

Mrs Pankhurst's Address

Continued from Page 3

Judging from the work they were doing in other directions she felt that women might be able to do much for elevating the tone of Canadian politics, if they could only secure an entrance.

Mrs. Pankhurst is a native of Manchester, England, having been born on the anniversary of the storming of the Bastille. She comes of revolutionary stock, her father being a great radical politician, and her grandfather a participant in the Peterloo franchise riots in 1819, narrowly escaping with his life. As a student in Paris she caught the revolutionary spirit from a daughter of Henri Rochefort, of whom she was an intimate friend. On returning to Manchester she married Dr. Pankhurst, a barrister, who had been a member of the first woman's suffrage society, founded by John Stuart Mill.

Starting Long Experience

Later she was placed on the executive committee of the only existing woman's suffrage society, and was also on the woman's committee for pushing the married woman's property bill which subsequently became law. In 1886 Mrs. Pankhurst went to London and joined the Fabian society and the Holborn Women's association. She remained a Liberal until 1892, when she joined the Independent Labor party, and returned to Manchester. In the same year she stood as the Independent Labor candidate for the Manchester school board and was the first of the defeated candidates. The following year she was elected head of the poll for the Poor Law Guardians for Manchester and served in that capacity for five years. In 1899, on the death of her husband, she was appointed registrar of births and deaths and the following year was elected as Trades Council nominee of the school board and twice served on the National Demonstration Council of the Independent Labor party.

Formed Women's Union

In 1903, together with her daughter, Christabel, she formed the Women's Social and Political Union, generally known as "Votes for Women." As head of this organization she has stirred up much discussion throughout the civilized world. Her tactics, however, instead of being random outbursts of emotional hysteria, have been successive steps of a well planned campaign.

Her plans have been rewarded. The movement for equal suffrage is now a national issue. Already their bill has had two readings in Parliament and it is very probable that the fight will not need to be maintained much longer. Undoubtedly Mrs. Pankhurst is one of the most remarkable personalities of modern times. She is a wonderful speaker, for in her calm way she never fails to impress her audience with the right of her cause.

DRY FARMING

By William McDonald, M.S., Agr., Sc.D., Ph.D.

This is the best and most reliable book on the subject of dry farming that has been published in recent years. It is highly endorsed by dry farming experts in Alberta, particularly by Prof. Elliott, of the C.P.R. demonstration farm at Strathmore. Hundreds of Western farmers have purchased this book from The Guide in the past year and are well pleased with it. The following are the titles of the chapters, showing what the book deals with.

1. History of Dry Farming.
2. Some Points in Practice.
3. The Conservation of Soil Moisture.
4. Rainfall and Evaporation.
5. The Problem of Tillage.
6. The Campbell System.
7. Dry Farming Zones.
8. Dry Land Crops.
9. The Traction Engine in Dry Farming.
10. Dry Land Experiments.

This book is kept in stock in The Guide office and will be sent to any address by return mail, pre-paid, upon receipt of \$1.30.

FARMING has become a specialized business

It's no longer a "hit-or-miss" occupation, where "any old way" is good enough. Farmers are buying pianos and automobiles as never before. They're living as well as working.

The farmer has learned that it pays to employ progressive methods. That's why he is ever ready to receive helpful suggestions for improving his crops, his land and his home. It's also the reason that more than fifty thousand Canadian farmers are enthusiastic about our handsome book,

"What the Farmer Can Do With Concrete."

It isn't a catalogue, nor an argument for you to buy something. It is clearly written, interesting, profusely illustrated. It describes the various uses to which concrete can be put on the farm. Not theories, but facts, based on the actual experience of farmers all over the continent. It is the most complete book on the subject ever published, fulfilling the purpose behind it, which is to help

the farmer take advantage of concrete's possibilities. The list of subjects covers every conceivable use for concrete on the farm. The book's actual value to you will far exceed the list price of fifty cents, but if you will send us your name and address at once, we'll be glad to
