UNSCHEDULED CHARTER SERVICE

The following work was carried out on Piper J-3 aircraft CF-DEK, in order that the certificate of Airworthiness might be renewed.

FUSELAGE

Fuselage thoroughly examined for damage and found satisfactory.
Fuselage given wash coat of yellow pigmented dope and trimmed in blue.
12 volt 25 amp hour battery installed as per Piper J-3 Service Manual.
Navigation and landing light switches together with fuse panel installed to the rear of the ignition switches.
Pioneer turn and bank indicator installed in centre of instrument panel in place of the compass.
Compass relocated above its original position and swung.

RIGHT WING

Both spars spliced at centre of # 3 and # 4 stations according to reference Section 15.6011 of CAA Manual 15.
Wing completely rebuilt from struts to tip.
No. 5 rib repaired according to reference Section 15.6442 of CAA Manual 15.
Grimes green navigation light installed as per J-3 Manual.
Grimes type D 3150 landing light installed. CAA Approval No.
Wing recovered and doped 3-clear, 1-aluminum, 2-pigmented.
Front lift strut clevis replaced.

LEFT WING

Ribs 1 - 2 - 3 - 8 - 9 - 10 - 11 repaired according to reference Section 15.6442 of CAA Manual 15.
Wing tip bow and 2 17" channel braces replaced at tip.
Grimes red navigation light installed as per J-3 Manual.
Grimes type D 3150 landing light installed. CAA approval No.
Wing recovered and doped 3-clear, 1-aluminum, 2-pigmented.

UNDERCARRIAGE

Undercarriage checked thoroughly and found satisfactory.
Undercarriage given wash coat of yellow pigmented dope.
New tires and tubes installed.

MPENNAGE

Top of rudder straightened.
Grimes white navigation light installed on bracket on top of rudder as per J-3 Service manual.
Empennage examined closely and found satisfactory.
Empennage given wash coat of yellow pigmented dope.
