

The Time Tried Cultivator

A Vital Point in Seeding

SEED must be deposited in a well-opened, finely pulverized, well-aired soil with plenty of moisture. The young plants and roots must have a well prepared seed-bed, else they cannot stool out and form a strong system. Fail at this vital point and your chances of a good crop are gone. The roots cannot spread out, the crop will be stunted in growth.

Peter Hamilton Spring Tooth Cultivator

will work your soil into a good seed-bed. It is designed to cut every inch of ground and thoroughly pulverize it to an even depth.

The arrangement of the sections to which the teeth are attached is such that the front and back rows act independently. There is no danger of one set of teeth cultivating deeper than another or vice versa. Furthermore, having so many sections gives the teeth more freedom of action, and when one tooth catches on a stone or root only two or three are jerked out of the ground instead of one half or all of the teeth. The teeth are made from very high grade steel and are reinforced with our patented helpers. The points of teeth are reversible, giving double wear. There is no chance of clogging when the teeth are in three rows.

The frame is strong, well braced and firmly trussed and cannot sag in the middle.

Write us to-day for illustrated booklet and make sure of having a Peter Hamilton Cultivator on hand for preparing a good seed-bed.

Is Your Thresherman A Grain Saver?

This is the most notable advance made in modern threshing. A device in the hopper returns to the separator the grain that would otherwise go to the stack. Users write us that this improvement saves one to three per cent more grain. Figure what that means to you.

Get the facts from any of the makers of North America's standard threshing machines listed below. Among these are the builders of the leading tractors and farm implements. All of them are prepared to supply threshing machines equipped with the Grain-Saving Stacker. Write to any of these for information.

View looking into hopper showing grain trap near stacker fan; also auger running from beneath trap for returning the saved grain to separator.

Grain Saving Stacker

The Grain-Saving Device Originated with The Indiana Manufacturing Co., Indianapolis, Ind., Who Also Originated the Wind Stacker

Alpha Engine RELIABILITY

RELIABILITY is the keynote of the Alpha. It RUNS when you want it to—chugs away all day and you never need to think about it.

It's always reliable; always ready.

Why?

Because it's so simply and sturdily designed and so expertly and honestly built.

There's nothing complicated about the Alpha—no electric batteries; no delicate attachments to "keep you guessing."

Just oil it; turn on the fuel—either gasoline or kerosene—and the Alpha does the rest.

It takes a whole lot of the drudgery out of farmwork, and, in addition, saves time and fuel.

Made in 12 sizes, 1 1/2 to 28 H. P.

LANDS WANTED FOR... SOLDIER SETTLERS

POWERS have been granted to the Soldier Settlement Board of Canada by Order in Council of the 11th of February, 1919, to purchase land to be re-sold to qualified returned soldiers who desire to make farming their permanent vocation.

To assist soldiers in settling in any suitable district in which they may wish to locate, the Soldier Settlement Board desires to have filed in each of their Provincial Offices a select list of farm lands available for purchase in each district of the Eastern Provinces, with full description and lowest cash prices of the same. Purchases by the Board will be paid for in cash.

The public are informed that this land is for purchase by returned soldiers, and must be of good agricultural quality, and reasonable price, making possible the success of the soldier as a farmer. It should be within seven miles of a railway, open, free from weeds, water supply assured, and of moderate price. In giving particulars, mention number of farms immediately required will be very limited. Owners, therefore, will kindly assist the Board by offering for the present only land which fills the above requirements.

No commission will be charged or paid. No offers to sell will be binding on the person offering, unless a sale is effected, and no obligation will be on the Board to accept any offer.

If application from a returned soldier be received for the purchase of land, an inspection and valuation of such land may be made by the Board, as soon as free from snow. If approved, negotiations may be entered into for the purchase and sale thereof. An approved list is desired for each suitable district throughout Canada.

All communications concerning land in the Eastern Provinces should be addressed to the Provincial Supervisor of the Soldier Settlement Board for the province in which the land offered for sale is situated, a list of whom is given below:—

ONTARIO: Mr. W. M. Jones, 32 Adelaide St. E., Toronto.	NOVA SCOTIA: Mr. R. H. Congdon, 529 Barrington St., Halifax.
QUEBEC: Lt.-Col. Bruce F. Campbell, Drummond Bldg., Montreal.	PRINCE EDWARD ISLAND: Soldier Settlement Board, Riley Bldg., Charlottetown.
NEW BRUNSWICK: Mr. Wm. Kerr, Post Office Bldg., St. John.	

SOLDIER SETTLEMENT BOARD, Canada.

NOW IN PRINT

The Report for 1918 of the Great-West Life Assurance Company is now in print, and a copy will be mailed to any interested person on request.

To those needing Insurance the Report will prove a remarkably interesting document showing as it does the notable prosperity and progress of the Great-West Life, and the gratifying results that are being accomplished for the Policyholders.

The whole report gives strong confirmation to the now widely-recognized claim that for profitable Life Insurance one cannot better the policies of
