## **CANADIAN DOLLAR** AT LOWEST LEVEL

Discount in New York Nearly 13 Per Cent.—Currency Position Relatively Strong.

With the pound sterling down to the fevel of little more than \$3.43 in New York yesterday, the Canadian dollar was naturally influenced, and local remittances on New York yesterday rose to the premium of 12% per cent., as compared with a previous high of about 12% per cent.

the premium of 12% 'per cent., as compared with a previous high of about 12% per cent.

In connection with the exchange situation there is some timely comment in The Monthly Review, issued by Greenshields & Co., Montreal, as follows:

"Our currency position is relatively strong, and is only a minor influence in the high cost of living at home and the depreciation of our dollar at New York.

"If from the proceeds of the last Victory loan, for instance, the Dominion government had seen fit to set aside a sum sufficient to retire the whole excess issue of Dominion notes—quite a feasible operation—what results would have followed? Possibly, for one thing, a slight lowering in the cost of living at home. The ability of the government to grant credits to foreign buyers of Canadian products would have been restricted, if not destroyed, for the time being. That would have left a surplus of certain products to be absorbed by the home market with two probable results of mixed benefit—a decline in prices and an increase in unemployment in the industries affected.

# **ONTARIO REMOTE**

Formation of Great Gold-Bearing Veins One of the Continent. Nature's Great Wonders.

> This is a very old world. It is now pelieved that life began in a warm sea 1,000,000,000 years ago, and about this that the royal metal was brought into the existing veins by eruptions of granite and syenite during the Algoman

iy 1,000,000,000 years.

Geologists believe that there was an age of gold long prior to the Algoman epoch. But the veins of this remoter age have been largely weathered away. We are now dealing with a lower horizon in the earth's crust. The Timiskaming series of clastic rocks have been formed of the broken fragments of earlier rocks, and even this series antedates our present age of gold. From this the great extent of surface degradation can be seen. These mighty forces have given no consideration to the element of time.

The Algoman epoch is comparatively recent when compared with that remote period when the keewatin lavas were ejected and the crust of the earth solidified. But in the United States and most other parts of the world the epoch of gold deposition was long after the Algoman. It synchronized with the mountainmaking of the Tertiary age, when the Rockies and the Andes were formed.

There is one great difference between the gold deposits of the Algoman and the Tertiary ages. The former are deepseated; the latter are not. In fact, all the great gold mines of the world belong to the older metallogenetic epochs. Then we had a globe still very hot, and the forces active in concentrating the gold were very strong. They had a long time in which to operate, and the work of collecting the gold was very effectively done.

Nature works without haste, but

Nature works without haste, without rest, and nothing in her vast operations is more wonderful than the formation of great gold-bearing veins.

#### **OUEBEC TAKES KEEN** INTEREST IN ELECTIONS

Quebec, Que., Feb. 2.-Keen interest is being manifested in the forthcoming municipal elections, and the prospects are that there will be contests for the mayoralty and in every aldermanic seat.

Mayor Lavigueur will have as his opponent Joseph Samson, a wholesale hardware dealer, who is a former member of the city council. Both are organizing for the campaign, but no public meetings have yet been held. The nomination will take place on the 9th instant and the voting on the PROF. PULLING HURT.

Fredericton, N. B., Feb. 2.—Prof. Pulling, of the faculty of the University of New Brunswick, was painfully injured yesterday morning, when his kitchen range, the water front of which had been frozen, exploded when a fire was lighted in it.

#### The Sterling Bank of Canada
