BEANS AND PEAS.—Every family should eat beans and peas, because, of all articles, they afford the most nutriment for the least money.  
"One pound of cheap meat, say at ten cents, and one pound of split peas, say five cents, will give a fuller dinner to a family than a dollar expended for beef-steak and white bread. This is a kind of economy that should be known and rigidly practiced.

TO CLEAN CLOTH FROM CLARET STAINS.—Put it in boiling milk as soon as possible after the claret is spilt. The part of the cloth which is stained must not be put in water before it is dipped in the milk, or the stain will not come out.
