WOULD ABOLISH INCOME TAX TO HELP BUSINESS

HELP BUSINESS

OTTAWA.—A resolution urging the abolition of the federal income tax was unanimously adopted at a meeting here recently under the auspices of the Retail Bureau of Canada. The attitude of the retailers is that they would benefit from increased buying power and better times generally if the tax burden can be reduced.

E. M. Trowern, Dominion Executive Director and Secretary of the bureau, who characterized the income tax as "the most unjust ever levied in the history of the world" stated he had been informed by a former official of the income tax branch of the government that it costs 62½ per cent. to collect the tax.

It was pointed out that the income tax in Canada was practically double that of the United States, creating in itself a dangerous national handicap, and retarding the inflow of foreign capital.

SHIFTING GEARS ON HILLS

When an automobile is permitted to labor while going up a steep hill, the sudden blows of the explosion, acting against the resistance of the slow-moving crankshaft, tend to flatten out the bearings, shortening their life wearing them out and making the engine knock long before it should under proper use. Do not crowd the engine to see if it can possibly make the top of the hill without shifting gears.
