countered every sort of weather from simoons of the Indian ocean, the doldrums of the Southern seas and the ice floes of Newfoundland.

Several of This Type

There are several of these barquentines in the West India and British North American trade at present, having been forced over to this side of the Atlantic by the vagaries of economic conditions, the fluctuations of freight markets and the strenuous competition with steamships and schooner rigged vessels. This latter element, more than anything else, is forcing the square rigged masts from is the sea, and year after year the arrival of an E. H. Hocken or a Fannie Breslauer, is becoming a rare the younger generation as it is a re-

# New Ideas in HOUSE DRESSES

To be attired attractively when engaged in the duties of the house, seems impossible until you see our fine showing of the newest designs of

# Electric Brand House Dresses!

They're not an expense—they're an economy.

They are low in price yet marvellously attractive in style, fit and finish; and are so easily laundered as to enable the woman whose pride in her own home calls for her personal superintendence of the details of the house work, to be ready at all times for the unexpected visitor.

They are exceptionally stylish in design; thoroughly well made from reliable materials, and priced sufficiently low as to be within the reach of every woman's pocket book.

Their cost is less than the wear and tear on better clothes when worn around the house. They are worth their cost in the comfort of being "always ready" for any emergency.

They give complete protection to all garments worn under-

They are made from good qualities of wash goods, guaranteed fast colors.

They can be worn to "run to the store," or for a morning trip "down town." \*

You couldn't make half as good dresses at home, for double the price.

They are priced at from \$1.60 to \$3.80.

When you see these new ideas in house dresses, you'll have some new ideas about house dressing.
