A Complete List in Stock

The Entries for the Girls Field Day to be held at the T. A. A. C. grounds on June 12th are fast filling up and it is expected that fast time will be made in the cinder path events.

The arbitration board has awarded \$10,000,000 as the amt. the Government will have to pay for 600,000 shares of the common stock of the Canadian Northern railway; and then operate it as a government line.

Tom Longboat, according to a letter from him recently re-

ceived on this side, is still acting as a "runner" with the Canadian force somewhere at the front. Tom writes that he has twice been slightly gassed.

Rheims, the destruction of whose historic buildings has been the object of German artillery fire, has been a city of importance since the time of the Romans. King Clovis was baptized there, and for nearly 1000 years the kings of France were crowned in the cathedral one of the noblest and most magnificent Gothic structures in all Europe. At Rheims Joan of Arc caused the coronation of Charles VII. after her triumphant campaign.

HARBORVILLE.

Sunday was sure one grate lovely day over here to the bay, and ther was quit sum few fellers cum over from the valley with ther cair, or else cum long with sum oter feller what hed one, and they all seemed ter be 'badly wantin fish, and sum uv 'our fish ketchers dun a land office business sellin fish to them fellers.

I alwers thot what ther was a meat shop over ter Berwick, what hed fish to sell all the time, just fresh ketchel, but then maybe, they dont let that feller keep open Sunday and sell fish, they hev to cum ter Harborville, wher ther aint no sich thing es sundey now how.

Business hes to be did over here, wether its sundey or any oter day.

We hev a law here in Canady what ses that the Sluce ways to ther wares. MUST BE OPENED Saturday night, and left open til munday mornin, and ther air a fish inspector, what draws a good wages, what is supposed to see that the laws air obeyd, but whoever herd of it bein dun. They wurk them wares fur all oter is in it sundey es well es oter days, but the inspector ses nary a wurd.

But it aint no nurse here nor oter places, and we obey laws es well es the rest uv the peple. I herd tell the uther day uv a leaden merchant in the valley not so very far from Waterville, what sed he wuld not obey the Food bord orders, and ther if they tride to make him he wuld go out uv business. He sed hed be durned if he wuld sell flour by the pound law or no law,

just ther same thet same store-keeper made a cumfutable for- tun right here in Nover Scott, ang made it becus he was pro- tected by the laws uv the land. Now he seg the law be d—d.

Im a good del aferd, thet if peple dont soon begin to find out thet ther is a war goin on thet we air in right up ter our necks, thet they will be haven a good dele more hard laws to obey befor we air thrugh with it.

In the mentime, the name uv a certain real estate owner uv Harborville, is still absent from the assessment roll, and the School bord is wunderin how they air goin to git his school tax, es it wuld help a whul lot in payen the techer.

Silas Harris, who is down to ther hospertel at Halifax, hes been operated on by the doc- toers down ther, hes hed a set back and is in a dangerous state. Private Bernard Morris, after bein wounded in France a yer ago last Chrismus, and who hes since spent most uv his time in hospertels, is lyen to hum here with Scarlet fever es a compan- in.

The Ruby L, cum in the uther evenin and unloded a few bags uv vfeed and a little flour. She hes a new crew uv green hands, es the Military officels took ther regler men away to go and fite the germens, the result was thet it tuk them hands most uv the nite lookin fur the frate fur Harborville, but they finely found most uv it, and whet they didnt find, they will bring back next time.

Haven to spend so much time es thet, they hed no time to go and get another few hundred trout outern our brook.

A LIFETIME OF SUFFERING

Prevented by "Fruit-a-tives"
The Wonderful Fruit Medicine

83 MAISONNEUVE ST., HULL, QUE.
"In my opinion, no other medicine is so good as 'Fruit-a-tives' for Indigestion and Constipation.

For years, I suffered with these dreaded diseases, trying all kinds of treatments until I was told I was incurable.

One day a friend told me to try 'Fruit-a-tives'. To my surprise, I found this medicine gave immediate relief, and in a short time I was all right again!"

DONAT LALONDE
50c. a box, 6 for \$2.00, trial size 25c.
At all dealers or from Fruit-a-tives Limited, Ottawa.

Sixty barrels uv perinters dumped in a field along side our roadway, is sum hard site, they culdent be shiped last fall es ther was no ship to be hed, and so they froze up this last cold spell.

Mong the uther fratures uv the law uv the land, last sundey, was a party uv fellers what cum as fur es the top uv the moun- tin, wher they got out uv the motor truck what brot em, and sarterd fur the Brook. They fished the whul dern brook from wher they started in down ter Harborville, and I gess caught about all the poor little trout, what them Ruby L, fellers left. Meanwhile, the fellers what driv the truck waitid fur them on our warf.

Sugar Beet Cultivation In Alberta

Acres of Sugar Beets.

It is perhaps not generally known that the sugar beet is one of the best growing crops in Western Canada. Not only does this crop grow well, but there is no doubt that with the necessary labor and capital one of the most successful industries in Canada can be built upon the cultivation of beets for sugar.

In Southern Alberta alone the area suitable to the growth of the best kind of sugar beets is greater in extent than any two of the largest producing districts in the United States. That more has not been heard of the possibilities of this crop in Alberta is undoubtedly due to the success of the farmer in grain growing and stock raising. But, just as a higher quality of grain, with larger yields, is produced in Western Canada than in the older districts, so sugar beets grown here generally contain a higher percentage of sugar and yield a greater tonnage to the acre than those grown elsewhere. Tests made with beets grown under irrigation from five different kinds of seed at the Dominion Government Experiment Station at Lethbridge showed:

1. 15 1/2 and 21	a sugar percent
17.85 and 16.25	age 0.

respectively. In the same district crops without irrigation yielded 9 1/2 tons per acre from the same seed. Even better results have been obtained from beets grown under irrigation in the Eastern and West- ern Sections of the Irrigation Block of the Canadian Pacific Railway, east of Calgary, Alberta. Beets with a sugar content of twenty percent have been grown there in successive years, and growers there are confident that this high percentage can be main- tained with large crops. It is safe to say that practically any soil cap- able of producing such grain as is produced in Western Canada will produce satisfactory sugar beets, even though the results may not be so gratifying as those achieved with irrigation.

More than twelve years ago the possibilities of sugar beet production in Alberta had been recognized, and is giving evidence before a commit-

Irrigating Sugar Beets.

tee appointed by the Dominion Gov- ernment to enquire into the tariff on sugar a representative of the Ray- mond Sugar Company, Raymond, Alberta, stated that at that time the company had already demonstrated that the beet sugar industry, under proper conditions, could be developed to an enormous extent in Alberta, and that the general conditions, etc., compared very favorably with those existing in the States of Utah and Idaho, which at that date were two of the largest producing districts in the Union.

Combined with the live stock in- dustry, sugar beet cultivation builds up prosperous districts more quickly and substantially than probably any other mode of commercial develop- ment. The feeding value of the beet pulp and tops needs no comment, as a rotation crop for the cultivation of soil values there is none better.

In regard to seed production, it is believed that a superior quality of seed can be produced in Alberta in marketable quantities. The soil in

the Eastern Section of the Irrigation Block is admirably adapted for the growth of beets for seed, which will, no doubt, develop into one of the most important branches of indus- try.

A word as to the markets will be interesting. In 1915, the consumption of sugar in Alberta was approx- imately 42,000,000 pounds, in British Columbia 33,000,000 pounds, in Sas- katchewan 50,000,000 pounds, and in Manitoba 43,000,000 pounds, making a total for the Western Provinces alone of 168,000,000 pounds. The total production of sugar in the whole of the Dominion amounted to 37,000, 000 only. A large market is there- fore, right at the door. Alberta alone has an area sufficiently large to pro- duce sugar for the needs of Western Canada, and also to export large quantities. This is undoubtedly one of the future industries of Western Canada, especially in the districts where irrigation is practised.
