We now recognize how intimately teenth century surroundings pre- Koppes - Under the provisions general health conditions are vail. We have seen it in recent of Sec. 201 of the R. M. Act. a bound up with the social, moral years in India with the plague, grant of \$100,60 be made to the and public life of every commutation. Let me give you a description of Fort Qu Appelle Hospital and a nity or country. In some lines the affected district in Bombay cheque forward to the Minister Nomination of Counce there has been progress, for instance, in the control of Typhoid conditions of the poorer native same, as provided by the act. Fever, Diphtheria, and Tuber- quarters defy description; over culosis, and in each case lessening crowding, swarming with the The council adjourned to asthe death rate, but to a great accumulated filth of years, poor semble at the call of the Secreextent we are still marking time sewerage or mostly none at all, fary, because the medical profession huts with bamboo walls plastered has not had the support that it with cow dung or filthy much should have had from the public. earthen floor covered with food The Doctor is blamed for so remants, the urine and faeces many things, he is often accused of being too high in his charges, of wishing to see people sick. Good readers of this paper, did you ever stop to think that the one great purpose of each and every doctor is to combat disease, to try and stop the spread of epidemics, when he could, from a monetary consideration, let them go, and he would be much better fixed financially at the end of the year? People demand that they be protected, but they will often attempt to fight the protective measures. For example they do not wish to submit to vaccination. Much of this opposition, I will grant, comes from ignorance and in some cases from gentimental and religious grounds.

If we turn back the pages of history we find that, in nearly all countries and among most peoples, epidemics of disease of this paper, did to this a poor diet, often does in the floor, and the lindon and the councillors and the Reeven destroics and the Reeven destroi The Doctor is blamed for so remnants, the urine and faeces many things, he is often accused deposited in holes in the floor.

old code of health is that known as the Mosaic Code, found in the Book of Leviticus. Here we have rules regulating the kinds of foods to be eaten and its preparation. So that they may learn the negative of leviting of levi

Little is known of any larger sanitary measures, such as public water supplies and sewers, carried pure water supply and built an aqueduct to caary the same to the city from over thirty miles away. Then too there was the great sewer, the "cloaca maxima" Road work, 397.87; Weeds 3.90: Canadian National Railways.
