

RAILROAD GRANT ENDS

Half Million Acres of Land May Be Thrown Open in May.

Nelson & Fort Sheppard Tax Exemption Expires.

What will the Nelson & Fort Sheppard railroad company do with its enormous land reserve in this district when the exemption from taxation expires on May 15 next? This question is now being asked by those who understand the situation in which matters stand, and it branches an interesting line of thought.

In 1893 the Nelson & Fort Sheppard railroad received from the government a land grant of 600,000 acres in consideration of the construction of the road from Nelson to Waneta. The condition under which the grant was made was that at the expiration of ten years the land would bear taxes or revert to the crown. The decade stipulated expires three months hence, and it will then be up to the railroad company to elect as to whether it will pay taxes or permit the ground to go back to the government.

A SMALL EMPIRE.

The area embraced within the N. & F. S. reserve is large. Surrounding Rossland is a block sixteen miles from east to west and seven miles from north to south, while directly north of the city is a plot comprising seven square miles—all railroad reserve. The main track commences at a point six miles due north of Waneta, and runs for twenty-six miles north. Taking Nelson as the northern corner, the track branches all the territory between the lake and the line running east and north from Waneta. On the sides of the Nelson & Fort Sheppard line the railroad lands extend for miles. At Waneta there is a twelve-mile stretch to the west, at Salmon the tract is four miles wide to the west and twenty-eight miles wide to the east, at Ymir the area is seventeen miles wide to the west and twenty-one miles wide to the east, at Hall the railroad owns the lands for sixteen miles to the west and nineteen miles to the east, while from Nelson the reserve stretches for twelve miles to the east. In all there are twenty-eight townships, each six miles square.

A SMALL PART SOLD.

Of the 600,000 acres thus turned over to the railroad company only a trifling acreage has been sold. The land is mountainous throughout. It possesses fine stretches of timber, however, and recently large plots have been sold for the lumber they carried. In some sections, where the hills divide, there are sections of level ground unequalled in the world for agricultural purposes, but these stretches are comparatively few and far between. The presence of mineral throughout the district gives the area a value which it would not otherwise have, but the mineral resources of the reserve have not yet been exploited to any material extent, outside of the Ymir and other well known sections, consequently the company's surface rights have not been a particularly lucrative asset. The total land sales are probably not over 50,000 acres, and there are at least half a million acres on which the railroad will have to pay taxes annually if it decides to retain its privileges.

The land sold has ranged in price to the purchaser from fifty cents per acre up. Timber ranges have usually brought in the neighborhood of \$5 per acre and choice sections of arable land have been sold at a higher price. In its effort to realize as largely as possible the railroad has sold land at a low price compared to the government figure, which is placed at \$5 per acre by statute. Should the railroad abandon its reserve on May 15 the latter price will prevail for the future.

In some quarters it is believed that the Nelson & Fort Sheppard will not abandon the reserve, but will pay taxes thereon, relying on the proceeds from sales to retain the tract without any cash outlay. The outcome will be watched with interest, however.

COUNTY COURT.

Judge Forin Devotes Himself to Chamber Applications.

(From Friday's Daily.)

The greater part of yesterday was devoted by Judge Forin to the hearing of several interesting chamber applications. The applications were merely forerunners to the suits themselves, which came up at the February sittings of the supreme court in this city. Judge Forin contented himself with inquiring into the main reasons advanced in the applications, and in a majority of cases, granting the applications. The applications heard were as follows:

Owens vs. Owens; application for leave to deliver statement of claim. Order made, with costs. W. J. Nelson for plaintiff; J. A. Macdonald for defendant.

Dundee vs. Farwell et al. In this case there were two applications made. The first application was to deliver certain interrogatories to defendant Temple, and the second was to deliver a statement of claim. The order was made in both applications. J. A. Macdonald for plaintiff.

E. Noise vs. R. W. Grigor. In this case the defendant made an application for an order of discovery. The order was made. J. A. Macdonald for defendant; A. C. Galt for plaintiff.

J. R. Meyers vs. Manly, Klockmann et al.; two applications for order of discovery. Orders made. W. S. Deacon

for defendants; J. A. Macdonald for plaintiff.

Hastings vs. Le Roi No. 2. Application was made for particulars as to certain negligent fellow-workmen and for particulars of negligence. The orders were made.

Alice Morton vs. Nettie H. Platt. A small debts case. Order applied for granted. J. A. Macdonald for application; J. S. Clute, contra.

Marie Dempster vs. Salmo Gold Mining & Development Co. Application made by defendants in counter claim for an order that the plaintiff deliver certain paragraphs of defence. Application dismissed. C. R. Hamilton appeared for the application, J. A. Macdonald contra.

THE TOBOGGAN SLIDE

MOST INTERESTING, THRILLING AND DIVERTING OF THE CARNIVAL. WASHINGTON IS THE IDEAL STREET OF THE CITY FOR SUCH A SLIDE.

What promises to be one of the most thrilling, interesting and diverting features of the carnival this winter, is the great toboggan slide down Washington street. The slide will be made under the direction of one of the engineers in this city, and will be patterned after the style of the slides in Montreal, Quebec and other Eastern Canadian cities. These slides have become famous the world over, and a winter carnival in Eastern Canada would be thought tame without them.

Washington street is the ideal street of the city for such a slide. With its incline and steep grades, it should make a ride down it on a Canadian toboggan a most interesting and exciting pastime. The street will, of course, be rolled if necessary and made into as fast a toboggan slide as possible. At the head of the course, at the intersection of Columbia avenue and Washington street, a structure will be erected by the carnival committee which will greatly increase the speed of the tobogganists. The structure will afford an incline of nearly thirty degrees to start with, so that the speed to be attained by the tobogganists after the start from the platform will be in the neighborhood of a mile a minute. Whether this speed can be exceeded or not will depend upon the kind of weather the city is favored with during the carnival period.

There will be no danger in such a slide as is contemplated, though there will be a glorious spice of excitement. It will be perfectly suited to ladies, who can excel at the sport as easily as men. The toboggans in the hands of the carnival committee are six feet long, and built of the lightest and toughest laths, with a curved prow before with two supple, thin wood runners beneath. They were brought to this city from Winnipeg and were the best to be had in Canada.

THE SNOWSHOE CLUB.

A Night Illuminated Patrol and a Sham Battle.

That the carnival will have many interesting and novel features is well understood by the people of Rossland. Among the features so far announced is a picturesque evening parade of the snowshoers of the city up and around the trails to the summit of Monte Cristo mountain.

J. Stephen Deschamps, the head of the snowshoe club, returned yesterday from a trip up Kootenay lake. He will have charge of the snowshoe brigade. His plans are to make this evening one of the banner features of the carnival. His snowshoe club at the present time numbers in the neighborhood of 100 members, which will be considerably augmented by the time the carnival takes place.

The snowshoers will probably wear a special costume for the occasion. Just what the costume will be has not been decided, but it is planned to be novel and taking in the way of dress, but serviceable as wearing apparel as well. The manner of costuming will probably be brought up at the next meeting of the committee.

The plans of Mr. Deschamps at present are somewhat limited. In order to facilitate matters and further an organization of local knights of the snowshoe, he has issued a call for snowshoers to take place at the rink at 2 o'clock Sunday afternoon next. After the meeting the snowshoers will form in line for their first trip to the summit of Monte Cristo mountain. This will be done in order to get the snowshoers familiar with the ground that they will have to traverse on the nights of the carnival.

It is understood that a sham battle on the slopes of Monte Cristo mountain will also be a portion of the program that will be followed out by the snowshoers. The snowshoers, on arriving at the scene of battle, will suddenly extinguish their torches and form in two separate companies. At a given signal, the two companies will advance upon one another, firing away as they advance. The spectacle will undoubtedly prove a strong drawing card.

REHEARSE "JANE"

That "Jane" will be produced by the Rossland Amateur Dramatic club in a manner that will do credit to that organization is now an assured fact. The club, under the direction of Stage Manager W. J. Nelson, has held another rehearsal at the opera house. Members of the cast are letter-perfect in their respective parts and may be expected to make a good impression when the piece is produced before a Rossland audience. Already there is a demand for seats for the first night. Mayor Dean has subscribed for a couple of front boxes, and other citizens are doing the same. The piece will probably be produced a few days previous to the carnival, although no date has yet been set.

R. A. Bainbridge, of the C. P. R., arrived in the city last night from Nelson.

CUT ALDERMANIC PAY

MAYOR DEAN INCLUDES THIS IN PROGRAM OF MUNICIPAL ECONOMIES.

PROPOSES TO MEMBERS OF COUNCIL ONLY \$150 PER ANNUM.

Mayor Dean includes in his list of civic economies a reduction in aldermanic salaries, whereby the corporation will be saved \$900 per annum, or one-half the amount formerly paid to aldermen. His program calls for other reductions in the cost of administering the city's revenues, but he regards the cut in aldermanic allowances as one which should be accepted without dispute.

Mayor Dean is strongly of opinion that forthrightly meetings are ample to handle the city's business satisfactorily, and in support of this position quotes the fact that last year the average duration of council meetings was from fifteen to twenty minutes. The aldermen received for this service \$300 per annum, or on the basis of fifty meetings during the year, \$6 per night for attending at the city hall not more than an hour. He contends that this remuneration is out of all proportion to the service rendered.

In view of the foregoing Mayor Dean advocates forthrightly meetings, with a reduction of one-half in aldermanic salaries. This would make the remuneration for the members of the council \$1250 per month, of \$150 per annum.

The attitude of the aldermen on this point will be watched with keen interest. Of the new members, Alderman McKelhan stated on the platform in ante-election days that if elected he would expect salary at the rate of \$300 per annum. Alderman Talbot has not put himself on record. The old members of the board were paid last year, but they have not expressed themselves on the subject of salaries for 1903.

CIVIC SCHOOL BILL

TRUSTEES WILL ASK FOR \$13,250 TO OPERATE SCHOOLS THIS YEAR.

ONLY TRIFLE MORE THAN 1902—COUNCIL WILL HAVE TO RUSTLE.

The estimates of the board of school trustees have been drawn by the clerk and will be taken up at a special meeting of the new board to be held prior to the next council meeting. The meeting will probably be held on Monday, in order that the estimates as finally adopted may be in the hands of the city council before February 1, as required by statute.

According to the first draft of expenditures for the ensuing twelve months the sum of \$13,250 will be required for the ordinary running expenses of the schools as fixed by statute. A further sum of \$550 is asked on account of leveling grounds at the Cook avenue school, and as the council of 1902 received the sum of \$4000 for the completion of the building in question, the trustees have little doubt that the extra amount will be forthcoming, although the council has the power to strike it out of the estimates.

Under the caption of teachers' salaries the sum of \$10,475 is required. The janitors require \$1460, and \$60 for the secretary brings the total for salaries to \$12,995.

Incidental expenses total up \$1371, divided as follows: Fuel, \$700; supplies and repairs, \$400; water, \$95; sanitary work, \$100; reference library, \$75. The total thus piled up on ordinary expense account is \$13,366, exclusive of the \$550 asked for an extraordinary account.

Last year the expenditure on salaries was \$10,047 for teachers and \$1380 for janitors, making the sum asked for under this head almost \$600 greater. Incidental are reduced in the estimate for this year, so that the comparison of the actual outlay for 1902 and the estimated total for 1903 shows an increase this year of only \$253.

Based on the receipts for last year, the city will have to provide about \$6000 more than was raised locally last year. It will be this feature of the problem that will occasion the city fathers hard thinking.

A MOTHER'S CARE.

Every mother knows the constant care a little child requires, and to the young and inexperienced mother who is caring for her first baby there is no other period in her life more trying. In the little hills that are certain to come to all infants and young children, the mother especially the young and inexperienced mother—scarcely knows what to do. It is to meet emergencies of this kind that Baby's Own Tablets are offered to all mothers. These tablets are an absolute cure for all the minor ailments of the little ones, and should constantly be kept in every home where there are young children. Sickness comes quickly with Baby's Own Tablets at hand and the emergency is promptly met. Mrs. R. E. LaRue, Mountain, Ont., says: "I can recommend Baby's Own Tablets to all mothers who have cross or delicate children. I do not know how I could get along without them." The Tablets are guaranteed free from opiates or harmful drugs, and crushed to a powder may be administered with absolute safety to a new born babe. Sold by all druggists or sent by mail at 25 cents a box by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont.

James Hunter, of Hunter Bros., returned the other day from a trip to the health springs at Paso Robles, California. Mr. Hunter is much improved in health as a result of his sojourn in the Golden State.

TO UNITE ROSSLAND

Agreed That Miner's Plan For Board of Trade Is Excellent.

Trades Unions Willing to Help Build Up Community's Future.

(From Sunday's Daily.)

The Miner's suggestion as to methods of stimulating fresh vigor into the Rossland board of trade and enabling that valuable organization to more effectively promote the ends for which it purports to exist has been widely discussed and generally approved. To reach its full fruition the board of trade must be representative of the community as a whole, and it was vigorous action toward this end that The Miner recommended.

A solid Rossland has much to expect from the immediate future, and it is realized that a genuinely representative board of trade can accomplish much toward establishing the solidarity essential to the idea should be followed up and put into effect at the earliest possible date is the sentiment of prominent business men and others who have expressed themselves on the subject.

An important feature of The Miner's presentation of the board of trade's plan was that relating to the representation on the board of trades unions. An effort was made to sound the executive officers of local unions yesterday on the subject, and it was ascertained that organized labor would undoubtedly take up the idea willingly and join with other classes in promoting the general interest of the community. Practically the only trades unions existing in Rossland today are the Miners' Union and the Typographical Union, and officers of these unions do not hesitate to pronounce favorably on the idea of having their associations represented on the board of trade.

"I certainly believe the suggestion is an excellent one, and will bring it before our people at the next meeting, or the session immediately following, if it develops that our docket of business for Wednesday next is heavy," said M. P. Villeneuve, Secretary of Rossland Miners' Union, No. 38. "If I mistake not a similar suggestion was made a couple of years ago, but I am not aware that anything ever came of it at that time. We have felt that the board of trade was not really representative of the entire city, and that if our organization was represented we could follow with greater accuracy the course of events at board meetings. Moreover, our representative would be in a position to afford the other members of the board of trade information along certain lines that would be of considerable value in certain respects. An important feature is that such a move would naturally tend to create a feeling of confidence between the class of workmen which our union represents and the business men on the board of trade, and I take it that the creation of such a feeling would be a decided step in advance. It goes without saying that with all matters affecting the prosperity of Rossland and the upbuilding of its industries and business enterprises, the Miners' Union has the heartiest sympathy—a natural condition in view of the incontrovertible fact that our interests are identical with those of every other resident and property owner in the community. I am of opinion that the idea should be adopted, and believe it will contribute toward the end which The Miner has outlined."

"I have not given the question the attention it merits from the viewpoint of the union," said John P. Barkdill, secretary of Rossland Typographical Union, No. 335, "but I will be glad to bring it up at our next meeting, and believe that the members will be willing to consider the suggestion as sending a representative to the board of trade of co-operating in any way with the movement to promote the city's commercial interests. This is somewhat out of our line as a typographical union, but we are always citizens of Rossland, and therefore keenly interested in its progress and prosperity."

With these two unions represented on the board of trade it may be taken for granted that other labor organizations as formed will fall in line.

Charles O. Lalonde, ex-president of the board, cordially coincides with The Miner's proposition, and states that a couple of years ago he made some advances toward securing the president of the Miners' Union as a member of the board. Mr. Lalonde is of opinion that similar strong efforts should be made to secure members of the Retail Grocers' Association on the board of trade, remarking that on a previous occasion steps were taken in this direction with partial success only.

Charles E. Jackson makes a suggestion that should appeal to the board of trade. After expressing his approval of the Miner's plan for increasing the usefulness and scope of the board of trade, he proposes that the annual dues of the board should be changed to quarterly or monthly dues on the ground that many business men would keep their membership who now permit dues to lapse and then remain away from board meetings.

Mayor Dean has an idea that the Miner's plan for increasing the usefulness and scope of the board of trade, he proposes that the annual dues of the board should be changed to quarterly or monthly dues on the ground that many business men would keep their membership who now permit dues to lapse and then remain away from board meetings.

Mayor Dean has an idea that the Miner's plan for increasing the usefulness and scope of the board of trade, he proposes that the annual dues of the board should be changed to quarterly or monthly dues on the ground that many business men would keep their membership who now permit dues to lapse and then remain away from board meetings.

The proposal advanced by The Miner has the approval of Arthur S. Goodwin, Charles M. Oliver, E. W. Ruff, Henry

Ewert, T. Russell Morrow, J. Binn Johnson, Dr. Kenning, J. Stephen Deschamps, O. M. Fox, Frank Empey, M. J. O'Hearn, Colonel King, Lorne Campbell, J. S. C. Fraser, G. W. McBride, Harry McIntosh, Edwin Durant, J. Morris, Robert Hunter, Dr. Coulthard, J. H. Robinson, Dave Morgan, George Urquhart, George H. Bayne, H. B. Smith, J. S. Clute, Alderman Daniel, Alderman Armstrong and many others. It will doubtless be considered at an early session of the organization.

THE END OF BONSPIEL

NELSON TAKES HUDSONS BAY AND TUCKETT DISTRICT TROPHY EVENTS.

ROSSLAND LOSES IN CONTEST AGAINST NELSON IN GREATEST GAME PLAYED.

(From Sunday's Daily.)

The fifth annual bonspiel of the Kootenay Curling association came to a close yesterday afternoon, when the Nelson and Tackett District Trophy events were played off. Nelson captured both events after hard struggles. As the result of the bonspiel Rossland rinks have won but two trophies, that of the Walkerville competition and the Consolation. In the latter event no outside rinks have entered, as all visiting rinks have come in either first or have taken second prizes. The Phoenix rink, under the able skipper of R. B. Boucher, captured the main events of the tourney, that of the Oliver Cup and the New York Life Grand Challenge Cup. In both of these competitions the outside rinks tried hard to get a place, but Boucher's rink proved too strong. Greenwood took the Mackintosh Cup, or All-Comers' event, after a long uphill fight, while Nelson takes home with them the Hudsons Bay Cup and the Tackett trophy.

There has probably never been a closer contest for any one prize than the contest yesterday between the rinks of Nelson and Rossland over the Tackett District trophy. The game started off practically even, although at the conclusion of the ninth end Rossland stood three points ahead of the Nelson rink, the score being 7 to 4. In the next end, however, Tamblin's men did some star playing and evened up matters. After that it was a case of knocking each other's stones out of the house. Rossland, through some great work of Fraser, McQueen, Rolfe and Pretty, managed to make two scores in the eleventh end. Tamblin came back strong in the twelfth end and again evened the score. The thirteenth end opened up with Rossland playing strong. McQueen, Rolfe, Pretty and Fraser played well and had at one time three stones in the house, all of which Nelson managed to knock out. Fraser and McQueen did the same with the Nelson stones, so that the end closed with no scores either way. In the fourteenth end Rolfe unfortunately placed a stone as a guard in front of a Nelson stone, which practically won the match for the Nelson rink. The stone acted as an excellent guard and to make matters worse, Nelson placed another guard in front of Rolfe's stone. Nelson got another stone in the tee, which J. S. C. Fraser managed to knock out. The other stone was too well guarded, however, although McQueen tried hard to get at it, it remained untouched. Nelson winning the match by the score of 10 to 9.

In this match Tamblin played the strongest, although he was ably backed up by the men composing his rink. It was his stones that practically won the match for the Nelson rink. In the thirteenth end Rossland had every chance to make a score, but Tamblin spoiled the outlook by some really excellent shots. Fraser played probably the strongest game of the Rossland rink, although McQueen, Pretty and Rolfe also did their share toward making the contest one of the most interesting played during the bonspiel.

Nelson, under Richardson, had a hard time beating the Revelstoke players in the Hudsons Bay contest. The score at the close was 13 to 12 in Nelson's favor. The Revelstoke men put up every inch as good a game as the Nelson men, but were beaten out at the last end. The Nelson players left for their homes last night. The Revelstoke leave tonight.

THE HOSPITAL.

The Good Sisters Have Only a Few Patients Under Their Care.

Never before in the history of the Sisters' hospital has there been so few patients domiciled at the institution as there are at present. In times past wards have been crowded with the sick and maimed, but now only four rooms are occupied by patients. These four are men on the high road to recovery, and they will probably be released from the hospital within the next two or three weeks as cured.

The only dangerous case that has been brought to the hospital in the past three weeks was that of W. R. Jean, who died of typhoid fever three days after being brought there. The most dangerously sick patient occupying a cot at the hospital now is Thomas Fitzmorris, who is slowly recovering from an attack of paralysis. Fitzmorris is able to walk around the corridors and expects to be discharged within the next two weeks as cured.

The oldest patient at the institution is Peter Servold, a miner who was in the Le Roi mine in the same accident that resulted in the death of Harry Adams. The accident occurred on October 22 and came near resulting fatally to Servold, as well as to Adams. Servold has nearly recovered. The third patient is John Bigley, a miner who was injured some time ago at the Velvet. He is suffering from a sprained wrist and bruises. The fourth patient is George Baudelle, of the C. P. R., who is suffering from stomach troubles.

While in the city the other day Pat Burns, of Burns & Co., received a bill for meat supplies furnished the hospital during the past few months.

While in the city the other day Pat Burns, of Burns & Co., received a bill for meat supplies furnished the hospital during the past few months.

CITY NEWS

NIGHT OF SPORTS—Sometime ago the rink management made the statement that they would bring off a night of sports, but owing to "hockey games, the bonspiel and other things the affair has been called off until after the carnival.

ENTERTAIN FRIENDS—Mr. and Mrs. Richard Arthur entertained a number of friends Saturday evening at their home on East Le Roi avenue. Card games of the progressive kind made the evening pass swiftly. A nice supper was served the guests by Mrs. Arthur.

SMEILER ENGINE—The Boundary Falls smelter has placed an order for a small locomotive, which will be used in hauling hot slag from the furnaces to the dumps. The engine does the work of a number of men more satisfactorily than under present conditions.

CLOSES DOORS—The International music hall will give its last performance on the night of the 31st inst. The institution has been operated continuously since February 15th last under the management of John S. Holland, but has not proved a financial success for some weeks.

DELAYED RETURNS—The statement is made that the delay in receiving returns eagerly awaited in Rossland from the Trail smelter is because the crusher at the smelter has been out of kilter for a few days, preventing the prompt sampling of ore shipped to that point.

VISITORS WIN—Yesterday afternoon a special curling game was arranged between the rink of Dr. Carruthers and a Rossland rink led by J. S. C. Fraser. The game was one that the contestants will not soon forget, and was won by the visitors after a spirited contest. R. W. Grigor turned around and played with the visitors.

BAD ACCIDENT—George Pringle, who has been working for some time in the compressor plant of the Columbia-Kootenay mine, was injured Sunday night while working around the machinery. Pringle was caught by the piston, one of his fingers being broken and others badly crushed. He came to the city, where his wounded hand was bandaged.

A BROKEN ARM—D. C. Hills of Silica is in town after two months' close confinement arising from a broken arm. The accident occurred at the Silica reduction works, and resulted in a very complicated fracture. The bone had to be broken again yesterday, and this time it was satisfactorily set by Dr. Coulthard. Mr. Hills will remain in town for a few days before returning to Silica. He is stopping at the Kootenay.

WAR EAGLE MEETING—The annual meeting of the War Eagle Consolidated Mining & Development company takes place on February 10 in Toronto. Edmund B. Kirby, general manager, will be in attendance and will submit lengthy reports of the company's operations during its past year, which closed on December 31. It is likely that further announcements will be made regarding the inauguration of concentrating in connection with the company's property and that of the Centre Star mine.

NEW COMMANDER—The leadership of the local branch of the Salvation Army, left vacant by the departure of Adjutant and Mrs. Nelson a few days ago, has been filled by the appointment of Captain Hurst, a lady who has had charge of Salvation Army work all over the western states. She is a worker in the interests of the Army who has made a most creditable record wherever stationed. She was met on her arrival here by members of the local branch and escorted to the barracks.

CARNIVAL VISITORS—The Rossland Midwinter carnival will serve to draw quite a flood of visitors from the towns and cities of the province. With cheap excursion rates large delegations may be expected to come from Revelstoke, Greenwood, Penticton, Grand Forks, Kaslo, Midway, Moyie, Nelson, Sandon, and other points. Many of the visiting curlers will be back during the carnival. They expect many to come from their towns and declare that everything possible to boom the carnival will be done.

LEAD DELEGATION—A dispatch from Montreal quotes John L. Retallack, spokesman of the delegation of silver-lead producers to Ottawa, as stating that the delegation understood higher duties would be granted. "We have seen Sir Wilfrid Laurier," says Mr. Retallack, "and nearly all the members of the cabinet. They admitted that the condition of the silver-lead industry was unique and that something would have to be done to grant it better protection. Of course they could not pronounce what would be the attitude of the government, but we understood that a higher duty would be granted."

POMPIER EXHIBITION—Members of the fire brigade have expressed their willingness to give a series of pomper ladder exhibitions during the winter carnival at the Bank of Montreal or any other block that may be selected. The pompiers, as is generally known, are light ladders of one main piece and small projections on each side for footholds, the whole ending in a strong hook that is thrust through window and grip the casing. Two men work with the ladders, following each other up the side of a building with a precision and agility that is remarkable when the men are in practice. The work is exciting and has the spice of danger necessary to make it attractive for those who look for thrilling spectacles. An expert Spokane fireman was killed at Victoria recently while participating in pomper drill.
