DISCUSS HALIFAX TRAIN SERVICE

C. N. R. Officials Meet the
Board of Trade—Altern-
atives Suggested.

The question of proposed curtailment in the Canadian National Railways service between St. John and Halifax was discussed yesterday afternoon at a meeting of the Board of Trade council, the transportation committee of the Board of Trade, A. T. Weldon, of Moncton, traffic manager for the Atlantic Region of the C. N. R., and A. C. Barker, superintendent of transportation in this district. The transportation committee had formerly entered a protest against the proposed cancellation of trains No. 9, arriving here at 6:40 o'clock a. m. (standard time) from Halifax, and No. 10 leaving here at 10:25 p. m. A similar protest had also been entered by Halifax parties and had been discussed with them.

No decision was reached yesterday, the matter requiring the attention of the company's headquarters in Montreal before anything final could be arranged. Several suggestions were made however.

One idea receiving some approval suggested as follows: The train leaving here at 6:10 p. m. to carry a sleeper which would be detached at Moncton and picked up by the train through from Montreal, reaching Halifax at about 8:45 o'clock the next morning and the train leaving Halifax at about 8 o'clock in the afternoon to take sleeper, mail, baggage and express cars to Moncton where they would be picked up by the light freight arriving here at 8:50 the following morning.

The matter of the petition for a daily train on the St. John & Quebec Rail-

way (Valley) between Gagetown and St. John was also discussed and it was reported that such a train would not be possible at the present time. It was suggested by the railway representatives that the question be discussed with L. E. Whittaker, of the Maritime Outing Association, originators of the petition. A suggestion was made that a train from Fredericton to Westfield and return might connect with the Canadian Pacific Railway at the latter station. Nothing definite was decided upon but further discussion is probable and some workable suggestion may be adopted.
