WHY THEY WANT OUR PULPWOOD

Consumption of newspaper paper in the United States has increased 21 per cent. in the last five years, during which period domestic production of the commodity has shown a gain of only 5 per cent., according to a survey of the newspaper paper situation published in the May Commerce Monthly, the magazine of the National Bank of Commerce in New York. Although the present acute newspaper shortage is partly due to greatly increased use of paper in newspaper advertising, this lack of a normal increase in production is one of the principal causes of the stringency, the bank says.

In 1909, it is pointed out, the United States produced all the newspaper paper it used, but by 1919 it had become dependent on foreign sources for one-third of its supply. Between 1899 and 1904 production increased 60 per cent. But between 1904 and 1919 the increase amounted only to 45 per cent.

"Canada's recent development as a newspaper producer has been much more marked than our own," the article states. "While only one plant has been constructed in the United States since 1909, Canada has increased her pulp mills by 67 per cent. in that time. Her production in 1917 was 689,847 short tons as compared with 1,359,012 in the United States. Canada uses between 10 and 15 per cent. of her own production and exports the rest almost entirely to the United States. Most of our foreign supplies come from Canada, but small amounts are also imported from Norway and Sweden."

Although imports of newspaper paper increased 98 per cent. in the last five years, this country's exports during the same period increased 61 per cent. Argentina has the countries of the world in purchasing newspaper paper from the United States. During 1919 this country exported nearly a sixth as much newspaper as it imported.

ALIENISTS TO STUDY DEAD CROOK'S BRAIN

Chicago Medical Men to Examine the Body of James J. Harrigan.

Chicago, April 30—One of the most unusual conventions in the history of Chicago will be held in about thirty days. At that time the body of James Harrigan, "gentleman crook," of practically every known branch of crime, will be turned over to the Chicago Demonstration Association. This association is composed of a group of medical colleges and the body will be used for anatomical purposes.

The career of Harrigan, which has been unfolded through investigations by the police as one of the most remarkable in history of local crime, has received widespread publicity. The criminologists, alienists, students of psychology and members of the medical profession have manifested a keen interest in the possibility of viewing the man's brain and studying, as near as possible through modern methods of science, the man's thoughts during life.

It seems improbable now that Harrigan, who lived by the gun and died by the gun, will escape the knife. No relatives have appeared to claim the body. It has been at the Alvarado Brothers' Hospital since Monday morning, when the man died. The only person to show an interest in Harrigan's death was Mrs. Ida Needham, who commended herself to her by his "gentlemanly" manners, had proposed to her on several occasions. She visited the hospital and shed a tear, but as yet has not shown a disposition to save the body from the Potter's Field.

The law of the county is that unless bodies are claimed within thirty days they pass to the medical association. Dr. Irving M. Perrill, president of the Demonstrators Association, said Harrigan would be the first criminal to come into the hands of the association. He said he was sure of an examination of the body by the association would prove invaluable to criminal science.

"It is a mystery why a man surrounded with priceless jewels and valuables should live on 60 cents a day," said Dr. Perrill. "The convolutions of his brain will show not dollar marks, but evidences that he was a modern Scrooge and I hope no relative puts in an appearance to claim his body."
