best and most successful men are those doing hospital work, and the best students are those who spend as much time as is consistent with proper attention to their other work, in reporting and dressing in hospital wards.

The Western Hospital (50 beds) is attended by a staff of eight-physicians, most of whom are members of this Faculty. It is the only special Hospital for diseases of women in the Dominion.

The various gynecological operations are frequently performed. The large number of successful abdominal sections which have occurred in this Institution has afforded abundant opportunities for witnessing the recent advances in abdominal surgery. Members of the staff are in attendance daily at 12 noon, at which hour clinics are held, which furnish advantages to students desirous of successfully studying uterine and other diseases peculiar to women. The position of Resident House surgeon is open to senior students of the college.

The Lying-in department of the Western Hospital is entirely under the control of Bishop's College, and is directly under the superintendence of the Professor of Obstetrics, and from the large number of patients admitted affords greater facilities for acquiring a practical knowledge of midwifery than can be obtained in any other

medical school in Canada.

The Montreal General Hospital (200 beds) is situated within a few minutes walk of the College, and is visited daily by two physicians and two surgeons, besides two ophthalmic surgeons, two gynecologists and a laryngologist. This is essentially an acute hospital, as evidenced by the large number of patients treated annually,-2553 Medical and Surgical, besides an out-door attendance of about 13,000 per annum. It affords equal advantages to students of all Medical colleges for obtaining a practical knowledge in every department of Medicine and Surgery. A wing used as a Children's Hospital will also greatly assist students in the study of diseases of children. A special department for the treatment of diseases of the eye and ear, under the care of the Ophthalmic Surgeons, affords students facilities for their study. The large number of out-patients enables the physicians in attendance to impart instruction, by selecting cases for demonstration presenting a variety of symptoms and points of comparison and con-Practice can be obtained in auscultation and other means of Physical Diagnosis. Clinical instruction is given daily and all
