the 50 and 160-foot evers to the extent of about 200 feet, and considerable boddes of high-grade ore biocked out, and the mine contains large reserves of ore of lower grade, which will yet by treated at a profit.
