Minard's Liniment Cures Diphtheria

To Check Bee Diseases

If a percentage of the hives in an apiary are found to be attacked with foul brood, or any form of infectious disease, they can only be successfully treated when the material used for housing the colonies is sound and in good order. If bees have access to the combs of a hive by any other means than the legitimate entrance, the spread of the disease cannot be controlled with any certainty.

Spraying with chemicals for foul brood is not advisable, for nothing in the way of a spray that will do more than arrest the disease has yet been found. The starvation treatment is regarded as the only method that will effect a permanent cure, and this, we believe, it will do if properly carried out. It is also of great importance that bees should be prevented from robbing each other's hives while the apiary is under treatment.

Freckle-Face

Sun and Wind Bring out Ugly Spots, How to Remove Easily

Here's a chance, Miss Freckle-face to try a remedy for freckles with the guarantee of a reliable dealer that it will not cost you a penny unless it removes the freckles; while if it does give you a clear complexion the expense is trifling. Simply get an ounce of othine—double strength from Clark's Drug Store and a few applications should show you how easy it is to rid yourself of the homely freckles and get a beautiful complexion. Rarely is more than one ounce needed for the worst case.

Be sure to ask the druggist for the double strength othine as this is the prescription sold under guarantee of money back if fails to remove freckles.

Glasgow, Scotland, Aug. 28.—Co-operation as the basis of the ideal state of the future was the keynote of the address of Earl Grey, former governor general of Canada, at the opening of the congress of the International Co-operative Alliance here today. Co-operation would put a barrier against the tyranny of the trusts, he said, and would reconcile the warring forces of labor and capital.

Six hundred delegates were present, representing 2,000,000 members of co-operative societies in America and Europe, and Earl Grey's views, enunciated with much fervor, were warmly applauded.

He declared that the application of the co-operative principle to the industrial life of Great Britain, the United States, France, Germany, Denmark and Ireland, was proved by the substitution of organized distribution for un-organized distribution, co-operative buying for individual buying, co-operative transportation and marketing for individual selling and the co-operative use of power for individual use of machinery.

The wants of both the producer and consumer would thereby be met more effectively at a smaller cost, thus securing to the consumer a reduction in the cost of living and a greater command not only of the necessities, but the comforts and conveniences of life, and to the producer a substantial increase in the amount of net profits available for distribution, which meant an increased fund from which alone could be drawn the high wages all desired for the underpaid workers. In the civilized world the remarkable growth of the co-operative movement, justified the confident expectation that a day of new social order was at hand.

Although the delegates, continued Earl Grey, might be separated by differences of race, language and religion, they had met as one people under the flag of co-operative fraternity, carrying in their hearts the same motto, "Each for all and all for each." All who had in their heart the wellbeing of their fellow-men, he urged, should do their utmost to promote the transition from present conditions to a social state in which the spirit of fraternal co-operation should prevail.
