AWAITS REPORT

N. B. Government Likely to be Guided by Result of Power

Conference

Representatives of the Internation Pulp and Paper Co., Itd., the Bathurst Company, Ltd., and Fraser's, Ltd., were scheduled to meet in Montreal yester-day in conference over the proposed hydro electric development at Grand Falls. It was expected this would be followed by a report of the proceed-ings to the Provincial Government for consideration. No report of the meet-ing had reached the city today.

QUANTITY AND TERMS

Roof Instead of The Other Fellow's?

O^F every three carloads of Canadian wheat which leave the prairies for the Atlantic seaboard, two carloads find their way over Canadian and American railways to American

Within the last few years Canadian wheat, thus diverted, has poured out millions of dollars in employment to American labor, and added greatly to the population of American cen-tres, while our own ports are languishing and our own people have been leaving this country through lack of employment.

It is at an enormous cost to ourselves that we are thus shingling the other fellow's roof. It is root time that we be-gan to put Canadian shingles on Canadian roofs in this mat-ter of traffic.

IN actual transportation charges alone, this diverted wheat traffic means that from \$12,000,000 to \$16,000,000 a year Canadian money, which should be spent in Canada, on our own ports and railways, giving employment to our own people, and providing business for our own merchants has been going to enrich our competitors. That is only the bare transportation charges. We must add to that \$16,000,000 the amount in wages and expendi-tures which are included and the the most bad

tures which we would enjoy if our own railways and ports had this additional business.

And while our National railways are being employed to this alarming extent to build up New York, Buffalo, Port-land, Baltimore, Boston and Norfolk, every Canadian is be-ing taxed to make good the C. N. R. deficits which run into \$50,000,000 a year. * * * * * *

CANADA made provision against this situation years ago when it invested \$170,000,000 in the Transcontinental. That railway was built to a higher standard of construction than any railway of like length on this Continent in order Continued on Page 5.

solidated profit and loss account for the year, remarks as follows:

"The net cost of the properties of the constituent and subsidiary com-prises increased during the year, by the sum of \$1,065,534. The total ex-penditure for additions and improve-ments was \$2,190,195 and the amount. reserved for depreciation, depletion and renewals was \$1,124,660, bringing the total amount of these reserves up to \$29,266,918, which is approximately 211-2 per cent. of the net cost of properties as shown on the balance sheet.

DEBT REDUCED.

"The aggregate amount of the fund-ed and mostgage debts against these properties, was reduced during the rear by the sum of \$117,900. New se-urities in the form of 10-year serial quipment bonds, were issued for \$450,-00 to provide part of the cost of recessary new rolling stock for the ydney and Louisburg Railway, and onds of the par value of \$657,900 rere redeemed through the operation f the several sinking funds. The total mount of bonds, debentures and de-enture stock outstanding on the 81st f December, 1924, was \$87,682,295 or lightly less than 28 per cent. of the et cost of properties as shown by the alance sheet. Although this is only a fractional ate amount of the fu

NEW YORK, Nev. 24—A new form of "bootlegging" has arisen from the spectacular Rhinelander trial at White Plains. Along Broadway last night ratty, furtive little men were vending sotta voce the famous "mystery" let-ters written by Leonard Rhinelander to his wife, which described in unprint-able detail their relations. "Here y'are: Kip's love-notes, abso-lutely unexpurgated" was the cry of the bootleggers. There was a good sale at \$1 a copy.

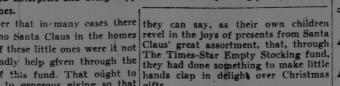

SYNOPSIS – A disturbance, which developed yesterday on the Middle Atlantic Coast, has moved northeastward to the Gulf of St, Lawrence, with increasing energy, while pressure has increased over northwestern Canada. Rain has fallen in the Maritime Provinces, and light snow has occurred in Northern Alberta and the Lake Superior districts, elsewhere, the weather has been fair. FORECASTS:

Snow Flurries.

MARITIME—Strond winds and gales from west and northwest; somewhat colder, with local show-ers and snow flurries. Wednesday. westerly winds, mostly fair and rather cold. NEW ENGLAND—Fair tonight and tomorrow, rising temperature. Wednesday: Fresh, possibly strong northwest and west winds.
