Engineers' Department

In our Engineers' Department you will find a good representative line of supplies used by architects, engineers, surveyors and draughtsmen. We stock Eugene Dietzgen, W. & L. E. Gurley and Young & Sons' transets and levels, Lufkin and Chesterman steel and metallic tapes. Our lines of hand levels, compasses and aneroids are from the factories of Eugene Dietzgen, of Chicago, and Short & Mason, London. We also carry steel T squares, triangles and straight edges of all well known makes.

We stock blue print paper, tracing paper, tracing cloth, erasing fluids, perfect profile and cross section papers, engineers' field books, chain scales, protractors, drawing board, Windsor & Newton water colors, Higgins' liquid drawing ink.

If you are interested in anything in this line ask for one of our Engineers Supply Catalogues.
